Persecution or discrimination, perceived as reality by an individual or real, on the basis of membership in some group (such as defined by skin colour, religion, ethnic origin, sexual orientation, gender identity and expression, etc.) rather than personal characteristics

**Exclusions:** Social exclusion or rejection (QE03)

**QE0Y** **Other specified problems associated with social or cultural environment**

**QE0Z** **Problems associated with social or cultural environment, unspecified**

## Problems associated with health behaviours (QE10-QE2Z)

**Exclusions:** Difficulty or need for assistance with general life tasks or life management (QF21)

### Hazardous substance use (QE10-QE1Z)

Hazardous substance use is a pattern of psychoactive substance use that appreciably increases the risk of harmful physical or mental health consequences to the user or to others to an extent that warrants attention and advice from health professionals. The increased risk may be from the frequency of substance use, from the amount used on a given occasion, from risky behaviours associated with substance use or the context of use, from a harmful route of administration, or from a combination of these. The risk may be related to short-term effects of the substance or to longer-term cumulative effects on physical or mental health or functioning. Hazardous substance use has not yet reached the level of having caused harm to physical or mental health of the user or others around the user. The pattern of substance use often persists in spite of awareness of increased risk of harm to the user or to others.

**Exclusions:** Disorders due to substance use (6C40-6C4Z)

**QE10**

#### **Hazardous alcohol use**

A pattern of alcohol use that appreciably increases the risk of harmful physical or mental health consequences to the user or to others to an extent that warrants attention and advice from health professionals. The increased risk may be from the frequency of alcohol use, from the amount used on a given occasion, or from risky behaviours associated with alcohol use or the context of use, or from a combination of these. The risk may be related to short-term effects of alcohol or to longer-term cumulative effects on physical or mental health or functioning. Hazardous alcohol use has not yet reached the level of having caused harm to physical or mental health of the user or others around the user. The pattern of alcohol use often persists in spite of awareness of increased risk of harm to the user or to others.

**Exclusions:** Disorders due to use of alcohol (6C40)

**QE11**

#### **Hazardous drug use**

A pattern of use of psychoactive substance(s) other than nicotine or alcohol that appreciably increases the risk of harmful physical or mental health consequences to the user or to others to an extent that warrants attention and advice from health professionals. The increased risk may be from the frequency of substance use, from the amount used on a given occasion, from risky behaviours associated with substance use or the context of use, from a harmful route of administration, or from a combination of these. The risk may be related to short-term effects of the substance or to longer-term cumulative effects on physical or mental health or functioning. Hazardous drug use has not yet reached the level of having caused harm to physical or mental health of the user or others around the user. The pattern of drug use often persists in spite of awareness of increased risk of harm to the user or to others.

**Exclusions:** Disorders due to substance use (6C40-6C4Z)

- QE11.0 Hazardous use of opioids**  
A pattern of opioid use that appreciably increases the risk of harmful physical or mental health consequences to the user or to others to an extent that warrants attention and advice from health professionals. The increased risk may be from the frequency of opioid use, from the amount used on a given occasion, from risky behaviours associated with opioid use or the context of use, from a harmful route of administration, or from a combination of these. The risk may be related to short-term effects of opioids or to longer-term cumulative effects on physical or mental health or functioning. Hazardous use of opioids has not yet reached the level of having caused harm to physical or mental health of the user or others around the user. The pattern of opioid use often persists in spite of awareness of increased risk of harm to the user or to others.
- Exclusions:*** Disorders due to use of opioids (6C43)
- QE11.1 Hazardous use of cannabis**  
A pattern of cannabis use that appreciably increases the risk of harmful physical or mental health consequences to the user or to others to an extent that warrants attention and advice from health professionals. The increased risk may be from the frequency of cannabis use, from the amount used on a given occasion, from risky behaviours associated with cannabis use or the context of use, from a harmful route of administration, or from a combination of these. The risk may be related to short-term effects of cannabis or to longer-term cumulative effects on physical or mental health or functioning. Hazardous use of cannabis has not yet reached the level of having caused harm to physical or mental health of the user or others around the user. The pattern of cannabis use often persists in spite of awareness of increased risk of harm to the user or to others.
- Exclusions:*** Disorders due to use of cannabis (6C41)
- QE11.2 Hazardous use of sedatives, hypnotics or anxiolytics**  
A pattern of use of sedatives, hypnotics or anxiolytics that appreciably increases the risk of harmful physical or mental health consequences to the user or to others to an extent that warrants attention and advice from health professionals. The increased risk may be from the frequency of use of sedatives, hypnotics or anxiolytics, from the amount used on a given occasion, from risky behaviours associated with use of sedatives, hypnotics or anxiolytics or the context of use, from a harmful route of administration, or from a combination of these. The risk may be related to short-term effects of sedatives, hypnotics or anxiolytics or to longer-term cumulative effects on physical or mental health or functioning. Hazardous use of sedatives, hypnotics or anxiolytics has not yet reached the level of having caused harm to physical or mental health of the user or others around the user. The pattern of use of sedatives, hypnotics or anxiolytics often persists in spite of awareness of increased risk of harm to the user or to others.
- Exclusions:*** Disorders due to use of sedatives, hypnotics or anxiolytics (6C44)

**QE11.3**

**Hazardous use of cocaine**

A pattern of cocaine use that appreciably increases the risk of harmful physical or mental health consequences to the user or to others to an extent that warrants attention and advice from health professionals. The increased risk may be from the frequency of cocaine use, from the amount used on a given occasion, from risky behaviours associated with cocaine use or the context of use, from a harmful route of administration, or from a combination of these. The risk may be related to short-term effects of cocaine or to longer-term cumulative effects on physical or mental health or functioning. Hazardous use of cocaine has not yet reached the level of having caused harm to physical or mental health of the user or others around the user. The pattern of cocaine use often persists in spite of awareness of increased risk of harm to the user or to others.

**Exclusions:** Disorders due to use of cocaine (6C45)

**QE11.4**

**Hazardous use of stimulants including amphetamines or methamphetamine**

A pattern of use of stimulants including amphetamines and methamphetamine that appreciably increases the risk of harmful physical or mental health consequences to the user or to others to an extent that warrants attention and advice from health professionals. The increased risk may be from the frequency of use of stimulants including amphetamines and methamphetamine, from the amount used on a given occasion, from risky behaviours associated with use of stimulants including amphetamines and methamphetamine or the context of use, from a harmful route of administration, or from a combination of these. The risk may be related to short-term effects of stimulants including amphetamines and methamphetamine or to longer-term cumulative effects on physical or mental health or functioning. Hazardous use of stimulants including amphetamines and methamphetamine has not yet reached the level of having caused harm to physical or mental health of the user or others around the user. The pattern of use of stimulants including amphetamines and methamphetamine often persists in spite of awareness of increased risk of harm to the user or to others.

**Exclusions:** Disorders due to use of stimulants including amphetamines, methamphetamine or methcathinone (6C46)

**QE11.5**

**Hazardous use of caffeine**

A pattern of caffeine use that appreciably increases the risk of harmful physical or mental health consequences to the user or to others to an extent that warrants attention and advice from health professionals. The increased risk may be from the frequency of caffeine use, from the amount used on a given occasion, from risky behaviours associated with caffeine use or the context of use, from a harmful route of administration, or from a combination of these. The risk may be related to short-term effects of caffeine or to longer-term cumulative effects on physical or mental health or functioning. Hazardous use of caffeine has not yet reached the level of having caused harm to physical or mental health of the user or others around the user. The pattern of caffeine use often persists in spite of awareness of increased risk of harm to the user or to others.

**Exclusions:** Disorders due to use of caffeine (6C48)

**QE11.6**

**Hazardous use of MDMA or related drugs**

A pattern of use of MDMA (3,4-methylenedioxymethamphetamine) or related drugs that appreciably increases the risk of harmful physical or mental health consequences to the user or to others to an extent that warrants attention and advice from health professionals. The increased risk may be from the frequency of use of MDMA or related drugs, from the amount used on a given occasion, from risky behaviours associated with use of MDMA or related drugs or the context of use, from a harmful route of administration, or from a combination of these. The risk may be related to short-term effects of MDMA or related drugs or to longer-term cumulative effects on physical or mental health or functioning. Hazardous use of MDMA or related drugs has not yet reached the level of having caused harm to physical or mental health of the user or others around the user. The pattern of use of MDMA or related drugs often persists in spite of awareness of increased risk of harm to the user or to others.

**Exclusions:** Disorders due to use of MDMA or related drugs, including MDA (6C4C)

**QE11.7**

**Hazardous use of dissociative drugs including ketamine or PCP**

A pattern of use of dissociative drugs including ketamine and PCP (phencyclidine) that appreciably increases the risk of harmful physical or mental health consequences to the user or to others to an extent that warrants attention and advice from health professionals. The increased risk may be from the frequency of use of dissociative drugs including ketamine and PCP, from the amount used on a given occasion, from risky behaviours associated with use of dissociative drugs including ketamine and PCP or the context of use, from a harmful route of administration, or from a combination of these. The risk may be related to short-term effects of dissociative drugs including ketamine and PCP or to longer-term cumulative effects on physical or mental health or functioning. Hazardous use of dissociative drugs including ketamine and PCP has not yet reached the level of having caused harm to physical or mental health of the user or others around the user. The pattern of use of dissociative drugs including ketamine and PCP often persists in spite of awareness of increased risk of harm to the user or to others.

**Exclusions:** Disorders due to use of dissociative drugs including ketamine and phencyclidine [PCP] (6C4D)

**QE11.8**

**Hazardous use of other specified psychoactive substances**

A pattern of use of other specified psychoactive substances that appreciably increases the risk of harmful physical or mental health consequences to the user or to others to an extent that warrants attention and advice from health professionals. The increased risk may be from the frequency of use of the substance, from the amount used on a given occasion, from risky behaviours associated with use of the substance or the context of use, from a harmful route of administration, or from a combination of these. The risk may be related to short-term effects of the specified substance or to longer-term cumulative effects on physical or mental health or functioning. Hazardous use of other specified psychoactive substances has not yet reached the level of having caused harm to physical or mental health of the user or others around the user. The pattern of substance use often persists in spite of awareness of increased risk of harm to the user or to others.

**Exclusions:** Disorders due to use of other specified psychoactive substances, including medications (6C4E)

<b>QE11.9</b>	<b>Hazardous use of unknown or unspecified psychoactive substances</b> A pattern of use of unknown or unspecified psychoactive substances that appreciably increases the risk of harmful physical or mental health consequences to the user or to others to an extent that warrants attention and advice from health professionals. The increased risk may be from the frequency of use of the substance, from the amount used on a given occasion, from risky behaviours associated with use of the substance or the context of use, from a harmful route of administration, or from a combination of these. The risk may be related to short-term effects of the unknown or unspecified substance or to longer-term cumulative effects on physical or mental health or functioning. Hazardous use of unknown or unspecified psychoactive substances has not yet reached the level of having caused harm to physical or mental health of the user or others around the user. The pattern of substance use often persists in spite of awareness of increased risk of harm to the user or to others.
	<b><i>Exclusions:</i></b> Disorders due to use of unknown or unspecified psychoactive substances (6C4G)
<b>QE11.Y</b>	<b>Other specified hazardous drug use</b>
<b>QE11.Z</b>	<b>Hazardous drug use, unspecified</b>
<b>QE12</b>	<b>Hazardous nicotine use</b> A pattern of nicotine use that appreciably increases the risk of harmful physical or mental health consequences to the user or to others to an extent that warrants attention and advice from health professionals. Most often nicotine is consumed in the form of tobacco, but there are also other forms of nicotine delivery (e.g., nicotine vapour). Hazardous nicotine use has not yet reached the level of having caused harm to physical or mental health of the user or others around the user. The pattern of nicotine use often persists in spite of awareness of increased risk of harm to the user or to others. This category is not intended to include the use of nicotine replacement therapies under medical supervision when these are used as part of attempts to stop or reduce smoking.
	<b><i>Exclusions:</i></b> Tobacco use (QE13) Disorders due to use of nicotine (6C4A)
<b>QE13</b>	<b>Tobacco use</b>
	<b><i>Exclusions:</i></b> Disorders due to use of nicotine (6C4A) Use of Nicotine in non-tobacco forms (QE12)
<b>QE1Y</b>	<b>Other specified hazardous substance use</b>
<b>QE1Z</b>	<b>Hazardous substance use, unspecified</b>
<b>QE20</b>	<b>Lack of physical exercise</b>

**QE21****Hazardous gambling or betting**

Hazardous gambling and betting refers to a pattern of gambling or betting that appreciably increases the risk of harmful physical or mental health consequences to the individual or to others around the individual. The increased risk may be from the frequency of gambling or betting, the amount of time spent on these activities, the context of gambling or betting, the neglect of other activities and priorities, risky behaviours associated with gambling or betting or its context, the adverse consequences of gambling or betting, or from the combination of these factors. The pattern of gambling or betting often persists in spite of awareness of increased risk of harm to the individual or to others. This category may be used when the pattern of gambling or betting warrants attention and advice from health professionals but does not meet the diagnostic requirements for Gambling Disorder.

**Exclusions:**      Gambling disorder (6C50)

**QE22****Hazardous gaming**

Hazardous gaming refers to a pattern of gaming, either online or offline, that appreciably increases the risk of harmful physical or mental health consequences to the individual or to others around the individual. The increased risk may be from the frequency of gaming, the amount of time spent on these activities, the neglect of other activities and priorities, risky behaviours associated with gaming or its context, the adverse consequences of gaming, or from the combination of these factors. The pattern of gaming often persists in spite of awareness of increased risk of harm to the individual or to others. This category may be used when the pattern of gaming behaviour warrants attention and advice from health professionals but does not meet the diagnostic requirements for Gaming Disorder.

**Exclusions:**      Gaming disorder (6C51)

**QE23****Problems with inappropriate diet or eating habits**

**Exclusions:**      malnutrition and other nutritional deficiencies (5B50-5C3Z)  
                        Inadequate food (QD61)  
                        Feeding or eating disorders (6B80-6B8Z)

**QE24****Problems with hygiene behaviours****QE25****Problems with oral health behaviours****QE26****Problem with sun exposure behaviour****QE27****Problem with behaviours related to psychological health or wellbeing****QE28****Problem with health literacy****QE2Y****Problems with other specified health-related behaviours****QE2Z****Problem with health-related behaviours, unspecified**

Problems associated with social insurance or welfare (QE30-QE3Z)

**QE30****Insufficient social insurance support**

QE30.0	<b>Insufficient social insurance support, aged</b>
QE30.1	<b>Insufficient social insurance support, disability</b>
QE30.2	<b>Insufficient social insurance support, unemployment</b>
QE30.3	<b>Insufficient social insurance support, family support</b>
QE30.Z	<b>Insufficient social insurance support, unspecified</b>
<b>QE31</b>	<b>Insufficient social welfare support</b>
QE31.0	<b>Insufficient social welfare support, child protection</b>
QE31.1	<b>Insufficient social welfare support, protection against domestic violence</b>
QE31.2	<b>Insufficient social welfare support, protection against homelessness</b>
QE31.3	<b>Insufficient social welfare support, post prison services</b>
QE31.Z	<b>Insufficient social welfare support, unspecified</b>
<b>QE3Y</b>	<b>Other specified problems associated with social insurance or welfare</b>
<b>QE3Z</b>	<b>Problems associated with social insurance or welfare, unspecified</b>

Problems associated with the justice system (QE40-QE4Z)

<b>QE40</b>	<b>Problem associated with conviction in civil or criminal proceedings without imprisonment</b>
<b>QE41</b>	<b>Problem associated with imprisonment and other incarceration</b>
<b>QE42</b>	<b>Problem associated with release from prison</b>
<b>QE4Y</b>	<b>Other specified problems associated with the justice system</b>
<b>QE4Z</b>	<b>Problems associated with the justice system, unspecified</b>

Problems associated with relationships (QE50-QE5Z)

<b>QE50</b>	<b>Problem associated with interpersonal interactions</b>
QE50.0	<b>Problem associated with relationship with friend</b>
QE50.1	<b>Relationships with teachers or classmates</b>
QE50.10	Dissatisfaction with school environment
QE50.1Y	Other specified relationships with teachers or classmates
QE50.1Z	Relationships with teachers or classmates, unspecified
QE50.2	<b>Problem associated with relationships with people at work</b>
QE50.3	<b>Relationships with neighbours, tenant or landlord</b>

<b>QE50.4</b>	<b>Relationship with parents, in-laws or other family members</b>
	<p><b><i>Exclusions:</i></b> Caregiver-child relationship problem (QE52.0)            Problems associated with upbringing (QE90-QE9Z)            Problem associated with interactions with spouse or partner (QE51)</p>
<b>QE50.5</b>	<b>Discord with counsellors</b>
<b>QE50.6</b>	<b>Inadequate social skills</b>
	<p><b><i>Exclusions:</i></b> Mental, behavioural or neurodevelopmental disorders (Chapter 06)</p>
<b>QE50.7</b>	<b>Personality difficulty</b>
	<p>Personality difficulty refers to pronounced personality characteristics that may affect treatment or health services but do not rise to the level of severity to merit a diagnosis of Personality disorder. Personality difficulty is characterised by long-standing difficulties (e.g., at least 2 years), in the individual's way of experiencing and thinking about the self, others and the world. In contrast to Personality disorders, these difficulties are manifested in cognitive and emotional experience and expression only intermittently (e.g., during times of stress) or at low intensity. The difficulties are associated with some problems in functioning but these are insufficiently severe to cause notable disruption in social, occupational, and interpersonal relationships and may be limited to specific relationships or situations.</p>
	<p><b><i>Exclusions:</i></b> Personality disorder (6D10)</p>
<b>QE50.Y</b>	<b>Other specified problem associated with interpersonal interactions</b>
<b>QE51</b>	<b>Problem associated with interactions with spouse or partner</b>
<b>QE51.0</b>	<b>Relationship distress with spouse or partner</b> Substantial and sustained dissatisfaction with a spouse or intimate partner associated with significant disturbance in functioning.
<b>QE51.1</b>	<b>History of spouse or partner violence</b> Non-accidental acts of physical force, forced or coerced sexual acts, verbal or symbolic acts, or significant caregiving omissions that result in harm to a spouse or intimate partner or that have a reasonable potential for harm.
<b>QE51.Y</b>	<b>Other specified problem associated with interactions with spouse or partner</b>
<b>QE51.Z</b>	<b>Problem associated with interactions with spouse or partner, unspecified</b>
<b>QE52</b>	<b>Problem associated with interpersonal interactions in childhood</b>
<b>QE52.0</b>	<b>Caregiver-child relationship problem</b> Substantial and sustained dissatisfaction within a caregiver-child relationship, including a parental relationship, associated with significant disturbance in functioning.

<b>QE52.1</b>	<b>Loss of love relationship in childhood</b>
	Loss of an emotionally close relationship, such as of a parent, a sibling, a very special friend or a loved pet, by death or permanent departure or rejection.
<b>QE52.Y</b>	<b>Other specified problem associated with interpersonal interactions in childhood</b>
<b>QE52.Z</b>	<b>Problem associated with interpersonal interactions in childhood, unspecified</b>
<b>QE5Y</b>	<b>Other specified problems associated with relationships</b>
<b>QE5Z</b>	<b>Problems associated with relationships, unspecified</b>

Problems associated with absence, loss or death of others (QE60-QE6Z)

<b>QE60</b>	<b>Absence of family member</b>
<b>QE61</b>	<b>Disappearance or death of family member</b>
	<i>Exclusions:</i> Prolonged grief disorder (6B42)
<b>QE61.0</b>	<b>Loss or death of child</b>
	<i>Exclusions:</i> Prolonged grief disorder (6B42)
<b>QE61.Y</b>	<b>Disappearance or death of other family member</b>
<b>QE62</b>	<b>Uncomplicated bereavement</b>
<b>QE6Y</b>	<b>Other specified problems associated with absence, loss or death of others</b>
<b>QE6Z</b>	<b>Problems associated with absence, loss or death of others, unspecified</b>
<b>QE70</b>	<b>Problems related to primary support group, including family circumstances</b>
	<i>Exclusions:</i> Problems associated with upbringing (QE90-QE9Z) Problems associated with harmful or traumatic events (QE80-QE8Z)
<b>QE70.0</b>	<b>Inadequate family support</b>
<b>QE70.1</b>	<b>Disruption of family by separation or divorce</b>
<b>QE70.2</b>	<b>Dependent relative needing care at home</b>
<b>QE70.Z</b>	<b>Problems related to primary support group, including family circumstances, unspecified</b>

Problems associated with harmful or traumatic events (QE80-QE8Z)

**Exclusions:** Disorders specifically associated with stress (6B40-6B4Z)

**Coded Elsewhere:** Personal history of psychological trauma, not elsewhere classified (QC4Y)

Personal history of physical trauma other than self-harm (QC4Y)

**QE80**

**Victim of crime or terrorism**

**QE81**

**Exposure to disaster, war or other hostilities**

**Exclusions:** Target of perceived adverse discrimination or persecution (QE04)

**QE82**

**Personal history of maltreatment**

Personal history of non-accidental acts of physical force, forced or coerced sexual acts, verbal or symbolic acts, or significant caregiving omissions that result in harm or have a reasonable potential for harm. These categories are applied to the victim of the maltreatment, not the perpetrator.

**Exclusions:** History of spouse or partner violence (QE51.1)

**QE82.0**

**Personal history of physical abuse**

Personal history of non-accidental acts of physical force that result, or have reasonable potential to result, in physical harm or that evoke significant fear. This category is applied to the victim of the maltreatment, not the perpetrator.

**Exclusions:** History of spouse or partner violence, physical (QE51.1)

**QE82.1**

**Personal history of sexual abuse**

Personal history of forced or coerced sexual acts, sexual acts with someone who is unable to consent, or sexual acts involving a child that are intended to provide sexual gratification to an adult. This category is applied to the victim of the maltreatment, not the perpetrator.

**Exclusions:** History of spouse or partner violence, sexual (QE51.1)

**QE82.2**

**Personal history of psychological abuse**

Personal history of non-accidental verbal or symbolic act that results in significant psychological harm. This category is applied to the victim of the maltreatment, not the perpetrator.

**Exclusions:** History of spouse or partner violence, psychological (QE51.1)

**QE82.3**

**Personal history of neglect**

Personal history of egregious acts or omissions by a caregiver that deprive a child of needed age-appropriate care or an adult who is incapable of self-care and that result, or have reasonable potential to result, in physical or psychological harm. This category is applied to the victim of the neglect, not the perpetrator.

**QE82.Y**

**Other specified personal history of maltreatment**

**QE82.Z**

**Personal history of maltreatment, unspecified**

**QE83**

**Personal frightening experience in childhood**

**QE84**

### **Acute stress reaction**

Acute stress reaction refers to the development of transient emotional, somatic, cognitive, or behavioural symptoms as a result of exposure to an event or situation (either short- or long-lasting) of an extremely threatening or horrific nature (e.g., natural or human-made disasters, combat, serious accidents, sexual violence, assault). Symptoms may include autonomic signs of anxiety (e.g., tachycardia, sweating, flushing), being in a daze, confusion, sadness, anxiety, anger, despair, overactivity, inactivity, social withdrawal, or stupor. The response to the stressor is considered to be normal given the severity of the stressor, and usually begins to subside within a few days after the event or following removal from the threatening situation.

**Inclusions:** acute crisis reaction

acute reaction to stress

**Exclusions:** Post traumatic stress disorder (6B40)

**QE8Y**

### **Other specified problems associated with harmful or traumatic events**

**QE8Z**

### **Problems associated with harmful or traumatic events, unspecified**

Problems associated with upbringing (QE90-QE9Z)

**QE90**

### **Inadequate parental supervision or control**

Lack of parental knowledge of what the child is doing or where the child is; poor control; lack of concern, understanding or comprehension or lack of attempted intervention when the child is in risky situations.

**QE91**

### **Parental overprotection**

**QE92**

### **Altered pattern of family relationships in childhood**

Departure of a family member or arrival of a new person into a family resulting in adverse change in child's relationships. May include new relationship or marriage by a parent, death or illness of a parent, illness or birth of a sibling.

**QE93**

### **Removal from home in childhood**

**QE94**

### **Institutional upbringing**

Group foster care in which parenting responsibilities are largely taken over by some form of institution (such as residential nursery, orphanage, or children's home), or therapeutic care over a prolonged period in which the child is in a hospital, convalescent home or the like, without at least one parent living with the child.

**QE95**

### **Inappropriate parental pressure or other abnormal qualities of upbringing**

Parents forcing the child to be different from the local norm, either sex-inappropriate (e.g. dressing a boy in girl's clothes), age-inappropriate (e.g. forcing a child to take on responsibilities above her or his own age) or otherwise inappropriate (e.g. pressing the child to engage in unwanted or too difficult activities).

**QE96**

**Events resulting in loss of self-esteem in childhood**

Events resulting in a negative self-reappraisal by the child such as failure in tasks with high personal investment; disclosure or discovery of a shameful or stigmatizing personal or family event; or other humiliating experiences.

**QE9Y**

**Other specified problems associated with upbringing**

**QE9Z**

**Problems associated with upbringing, unspecified**

Acquired absence of body structure (QF00-QF0Z)

**QF00**

**Acquired absence of limb**

- Inclusions:** postoperative loss of limb  
post traumatic loss of limb
- Exclusions:** Other acquired deformities of limbs (FA31)  
Congenital absence of thigh or lower leg with foot present (LB9A.3)  
Congenital absence of both lower leg and foot (LB9A.7)  
Congenital absence of upper arm or forearm with hand present (LB99.4)

**QF01**

**Acquired absence of organs**

- Exclusions:** postoperative absence of endocrine glands (5D40-5D46)  
postoperative absence of spleen (3B81.1)

**QF01.0**

**Acquired absence of breast**

**Coded Elsewhere:** Traumatic amputation of breast (NB33.1)

**QF01.1**

**Acquired absence of genital organs**

**Coded Elsewhere:** Aetiological considerations associated with a medical condition, injury, or the effects of surgery or radiation treatment (HA40.0)

**QF01.10**

Acquired absence of female genital organs

**Coded Elsewhere:** Traumatic amputation of entire vulva (NB93.24)

- Traumatic amputation of part of vulva (NB93.25)  
Female Genital Mutilation (GC51)

**QF01.11**

Acquired absence of male genital organs

**Coded Elsewhere:** Traumatic amputation of entire penis (NB93.20)

- Traumatic amputation of part of penis (NB93.21)  
Traumatic amputation of entire testes or scrotum (NB93.22)  
Traumatic amputation of part of testes or scrotum (NB93.23)

**QF01.Y**

**Other specified acquired absence of organs**

**QF01.Z**

**Acquired absence of organs, unspecified**

<b>QF0Y</b>	<b>Other specified acquired absence of body structure</b>
<b>QF0Z</b>	<b>Acquired absence of body structure, unspecified</b>
<b>QF10</b>	<b>Limited function or disability of body organ or system</b>
<i>Exclusions:</i>	Difficulty or need for assistance with activities (QF20-QF2Z)

Difficulty or need for assistance with activities (QF20-QF2Z)

Identifies activities for which the person needs assistance or has such difficulty with, that it affects their need for health services or their treatment.

*Exclusions:* Dependence on enabling machines or devices (QB40-QB4Z)

**QF20** **Difficulty or need for assistance with learning**

**QF21** **Difficulty or need for assistance with general life tasks or life management**

*Inclusions:* difficulty with carrying out tasks and daily routine

**QF22** **Difficulty or need for assistance with communication**

**QF23** **Difficulty or need for assistance with mobility**

*Exclusions:* Abnormalities of gait and mobility (MB44)

**QF24** **Difficulty or need for assistance with self-care**

**QF25** **Difficulty or need for assistance with relationships**

**QF26** **Difficulty or need for assistance with household tasks**

**QF27** **Difficulty or need for assistance at home and no other household member able to render care**

**QF28** **Difficulty or need for assistance with work activities**

**QF29** **Difficulty or need for assistance with major areas of life**

**QF2A** **Difficulty or need for assistance with community participation**

**QF2B** **Need for continuous supervision**

*Exclusions:* Difficulty or need for assistance at home and no other household member able to render care (QF27)

**QF2Y** **Difficulty or need for assistance with other specified activity**

**QF2Z** **Difficulty or need for assistance with unspecified activity**

---

**QF4Y** **Other specified factors influencing health status or contact with health services**

**QF4Z**

**Factors influencing health status or contact with health services,  
unspecified**

# CHAPTER 25

---

## Codes for special purposes

This chapter has 17 four-character categories.

Code range starts with RA00

This chapter contains the following top level blocks:

- International provisional assignment of new diseases of uncertain aetiology and emergency use
- National provisional assignment of new diseases of uncertain aetiology

International provisional assignment of new diseases of uncertain aetiology and emergency use (RA00-RA09)

**RA00      Conditions of uncertain aetiology and emergency use**

**RA00.0      Vaping related disorder**

Disorder resulting from inhaling a vaporized solution (aerosol) which frequently contains flavourants, usually dissolved into Propylene Glycol or Glycerin, or both, and may or may not contain doses of nicotine, and other substances and additives with the use of electronic nicotine delivery systems (ENDS) or electronic non-nicotine delivery systems (ENNDS).

In the affected individual, infections as cause of the damage are unlikely or should have been excluded.

Relevant findings include proof of presence of pulmonary infiltrate, such as opacities, on plain film chest radiograph or ground-glass opacities on chest CT.

**RA01      COVID-19**

As definition may evolve, the URL for the Global surveillance document will be added as the short description

**RA01.0      COVID-19, virus identified**

**Coding Note:** Use this code when infection with the COVID-19 virus (SARS-CoV-2) has been confirmed by laboratory testing irrespective of severity of clinical signs or symptoms.

**Inclusions:**      Coronavirus disease 2019

COVID-19 NOS

**Exclusions:**      Coronavirus infection, unspecified site (1D92)

Middle East respiratory syndrome (1D64)

Severe acute respiratory syndrome (1D65)

<b>RA01.1</b>	<b>COVID-19, virus not identified</b>
<b>Coding Note:</b>	Use this code when COVID-19 is diagnosed clinically or epidemiologically but laboratory testing is inconclusive or not available.
	<b>Exclusions:</b>
	COVID-19, virus identified (RA01.0)
	Coronavirus infection, unspecified site (1D92)
	Special screening examination for other viral diseases (QA08.5)
	suspected but ruled out by negative laboratory results (QA02)
	confirmed by laboratory testing (RA01.0)

**RA02**

### **Post COVID-19 condition**

Post COVID-19 condition occurs in individuals with a history of probable or confirmed SARS CoV-2 infection, usually 3 months from the onset of COVID-19 with symptoms, and that last for at least 2 months and cannot be explained by an alternative diagnosis. Common symptoms include fatigue, shortness of breath, cognitive dysfunction but also others, and generally have an impact on everyday functioning. Symptoms may be new onset following initial recovery from an acute COVID-19 episode or persist from the initial illness. Symptoms may also fluctuate or relapse over time.

<b>Coding Note:</b>	This optional code serves to allow the establishment of a link with COVID-19. This code is not to be used in cases that still are presenting COVID-19.
---------------------	--

**RA03**

### **Multisystem inflammatory syndrome associated with COVID-19**

<b>Exclusions:</b>	Kawasaki syndrome (4A44.5)
	Mucocutaneous lymph node syndrome (4A44.5)

**RA04**

### **International emergency code 05**

**RA05**

### **International emergency code 06**

**RA26      National emergency code 07**

# CHAPTER 26

---

## Supplementary Chapter Traditional Medicine Conditions

This chapter has 468 four-character categories.

Code range starts with SA00

This chapter contains the following top level blocks:

- Module I

Module I (SA00-SJ1Z)

Traditional medicine disorders (TM1) (SA00-SE5Z)

Organ system disorders (TM1) (SA00-SB2Z)

Liver system disorders (TM1) (SA00-SA0Z)

**SA00 Hypochondrium pain disorder (TM1)**

**SA01 Jaundice disorder (TM1)**

*Inclusions:*      Acute jaundice  
                      Yang jaundice  
                      Yin jaundice

**SA02 Liver distension disorder (TM1)**

**SA03 Tympanites disorder (TM1)**

**SA04 Liver abscess disorder (TM1)**

**SA05 Gallbladder distension disorder (TM1)**

**SA0Y Other specified liver system disorders (TM1)**

**SA0Z Liver system disorders (TM1), unspecified**

## Heart system disorders (TM1) (SA10-SA4Z)

### Palpitation disorders (TM1) (SA10-SA1Z)

- SA10** **Inducible palpitation disorder (TM1)**  
*Inclusions:* Fright palpitation disorder (TM1)
- SA11** **Spontaneous palpitation disorder (TM1)**  
*Inclusions:* Fearful throbbing disorder (TM1)
- SA1Y** **Other specified palpitation disorders (TM1)**
- SA1Z** **Palpitation disorders (TM1), unspecified**

### Chest impediment disorders (TM1) (SA20-SA2Z)

- Inclusions:* Heart pain disorder (TM1)  
Chest impediment disorder (TM1)
- SA20** **True heart pain disorder (TM1)**
- SA2Y** **Other specified chest impediment disorders (TM1)**
- SA2Z** **Chest impediment disorders (TM1), unspecified**
- 
- SA4Y** **Other specified heart system disorders (TM1)**
- SA4Z** **Heart system disorders (TM1), unspecified**

### Spleen system disorders (TM1) (SA50-SA5Z)

- SA50** **Dysphagia disorder (TM1)**  
*Inclusions:* Choke disorder (TM1)
- SA51** **Stomach ache disorder (TM1)**
- SA52** **Epigastric distension disorder (TM1)**
- SA53** **Epigastric upset disorder (TM1)**
- SA54** **Food retention disorder (TM1)**
- SA55** **Diarrhea disorder (TM1)**
- SA56** **Dysentery disorder (TM1)**
- SA57** **Constipation disorder (TM1)**

- SA58**      **Abdominal pain disorder (TM1)**  
*Exclusions:*      Lower abdominal colic disorder (TM1)
- SA59**      **Intestinal abscess disorder (TM1)**
- SA5Y**      **Other specified spleen system disorders (TM1)**
- SA5Z**      **Spleen system disorders (TM1), unspecified**

Lung system disorders (TM1) (SA60-SA8Z)

- SA60**      **Common cold disorder (TM1)**  
*Exclusions:*      Seasonal cold disorder (TM1)

Cough disorders (TM1) (SA70-SA7Z)

- SA70**      **Cough with dyspnea disorder (TM1)**  
*Exclusions:*      Panting disorder (TM1)  
                        Dyspnea disorder (TM1)
- SA7Y**      **Other specified cough disorders (TM1)**
- SA7Z**      **Cough disorders (TM1), unspecified**
- SA80**      **Dyspnea disorder (TM1)**  
*Exclusions:*      Cough with dyspnea disorder (TM1)
- SA81**      **Wheezing disorder (TM1)**
- SA82**      **Lung distension disorder (TM1)**
- SA83**      **Pleural fluid retention disorder (TM1)**
- SA84**      **Lung heat disorder (TM1)**
- SA85**      **Lung withering disorder (TM1)**
- SA86**      **Chest bind disorder (TM1)**
- SA8Y**      **Other specified lung system disorders (TM1)**
- SA8Z**      **Lung system disorders (TM1), unspecified**

Kidney system disorders (TM1) (SA90-SB0Z)

- Strangury disorders (TM1) (SA90-SA9Z)
- SA90**      **Stony stranguria disorder (TM1)**

<b>SA91</b>	<b>Heat stranguria disorder (TM1)</b>
<b>SA9Y</b>	<b>Other specified strangury disorders (TM1)</b>
<b>SA9Z</b>	<b>Strangury disorders (TM1), unspecified</b>
<b>SB00</b>	<b>Kidney stagnation disorder (TM1)</b>
<b>SB01</b>	<b>Flooding urine disorder (TM1)</b>
<b>SB02</b>	<b>Enuresis disorder (TM1)</b>
<b>SB03</b>	<b>Turbid urine disorder (TM1)</b>
<b>SB04</b>	<b>Dribbling urinary block disorder (TM1)</b>
<b>SB05</b>	<b>Block and repulsion disorder (TM1)</b>
<b>SB06</b>	<b>Edema disorders (TM1)</b>
<b>SB06.0</b>	<b>Kidney edema disorder (TM1)</b>
<b>SB06.1</b>	<b>Wind edema disorder (TM1)</b>
<b>SB06.Y</b>	<b>Other specified edema disorders (TM1)</b>
<b>SB06.Z</b>	<b>Edema disorders (TM1), unspecified</b>
<b>SB07</b>	<b>Lower abdominal colic disorder (TM1)</b>
	<i>Inclusions:</i> Hernia (TM1)
	<i>Exclusions:</i> Abdominal pain disorder (TM1)
<b>SB08</b>	<b>Premature ejaculation disorder (TM1)</b>
<b>SB09</b>	<b>Involuntary ejaculation disorder (TM1)</b>
<b>SB0A</b>	<b>Persistent erection disorder (TM1)</b>
<b>SB0B</b>	<b>Impotence disorder (TM1)</b>
<b>SB0C</b>	<b>Male infertility disorder (TM1)</b>
<b>SB0Y</b>	<b>Other specified kidney system disorders (TM1)</b>
<b>SB0Z</b>	<b>Kidney system disorders (TM1), unspecified</b>
<hr/>	
<b>SB2Y</b>	<b>Other specified organ system disorders (TM1)</b>
<b>SB2Z</b>	<b>Organ system disorders (TM1), unspecified</b>

Other body system disorders (TM1) (SB30-SD6Z)

Skin and mucosa system disorders (TM1) (SB30-SB7Z)

**SB30**      **Dampness sore disorder (TM1)**

**SB31**      **Impetigo disorder (TM1)**

Furuncle disorders (TM1) (SB40-SB4Z)

**SB40**      **Septicemic furunculosis disorder (TM1)**

**SB4Y**      **Other specified furuncle disorders (TM1)**

**SB4Z**      **Furuncle disorders (TM1), unspecified**

**SB50**      **Bed sore disorder (TM1)**

Abscess disorders (TM1) (SB60-SB6Z)

**SB60**      **Deep multiple abscess disorder (TM1)**

**SB61**      **Anal abscess disorder (TM1)**

**SB6Y**      **Other specified abscess disorders (TM1)**

**SB6Z**      **Abscess disorders (TM1), unspecified**

**SB70**      **Headed carbuncle disorder (TM1)**

**SB71**      **Foot dampness itch disorder (TM1)**

**SB72**      **Tinea circinate disorder (TM1)**

**SB73**      **Dry skin disorder (TM1)**

**SB74**      **Gangrene disorder (TM1)**

**SB75**      **Wart disorder (TM1)**

**SB76**      **Hand dampness itch disorder (TM1)**

**SB77**      **Erysipelas disorder (TM1)**

**SB78**      **Cellulitis disorder (TM1)**

**SB79**      **Thrush disorder (TM1)**

**SB7A**      **Herpes zoster disorder (TM1)**

**SB7B**      **Interior haemorrhoid disorder (TM1)**

**SB7C**      **Fissured anus disorder (TM1)**

**SB7Y**      **Other specified skin and mucosa system disorders (TM1)**

**SB7Z**      **Skin and mucosa system disorders (TM1), unspecified**

Female reproductive system disorders (TM1) (including childbirth) (SB80-SC4Z)

Menstruation associated disorders (TM1) (SB80-SB9Z)

Menstruation cycle disorders (TM1) (SB80-SB8Z)

**SB80**      **Advanced menstruation disorder (TM1)**

**SB81**      **Delayed menstruation disorder (TM1)**

**SB82**      **Irregular menstruation disorders (TM1)**

**SB8Y**      **Other specified menstruation cycle disorders (TM1)**

**SB8Z**      **Menstruation cycle disorders (TM1), unspecified**

**SB90**      **Menorrhagia disorder (TM1)**

**SB91**      **Decreased menstruation disorder (TM1)**

**SB92**      **Prolonged menstruation disorder (TM1)**

**SB93**      **Metrorrhagia disorder (TM1)**

**SB94**      **Amenorrhea disorder (TM1)**

**SB95**      **Menopausal disorder (TM1)**

**SB96**      **Dysmenorrhea disorder (TM1)**

**SB9Y**      **Other specified menstruation associated disorders (TM1)**

**SB9Z**      **Menstruation associated disorders (TM1), unspecified**

Pregnancy associated disorders (TM1) (SC00-SC0Z)

**SC00**      **Morning sickness disorder (TM1)**

**SC01**      **Unstable fetus disorder (TM1)**

**SC02**      **Bladder pressure disorder (TM1)**

**Inclusions:**      Shifted colic disorder (TM1)  
                          Shifted bladder disorder (TM1)  
                          Bladder colic disorder (TM1)

**SC03**      **Eclampsia disorder (TM1)**

<b>SC04</b>	<b>Floating sensation pregnancy disorder (TM1)</b>
<b>SC0Y</b>	<b>Other specified pregnancy associated disorders (TM1)</b>
<b>SC0Z</b>	<b>Pregnancy associated disorders (TM1), unspecified</b>

Puerperium associated disorders (TM1) (SC10-SC1Z)

<b>SC10</b>	<b>Puerperal abdominal pain disorder (TM1)</b>
<b>SC11</b>	<b>Puerperal wind disorder (TM1)</b>
<b>SC12</b>	<b>Hypogalactia disorder (TM1)</b>
<b>SC13</b>	<b>Postpartum lochiorrhea disorder (TM1)</b>
<b>SC1Y</b>	<b>Other specified puerperium associated disorders (TM1)</b>
<b>SC1Z</b>	<b>Puerperium associated disorders (TM1), unspecified</b>

Other female reproductive system associated disorders (TM1) (SC20-SC2Z)

<b>SC20</b>	<b>Leukorrhea disorder (TM1)</b>
<b>SC21</b>	<b>Vaginal flatus disorder (TM1)</b>
<b>SC22</b>	<b>Infertility disorder (TM1)</b> <i>Inclusions:</i> Female sterility disorder (TM1) <i>Exclusions:</i> Male Infertility disorder (TM1)
<b>SC23</b>	<b>Uterine mass disorder (TM1)</b>
<b>SC24</b>	<b>Breast lump disorder (TM1)</b>
<b>SC2Y</b>	<b>Other specified other female reproductive system associated disorders (TM1)</b>
<b>SC2Z</b>	<b>Other female reproductive system associated disorders (TM1), unspecified</b>

---

<b>SC4Y</b>	<b>Other specified female reproductive system disorders (TM1) (including childbirth)</b>
<b>SC4Z</b>	<b>Female reproductive system disorders (TM1) (including childbirth), unspecified</b>

## Bone, joint and muscle system disorders (TM1) (SC50-SC6Z)

### Joint impediment disorders (TM1) (SC50-SC5Z)

<b>SC50</b>	<b>Cold impediment disorder (TM1)</b>
<b>SC51</b>	<b>Wind impediment disorder (TM1)</b>
<b>SC52</b>	<b>Dampness impediment disorder (TM1)</b>
<b>SC5Y</b>	<b>Other specified joint impediment disorders (TM1)</b>
<b>SC5Z</b>	<b>Joint impediment disorders (TM1), unspecified</b>
<b>SC60</b>	<b>Muscle spasm disorder (TM1)</b>
<b>SC61</b>	<b>Lumbago disorder (TM1)</b>
<b>SC62</b>	<b>Numbness disorder (TM1)</b>
<b>SC63</b>	<b>Wilting disorder (TM1)</b>
<b>SC6Y</b>	<b>Other specified bone, joint and muscle system disorders (TM1)</b>
<b>SC6Z</b>	<b>Bone, joint and muscle system disorders (TM1), unspecified</b>

### Eye, ear, nose and throat system disorders (TM1) (SC70-SC9Z)

<b>SC70</b>	<b>Night blindness disorder (TM1)</b>
<b>SC71</b>	<b>Wind glaucoma disorder (TM1)</b>
<b>SC72</b>	<b>Inflammatory eyelid disorder (TM1)</b>
<b>SC73</b>	<b>Non-inflammatory eyelid disorder (TM1)</b>
<b>SC74</b>	<b>Corneal opacity disorder (TM1)</b>
<b>SC75</b>	<b>Tinnitus disorder (TM1)</b>

*Exclusions:* Cerebral tinnitus disorder (TM1)

### Deafness disorders (TM1) (SC80-SC8Z)

<b>SC80</b>	<b>Sudden deafness disorder (TM1)</b>
<b>SC81</b>	<b>Gradual deafness disorder (TM1)</b>
<b>SC8Y</b>	<b>Other specified deafness disorders (TM1)</b>
<b>SC8Z</b>	<b>Deafness disorders (TM1), unspecified</b>
<b>SC90</b>	<b>Allergic rhinitis disorder (TM1)</b>

<b>SC91</b>	<b>Nasal sinusitis disorder (TM1)</b>
<b>SC92</b>	<b>Hoarseness disorder (TM1)</b>
<b>SC93</b>	<b>Tonsillitis disorder (TM1)</b>
<b>SC9Y</b>	<b>Other specified eye, ear, nose and throat system disorders (TM1)</b>
<b>SC9Z</b>	<b>Eye, ear, nose and throat system disorders (TM1), unspecified</b>

Brain system disorders (TM1) (SD00-SD4Z)

<b>SD00</b>	<b>Facial paralysis disorder (TM1)</b>
-------------	--

Headache disorders (TM1) (SD10-SD1Z)

<b>SD10</b>	<b>Migraine disorder (TM1)</b>
<b>SD11</b>	<b>Head wind disorder (TM1)</b>
<b>SD1Y</b>	<b>Other specified headache disorders (TM1)</b>
<b>SD1Z</b>	<b>Headache disorders (TM1), unspecified</b>
<b>SD20</b>	<b>Convulsion disorder (TM1)</b>
	<i>Inclusions:</i> Postpartum convulsion disorder (TM1)
<b>SD21</b>	<b>Cerebral tinnitus disorder (TM1)</b>
	<i>Exclusions:</i> Tinnitus disorder (TM1)
<b>SD22</b>	<b>Vertigo disorder (TM1)</b>
<b>SD23</b>	<b>Forgetfulness disorder (TM1)</b>
<b>SD24</b>	<b>Frequent protrusion of tongue disorder (TM1)</b>

Wind stroke disorders (TM1) (SD30-SD3Z)

<b>SD30</b>	<b>Prodrome of wind stroke disorder (TM1)</b>
	<i>Inclusions:</i> Onset of wind stroke (TM1)
	<i>Exclusions:</i> Sequela of wind stroke disorder (TM1)
<b>SD31</b>	<b>Sequela of wind stroke disorder (TM1)</b>
	<i>Exclusions:</i> Prodrome of wind stroke disorder (TM1)
<b>SD3Y</b>	<b>Other specified wind stroke disorders (TM1)</b>
<b>SD3Z</b>	<b>Wind stroke disorders (TM1), unspecified</b>

<b>SD40</b>	<b>Syncope disorder (TM1)</b>
	<i>Inclusions:</i>
	Qi syncope disorder (TM1)
	Blood syncope disorder (TM1)
	Phlegm syncope disorder (TM1)
	Hunger syncope disorder (TM1)
	Cold syncope disorder (TM1)
	<i>Exclusions:</i>
	wasting thirst related syncope disorder (TM1)
<b>SD4Y</b>	<b>Other specified brain system disorders (TM1)</b>
<b>SD4Z</b>	<b>Brain system disorders (TM1), unspecified</b>

---

<b>SD6Y</b>	<b>Other specified other body system disorders (TM1)</b>
<b>SD6Z</b>	<b>Other body system disorders (TM1), unspecified</b>

Qi, blood and fluid disorders (TM1) (SD70-SD7Z)

<b>SD70</b>	<b>Qi goiter disorder (TM1)</b>
<b>SD71</b>	<b>Wasting thirst disorder (TM1)</b>
<b>SD72</b>	<b>Consumptive disorder (TM1)</b>
<b>SD7Y</b>	<b>Other specified qi, blood and fluid disorders (TM1)</b>
<b>SD7Z</b>	<b>Qi, blood and fluid disorders (TM1), unspecified</b>

Mental and emotional disorders (TM1) (SD80-SD8Z)

<b>SD80</b>	<b>Lily disorder (TM1)</b>
	<i>Exclusions:</i>
	Hysteria disorder (TM1)
	Insomnia disorders (TM1)
<b>SD81</b>	<b>Manic disorder (TM1)</b>
<b>SD82</b>	<b>Depression disorder (TM1)</b>
	<i>Inclusions:</i>
	Postpartum depression disorder (TM1)
	Pregnancy depression disorder (TM1)
<b>SD83</b>	<b>Uneasiness disorder (TM1)</b>
	<i>Exclusions:</i>
	Depression disorder(TM1)
	Lily disorder(TM1)
<b>SD84</b>	<b>Insomnia disorder (TM1)</b>
<b>SD85</b>	<b>Somnolence disorder (TM1)</b>

<b>SD86</b>	<b>Dementia disorder (TM1)</b>
	<i>Inclusions:</i> Aged dementia disorders (TM1)
	<i>Exclusions:</i> Amnesia disorder (TM1)
<b>SD87</b>	<b>Repressed fire disorder (TM1)</b>
<b>SD8Y</b>	<b>Other specified mental and emotional disorders (TM1)</b>
<b>SD8Z</b>	<b>Mental and emotional disorders (TM1), unspecified</b>

External contraction disorders (TM1) (SD90-SE2Z)

<b>SD90</b>	<b>Seasonal cold disorder (TM1)</b>
	<i>Exclusions:</i> Common cold disorder (TM1)
<b>SD91</b>	<b>Fatigue consumption disorder (TM1)</b>
	<i>Exclusions:</i> Flowing phlegm disorder (TM1)
<b>SD92</b>	<b>Severe vomiting and diarrhoea disorder (TM1)</b>
	<i>Exclusions:</i> Diarrhea disorder (TM1)
	Cholera
<b>SD93</b>	<b>Alternating fever and chills disorder (TM1)</b>
	<i>Exclusions:</i> Malaria
<b>SD94</b>	<b>Parasitic disorder (TM1)</b>
<b>SD95</b>	<b>Flowing phlegm disorder (TM1)</b>
	<i>Inclusions:</i> Bone and joint tuberculosis disorder (TM1)

Warmth disorders (TM1) (SE00-SE0Z)

<b>SE00</b>	<b>Summer-heat disorder (TM1)</b>
<b>SE01</b>	<b>Spring warmth disorder (TM1)</b>
<b>SE02</b>	<b>Dampness and warmth disorder (TM1)</b>
<b>SE0Y</b>	<b>Other specified warmth disorders (TM1)</b>
<b>SE0Z</b>	<b>Warmth disorders (TM1), unspecified</b>
<b>SE2Y</b>	<b>Other specified external contraction disorders (TM1)</b>
<b>SE2Z</b>	<b>External contraction disorders (TM1), unspecified</b>

**Childhood and adolescence associated disorders (TM1) (SE30-SE3Z)**

<b>SE30</b>	<b>Developmental delay disorder (TM1)</b>
<b>SE31</b>	<b>Growth fever disorder (TM1)</b>
<b>SE32</b>	<b>Growth pain disorder (TM1)</b>
<b>SE33</b>	<b>Acute convulsion disorder (TM1)</b>
<b>SE34</b>	<b>Recurrent convulsion disorder (TM1)</b>
<b>SE35</b>	<b>Fright seizure disorder (TM1)</b>
<b>SE36</b>	<b>Night crying disorder (TM1)</b>
<b>SE37</b>	<b>Infantile malnutrition disorder (TM1)</b>
<b>SE38</b>	<b>Dribbling disorder (TM1)</b>
<b>SE39</b>	<b>Diaper dermatitis disorder (TM1)</b>
<b>SE3A</b>	<b>Infant stiffness disorder (TM1)</b>
<b>SE3B</b>	<b>Infant limpness disorder (TM1)</b>
<b>SE3Y</b>	<b>Other specified childhood and adolescence associated disorders (TM1)</b>
<b>SE3Z</b>	<b>Childhood and adolescence associated disorders (TM1), unspecified</b>

---

<b>SE5Y</b>	<b>Other specified traditional medicine disorders (TM1)</b>
<b>SE5Z</b>	<b>Traditional medicine disorders (TM1), unspecified</b>

**Traditional medicine patterns (TM1) (SE70-SJ1Z)**

**Principle-based patterns (TM1) (SE70-SE7Z)**

<b>SE70</b>	<b>Yang pattern (TM1)</b>
<b>SE71</b>	<b>Yin pattern (TM1)</b>
<b>SE72</b>	<b>Heat pattern (TM1)</b>
<b>SE73</b>	<b>Cold pattern (TM1)</b>
<b>SE74</b>	<b>Excess pattern (TM1)</b>
<b>SE75</b>	<b>Deficiency pattern (TM1)</b>
<b>SE76</b>	<b>Exterior pattern (TM1)</b>

<b>SE77</b>	<b>Interior pattern (TM1)</b>
<b>SE78</b>	<b>Moderate (Heat/Cold) pattern (TM1)</b>
<b>SE79</b>	<b>Medium (Excess/Deficiency) pattern (TM1)</b>
<b>SE7A</b>	<b>Tangled cold and heat pattern (TM1)</b>
<b>SE7Y</b>	<b>Other specified principle-based patterns (TM1)</b>
<b>SE7Z</b>	<b>Principle-based patterns (TM1), unspecified</b>

Environmental factor patterns (TM1) (SE80-SE8Z)

<b>SE80</b>	<b>Wind factor pattern (TM1)</b>
<b>SE81</b>	<b>Cold factor pattern (TM1)</b>
<b>SE82</b>	<b>Dampness factor pattern (TM1)</b>
<b>SE83</b>	<b>Dryness factor pattern (TM1)</b>
<b>SE84</b>	<b>Fire-heat factor pattern (TM1)</b>
<b>SE85</b>	<b>Summer-heat factor pattern (TM1)</b>
<b>SE86</b>	<b>Pestilent factor pattern (TM1)</b>
<b>SE8Y</b>	<b>Other specified environmental factor patterns (TM1)</b>
<b>SE8Z</b>	<b>Environmental factor patterns (TM1), unspecified</b>

Body constituents patterns (TM1) (SE90-SF4Z)

Qi patterns (TM1) (SE90-SE9Z)

*Exclusions:* Qi phase patterns (TM1)

<b>SE90</b>	<b>Qi deficiency pattern (TM1)</b>
-------------	------------------------------------

*Inclusions:* Qi decrease pattern (TM1)

<b>SE91</b>	<b>Qi stagnation pattern (TM1)</b>
<b>SE92</b>	<b>Qi uprising pattern (TM1)</b>
<b>SE93</b>	<b>Qi sinking pattern (TM1)</b>
<b>SE94</b>	<b>Qi collapse pattern (TM1)</b>
<b>SE9Y</b>	<b>Other specified qi patterns (TM1)</b>
<b>SE9Z</b>	<b>Qi patterns (TM1), unspecified</b>

## Blood patterns (TM1) (SF00-SF0Z)

<b>SF00</b>	<b>Blood deficiency pattern (TM1)</b>
	<i>Inclusions:</i> Blood decrease patterns (TM1)
<b>SF01</b>	<b>Blood stasis pattern (TM1)</b>
<b>SF02</b>	<b>Blood heat pattern (TM1)</b>
	<i>Exclusions:</i> Blood cold pattern (TM)
<b>SF03</b>	<b>Blood cold pattern (TM1)</b>
	<i>Exclusions:</i> Qi patterns (TM1)
	Blood heat pattern (TM1)
<b>SF04</b>	<b>Blood dryness pattern (TM1)</b>
	<i>Exclusions:</i> Qi patterns (TM1)
	Blood heat pattern (TM1)
<b>SF0Y</b>	<b>Other specified blood patterns (TM1)</b>
<b>SF0Z</b>	<b>Blood patterns (TM1), unspecified</b>

## Fluid patterns (TM1) (SF10-SF1Z)

<b>SF10</b>	<b>Fluid deficiency pattern (TM1)</b>
	<i>Exclusions:</i> Essence deficiency pattern (TM1)
<b>SF11</b>	<b>Fluid disturbance pattern (TM1)</b>
	<i>Inclusions:</i> Fluid retention pattern (TM1)
<b>SF12</b>	<b>Dry-phlegm pattern (TM1)</b>
<b>SF13</b>	<b>Damp phlegm pattern (TM1)</b>
<b>SF14</b>	<b>Phlegm-fire harassing the heart system pattern (TM1)</b>
<b>SF15</b>	<b>Wind-phlegm pattern (TM1)</b>
<b>SF1Y</b>	<b>Other specified fluid patterns (TM1)</b>
<b>SF1Z</b>	<b>Fluid patterns (TM1), unspecified</b>

## Essence patterns (TM1) (SF20-SF2Z)

<b>SF20</b>	<b>Essence deficiency pattern (TM1)</b>
<b>SF2Y</b>	<b>Other specified essence patterns (TM1)</b>

**SF2Z**      **Essence patterns (TM1), unspecified**

---

**SF4Y**      **Other specified body constituents patterns (TM1)**

**SF4Z**      **Body constituents patterns (TM1), unspecified**

Organ system patterns (TM1) (SF50-SG1Z)

Liver system patterns (TM1) (SF50-SF5Z)

**SF50**      **Liver yin deficiency pattern (TM1)**

**SF51**      **Liver yang deficiency pattern (TM1)**

**SF52**      **Liver yang ascendant hyperactivity pattern (TM1)**

**SF53**      **Liver qi deficiency pattern (TM1)**

**SF54**      **Liver blood deficiency pattern (TM1)**

**SF55**      **Liver depression and blood stasis pattern (TM1)**

**SF56**      **Liver wind stirring the interior pattern (TM1)**

**SF57**      **Liver qi stagnation pattern (TM1)**

**SF58**      **Liver fire flaming upward pattern (TM1)**

**SF59**      **Liver heat stirring wind pattern (TM1)**

**SF5A**      **Liver-gallbladder dampness-heat pattern (TM1)**

**SF5B**      **Liver meridian dampness-heat pattern (TM1)**

**SF5C**      **Liver meridian cold stagnation pattern (TM1)**

**SF5D**      **Gallbladder qi deficiency pattern (TM1)**

**SF5E**      **Gallbladder depression with phlegm harassment pattern (TM1)**

**SF5F**      **Gallbladder heat pattern (TM1)**

**SF5G**      **Gallbladder cold pattern (TM1)**

**SF5H**      **Liver and kidney yin deficiency pattern (TM1)**

**SF5J**      **Disharmony of liver and spleen systems pattern (TM1)**

**SF5K**      **Disharmony of liver and stomach systems pattern (TM1)**

**SF5L**      **Liver fire invading the stomach system pattern (TM1)**

**SF5M**      **Liver fire invading the lung system pattern (TM1)**

**SF5Y** Other specified liver system patterns (TM1)

**SF5Z** Liver system patterns (TM1), unspecified

Heart system patterns (TM1) (SF60-SF6Z)

**SF60** Heart qi deficiency pattern (TM1)

**SF61** Heart blood deficiency pattern (TM1)

**SF62** Dual deficiency of heart qi and blood pattern (TM1)

**SF63** Heart meridian obstruction pattern (TM1)

**SF64** Heart yin deficiency pattern (TM1)

**SF65** Deficiency of heart qi and yin pattern (TM1)

**SF66** Heart yang deficiency pattern (TM1)

**SF67** Heart yang collapse pattern (TM1)

**SF68** Heart fire flaming upward pattern (TM1)

**SF69** Fire harassing heart spirit pattern (TM1)

**SF6A** Water qi intimidating the heart system pattern (TM1)

**SF6B** Heart spirit restlessness pattern (TM1)

**SF6C** Anxiety damaging the spirit pattern (TM1)

**SF6D** Small intestine qi stagnation pattern (TM1)

**SF6E** Small intestine excess heat pattern (TM1)

**SF6F** Small intestine deficiency cold pattern (TM1)

**SF6G** Heart and liver blood deficiency pattern (TM1)

**SF6H** Heart and gallbladder qi deficiency pattern (TM1)

**SF6J** Heart and spleen systems deficiency pattern (TM1)

**SF6K** Heart and lung qi deficiency pattern (TM1)

**SF6L** Heart and kidney systems disharmony pattern (TM1)

**SF6M** Heart and kidney yang deficiency pattern (TM1)

**SF6Y** Other specified heart system patterns (TM1)

**SF6Z** Heart system patterns (TM1), unspecified

## Spleen system patterns (TM1) (SF70-SF7Z)

<b>SF70</b>	<b>Spleen qi deficiency pattern (TM1)</b>
<b>SF71</b>	<b>Spleen qi sinking pattern (TM1)</b>
<b>SF72</b>	<b>Spleen deficiency with qi stagnation pattern (TM1)</b>
<b>SF73</b>	<b>Spleen deficiency with food retention pattern (TM1)</b>
<b>SF74</b>	<b>Spleen failing to control the blood pattern (TM1)</b>
<b>SF75</b>	<b>Spleen deficiency and blood depletion pattern (TM1)</b>
<b>SF76</b>	<b>Spleen yin deficiency pattern (TM1)</b>
<b>SF77</b>	<b>Spleen yang deficiency pattern (TM1)</b>
<b>SF78</b>	<b>Dampness-heat encumbering the spleen system pattern (TM1)</b>
<b>SF79</b>	<b>Spleen deficiency with dampness accumulation pattern (TM1)</b>
<b>SF7A</b>	<b>Spleen deficiency with water flooding pattern (TM1)</b>
<b>SF7B</b>	<b>Cold-dampness encumbering the spleen system pattern (TM1)</b>
<b>SF7C</b>	<b>Stomach qi deficiency pattern (TM1)</b>
<b>SF7D</b>	<b>Stomach qi uprising pattern (TM1)</b>
<b>SF7E</b>	<b>Stomach yin deficiency pattern (TM1)</b> <i>Inclusions:</i> Stomach deficiency and heat pattern (TM1)
<b>SF7F</b>	<b>Stomach heat pattern (TM1)</b>
<b>SF7G</b>	<b>Dampness in the intestines pattern (TM1)</b>
<b>SF7H</b>	<b>Cold invading the stomach system pattern (TM1)</b>
<b>SF7J</b>	<b>Intestine cold stagnation pattern (TM1)</b>
<b>SF7K</b>	<b>Anxiety damaging the spleen system pattern (TM1)</b>
<b>SF7L</b>	<b>Lung and spleen deficiency pattern (TM1)</b>
<b>SF7M</b>	<b>Spleen and kidney yang deficiency pattern (TM1)</b>
<b>SF7Y</b>	<b>Other specified spleen system patterns (TM1)</b>
<b>SF7Z</b>	<b>Spleen system patterns (TM1), unspecified</b>

## Lung system patterns (TM1) (SF80-SF8Z)

<b>SF80</b>	<b>Lung qi deficiency pattern (TM1)</b>
-------------	---

<b>SF81</b>	<b>Lung yin deficiency pattern (TM1)</b>
<b>SF82</b>	<b>Lung and kidney yin deficiency pattern (TM1)</b>
<b>SF83</b>	<b>Lung qi and yin deficiency pattern (TM1)</b>
<b>SF84</b>	<b>Lung yang deficiency pattern (TM1)</b>
<b>SF85</b>	<b>Cold phlegm obstructing the lung pattern (TM1)</b>
<b>SF86</b>	<b>Turbid phlegm accumulation in the lung pattern (TM1)</b>
<b>SF87</b>	<b>Exterior cold with lung heat pattern (TM1)</b>
<b>SF88</b>	<b>Intense congestion of lung heat pattern (TM1)</b>
<b>SF89</b>	<b>Phlegm heat obstructing the lung pattern (TM1)</b>
<b>SF8A</b>	<b>Wind-heat invading the lung pattern (TM1)</b>
<b>SF8B</b>	<b>Lung heat transmitting into the intestine pattern (TM1)</b>
<b>SF8C</b>	<b>Wind-cold fettering the lung pattern (TM1)</b>
<b>SF8D</b>	<b>Dryness invading the lung pattern (TM1)</b>
<b>SF8E</b>	<b>Lung dryness with intestinal obstruction pattern (TM1)</b>
<b>SF8F</b>	<b>Large intestine excess heat pattern (TM1)</b>
<b>SF8G</b>	<b>Large intestine dampness heat pattern (TM1)</b>
<b>SF8H</b>	<b>Large intestine fluid deficiency pattern (TM1)</b>
<b>SF8J</b>	<b>Large intestine deficiency cold pattern (TM1)</b>
<b>SF8Y</b>	<b>Other specified lung system patterns (TM1)</b>
<b>SF8Z</b>	<b>Lung system patterns (TM1), unspecified</b>

### Kidney system patterns (TM1) (SF90-SF9Z)

<b>SF90</b>	<b>Kidney qi deficiency pattern (TM1)</b>
	<i>Inclusions:</i> Kidney qi depletion pattern (TM1)
<b>SF91</b>	<b>Kidney failing to receive qi pattern (TM1)</b>
<b>SF92</b>	<b>Kidney qi deficiency with water retention pattern (TM1)</b>
<b>SF93</b>	<b>Kidney yin deficiency pattern (TM1)</b>
<b>SF94</b>	<b>Kidney yin and yang deficiency pattern (TM1)</b>
<b>SF95</b>	<b>Kidney deficiency with marrow depletion pattern (TM1)</b>

<b>SF96</b>	<b>Kidney essence deficiency pattern (TM1)</b>
<b>SF97</b>	<b>Kidney yang deficiency pattern (TM1)</b>
	<i>Inclusions:</i> Life-gate fire depletion pattern (TM1) Primordial yang deficiency pattern (TM1)
<b>SF98</b>	<b>Fear damaging the kidney system pattern (TM1)</b>
<b>SF99</b>	<b>Blood and heat accumulation in the uterus pattern (TM1)</b>
<b>SF9A</b>	<b>Phlegm obstructing the uterus pattern (TM1)</b>
<b>SF9B</b>	<b>Dampness-heat in the uterus pattern (TM1)</b>
<b>SF9C</b>	<b>Cold stagnation in the uterus pattern (TM1)</b>
<b>SF9D</b>	<b>Uterine deficiency cold pattern (TM1)</b>
<b>SF9E</b>	<b>Blood accumulation in the bladder pattern (TM1)</b>
<b>SF9F</b>	<b>Bladder heat accumulation pattern (TM1)</b>
<b>SF9G</b>	<b>Bladder dampness-heat pattern (TM1)</b>
<b>SF9H</b>	<b>Bladder water accumulation pattern (TM1)</b>
<b>SF9J</b>	<b>Bladder deficiency cold pattern (TM1)</b>
<b>SF9Y</b>	<b>Other specified kidney system patterns (TM1)</b>
<b>SF9Z</b>	<b>Kidney system patterns (TM1), unspecified</b>

---

<b>SG1Y</b>	<b>Other specified organ system patterns (TM1)</b>
<b>SG1Z</b>	<b>Organ system patterns (TM1), unspecified</b>

Meridian and collateral patterns (TM1) (SG20-SG5Z)

Main Meridian Patterns (TM1) (SG20-SG2Z)

<b>SG20</b>	<b>Lung meridian pattern (TM1)</b>
<b>SG21</b>	<b>Large intestine meridian pattern (TM1)</b>
<b>SG22</b>	<b>Stomach meridian pattern (TM1)</b>
<b>SG23</b>	<b>Spleen meridian pattern (TM1)</b>
<b>SG24</b>	<b>Heart meridian pattern (TM1)</b>
<b>SG25</b>	<b>Small intestine meridian pattern (TM1)</b>

<b>SG26</b>	<b>Bladder meridian pattern (TM1)</b>
<b>SG27</b>	<b>Kidney meridian pattern (TM1)</b>
<b>SG28</b>	<b>Pericardium meridian pattern (TM1)</b>
<b>SG29</b>	<b>Triple energizer meridian pattern (TM1)</b>
<b>SG2A</b>	<b>Gallbladder meridian pattern (TM1)</b>
<b>SG2B</b>	<b>Liver meridian pattern (TM1)</b>
<b>SG2Y</b>	<b>Other specified main Meridian Patterns (TM1)</b>
<b>SG2Z</b>	<b>Main Meridian Patterns (TM1), unspecified</b>

#### Extra Meridian Patterns (TM1) (SG30-SG3Z)

<b>SG30</b>	<b>Governor vessel pattern (TM1)</b>
<b>SG31</b>	<b>Conception vessel pattern (TM1)</b>
<b>SG32</b>	<b>Yin heel vessel pattern (TM1)</b>
<b>SG33</b>	<b>Yang heel vessel pattern (TM1)</b>
<b>SG34</b>	<b>Yin link vessel pattern (TM1)</b>
<b>SG35</b>	<b>Yang link vessel pattern (TM1)</b>
<b>SG36</b>	<b>Thoroughfare vessel pattern (TM1)</b>
<b>SG37</b>	<b>Belt vessel pattern (TM1)</b>
<b>SG3Y</b>	<b>Other specified extra Meridian Patterns (TM1)</b>
<b>SG3Z</b>	<b>Extra Meridian Patterns (TM1), unspecified</b>

---

<b>SG5Y</b>	<b>Other specified meridian and collateral patterns (TM1)</b>
<b>SG5Z</b>	<b>Meridian and collateral patterns (TM1), unspecified</b>

#### Six stage patterns (TM1) (SG60-SG6Z)

<b>SG60</b>	<b>Early yang stage pattern (TM1)</b>
<b>SG61</b>	<b>Middle yang stage pattern (TM1)</b>
<b>SG62</b>	<b>Late yang stage pattern (TM1)</b>
<b>SG63</b>	<b>Early yin stage pattern (TM1)</b>
<b>SG64</b>	<b>Middle yin stage pattern (TM1)</b>

<b>SG65</b>	<b>Late yin stage pattern (TM1)</b>
<b>SG6Y</b>	<b>Other specified six stage patterns (TM1)</b>
<b>SG6Z</b>	<b>Six stage patterns (TM1), unspecified</b>

Triple energizer stage patterns (TM1) (SG70-SG7Z)

<b>SG70</b>	<b>Upper energizer stage patterns (TM1)</b>
<b>SG71</b>	<b>Middle energizer stage patterns (TM1)</b>
<b>SG72</b>	<b>Lower energizer stage patterns (TM1)</b>
<b>SG7Y</b>	<b>Other specified triple energizer stage patterns (TM1)</b>
<b>SG7Z</b>	<b>Triple energizer stage patterns (TM1), unspecified</b>

Four phase patterns (TM1) (SG80-SH3Z)

Defense phase patterns (TM1) (SG80-SG8Z)

<b>SG80</b>	<b>Dampness obstructing the defense yang pattern (TM1)</b>
<b>SG81</b>	<b>Heat attacking the lung defense pattern (TM1)</b>
<b>SG8Y</b>	<b>Other specified defense phase patterns (TM1)</b>
<b>SG8Z</b>	<b>Defense phase patterns (TM1), unspecified</b>

Qi phase patterns (TM1) (SG90-SG9Z)

<b>SG90</b>	<b>Heat entering the qi phase pattern (TM1)</b>
<b>SG91</b>	<b>Qi phase dampness and heat pattern (TM1)</b>
<b>SG92</b>	<b>Dampness obstructing the qi phase pattern (TM1)</b>
<b>SG9Y</b>	<b>Other specified qi phase patterns (TM1)</b>
<b>SG9Z</b>	<b>Qi phase patterns (TM1), unspecified</b>

Nutrient phase patterns (TM1) (SH00-SH0Z)

<b>SH00</b>	<b>Nutrient qi and defense qi disharmony pattern (TM1)</b>
<b>SH01</b>	<b>Heat in the nutrient phase pattern(TM1)</b>
<b>SH02</b>	<b>Heat entering the nutrient and blood phase pattern (TM1)</b>

**SH0Y** Other specified nutrient phase patterns (TM1)

**SH0Z** Nutrient phase patterns (TM1), unspecified

Blood phase patterns (TM1) (SH10-SH1Z)

**SH10** Blood phase pattern (TM1)

**SH11** Heat entering the blood phase pattern(TM1)

**SH1Y** Other specified blood phase patterns (TM1)

**SH1Z** Blood phase patterns (TM1), unspecified

---

**SH3Y** Other specified four phase patterns (TM1)

**SH3Z** Four phase patterns (TM1), unspecified

Four constitution medicine patterns (TM1) (SH40-SH9Z)

Large yang type patterns (TM1) (SH40-SH4Z)

**SH40** Large yang type exterior origin lower back pattern (TM1)

**SH41** Large yang type interior origin small intestine pattern (TM1)

**SH42** Large yang type exterior interior combined pattern (TM1)

**SH4Y** Other specified large yang type patterns (TM1)

**SH4Z** Large yang type patterns (TM1), unspecified

Small yang type patterns (TM1) (SH50-SH5Z)

**SH50** Small yang type lesser yang wind damage pattern (TM1)

**SH51** Small yang type yin depletion pattern (TM1)

**SH52** Small yang type chest heat congested pattern (TM1)

**SH53** Small yang type yin deficit pattern (TM1)

**SH54** Small yang type exterior interior combined pattern (TM1)

**SH5Y** Other specified small yang type patterns (TM1)

**SH5Z** Small yang type patterns (TM1), unspecified

**Large yin type patterns (TM1) (SH60-SH6Z)**

<b>SH60</b>	<b>Large yin type supraspinal exterior pattern (TM1)</b>
<b>SH61</b>	<b>Large yin type esophagus cold pattern (TM1)</b>
<b>SH62</b>	<b>Large yin type liver heat pattern (TM1)</b>
<b>SH63</b>	<b>Large yin type dryness heat pattern (TM1)</b>
<b>SH64</b>	<b>Large yin type exterior Interior combined pattern (TM1)</b>
<b>SH6Y</b>	<b>Other specified large yin type patterns (TM1)</b>
<b>SH6Z</b>	<b>Large yin type patterns (TM1), unspecified</b>

**Small yin type patterns(TM1) (SH70-SH7Z)**

<b>SH70</b>	<b>Small yin type congestive hyperpsychotic pattern (TM1)</b>
<b>SH71</b>	<b>Small yin type yang depletion pattern (TM1)</b>
<b>SH72</b>	<b>Small yin type greater yin pattern (TM1)</b>
<b>SH73</b>	<b>Small yin type lesser yin pattern (TM1)</b>
<b>SH74</b>	<b>Small yin type exterior interior combined pattern (TM1)</b>
<b>SH7Y</b>	<b>Other specified small yin type patterns(TM1)</b>
<b>SH7Z</b>	<b>Small yin type patterns(TM1), unspecified</b>

---

<b>SH9Y</b>	<b>Other specified four constitution medicine patterns (TM1)</b>
<b>SH9Z</b>	<b>Four constitution medicine patterns (TM1), unspecified</b>

---

<b>SJ1Y</b>	<b>Other specified traditional medicine patterns (TM1)</b>
<b>SJ1Z</b>	<b>Traditional medicine patterns (TM1), unspecified</b>

# **CHAPTER V**

---

## **Supplementary section for functioning assessment**

This chapter has 120 four-character categories.

Code range starts with VD00

The section allows for creating functioning profiles and overall functioning scores of individuals, which are suitable to describe and quantify the level of functioning associated with a health condition.

To guide functioning assessment, the section includes two ICF-based instruments developed by WHO: the WHO Disability Assessment Schedule (WHODAS 2.0 36-item version), and the Model Disability Survey (MDS).

The section is complemented by a generic set of functioning categories of high explanatory power derived from the ICF Annex 9.

This chapter contains the following top level blocks:

- WHODAS 2.0 36-item version
- Brief Model Disability Survey
- Generic functioning domains

### **WHODAS 2.0 36-item version**

This subsection includes the domains and questions for use with the WHO Disability Assessment Schedule 2.0 (WHODAS 2.0) 36 item version. The WHODAS 2.0 captures an individual's level of functioning in six major life domains of the "activity and participation" dimension: cognition, mobility, self-care, getting along, life activities and participation in society. For all domains, the WHODAS 2.0 36-item version provides domain-specific and overall summary score of functioning. The table below provides the classification of severity of the functioning problem, based on the response received to the question related to the relevant functioning category. For coding, the relevant additional digit is added after the decimal point to the code of the relevant functioning category.

<b>additional digit</b>	<b>Level of functioning problem</b>
-------------------------	-------------------------------------

.0	None (no problem)
.1	Mild
.2	Moderate
.3	Severe
.4	Extreme or cannot do

## Cognition [WHODAS]

**VD00**

### **Attention functions [WHODAS]**

Because of your health condition, in the past 30 days, how much difficulty did you have in concentrating on doing something for ten minutes?

**VD01**

### **Memory functions [WHODAS]**

Because of your health condition, in the past 30 days, how much difficulty did you have in remembering to do important things?

**VD02**

### **Solving problems [WHODAS]**

Because of your health condition, in the past 30 days, how much difficulty did you have in analysing and finding solutions to problems in day to day life?

**VD03**

### **Basic learning [WHODAS]**

Because of your health condition, in the past 30 days, how much difficulty did you have in learning a new task, for example, learning how to get a new place?

**VD04**

### **Communicating with - receiving - spoken messages [WHODAS]**

Because of your health condition, in the past 30 days, how much difficulty did you have in generally understanding what people say?

**VD05**

### **Conversation [WHODAS]**

Because of your health condition, in the past 30 days, how much difficulty did you have in starting and maintaining a conversation?

## Mobility [WHODAS]

**VD10**

### **Maintaining a standing position [WHODAS]**

Because of your health condition, in the past 30 days, how much difficulty did you have in standing for long periods such as 30 minutes?

**VD11**

### **Changing body position - standing [WHODAS]**

Because of your health condition, in the past 30 days, how much difficulty did you have in standing up from sitting down?

**VD12**

### **Moving around within the home [WHODAS]**

Because of your health condition, in the past 30 days, how much difficulty did you have in moving around inside your home?

**VD13**

### **Moving around outside the home and other buildings [WHODAS]**

Because of your health condition, in the past 30 days, how much difficulty did you have in getting out of your home?

**VD14**

**Walking [WHODAS]**

Because of your health condition, in the past 30 days, how much difficulty did you have in walking a long distance such as a kilometre (or equivalent)?

Self-care [WHODAS]

**VD20**

**Washing oneself [WHODAS]**

Because of your health condition, in the past 30 days, how much difficulty did you have in washing your whole body?

**VD21**

**Dressing [WHODAS]**

Because of your health condition, in the past 30 days, how much difficulty did you have in getting dressed?

**VD22**

**Eating [WHODAS]**

Because of your health condition, in the past 30 days, how much difficulty did you have in eating?

**VD23**

**Carrying out daily routine [WHODAS]**

Because of your health condition, in the past 30 days, how much difficulty did you have in staying by yourself for a few days?

Getting along [WHODAS]

**VD30**

**Relating with strangers [WHODAS]**

Because of your health condition, in the past 30 days, how much difficulty did you have in dealing with people you do not know?

**VD31**

**Informal relationship with friends - maintaining [WHODAS]**

Because of your health condition, in the past 30 days, how much difficulty did you have in maintaining a friendship?

**VD32**

**Family relationships [WHODAS]**

Because of your health condition, in the past 30 days, how much difficulty did you have in getting along with people who are close to you?

**VD33**

**Informal relationship with friends - making new friends [WHODAS]**

Because of your health condition, in the past 30 days, how much difficulty did you have in making new friends?

**VD34**

**Intimate relationships [WHODAS]**

Because of your health condition, in the past 30 days, how much difficulty did you have in sexual activities?

Life activities [WHODAS]

- VD40** **Taking care of household responsibilities [WHODAS]**  
Because of your health condition, in the past 30 days, how much difficulty did you have in taking care of your household responsibilities?
- VD41** **Doing most important household tasks [WHODAS]**  
Because of your health condition, in the past 30 days, how much difficulty did you have in doing most important household tasks well?
- VD42** **Doing housework [WHODAS]**
- VD42.0** **Getting all needed housework done [WHODAS]**  
Because of your health condition, in the past 30 days, how much difficulty did you have in getting all the household work done that you need to do?
- VD42.1** **Getting household work done quickly [WHODAS]**  
Because of your health condition, in the past 30 days, how much difficulty did you have in getting your household work done as quickly as needed?
- VD42.Y** **Other specified doing housework [WHODAS]**
- VD42.Z** **Doing housework [WHODAS], unspecified**
- VD43** **Remunerative employment [WHODAS]**
- VD43.0** **Difficulties in daily work or school [WHODAS]**  
Because of your health condition, in the past 30 days, how much difficulty did you have in your day to day work/school?
- VD43.1** **Doing most important work or school task [WHODAS]**  
Because of your health condition, in the past 30 days, how much difficulty did you have in doing your most important work/school tasks well?
- VD43.2** **Getting all needed work or school work done [WHODAS]**  
Because of your health condition, in the past 30 days, how much difficulty did you have in getting all the work done that you need to do?
- VD43.3** **Getting remunerative work or school work done quickly [WHODAS]**  
Because of your health condition, in the past 30 days, how much difficulty did you have in getting your work done as quickly as needed?
- VD43.Y** **Other specified remunerative employment [WHODAS]**
- VD43.Z** **Remunerative employment [WHODAS], unspecified**

Participation and impact of health problems [WHODAS]

**VD50**

**Recreation and leisure [WHODAS]**

In the past 30 days, how much of a problem did you have in joining in community activities (for example: festivities, religious or other activities) in the same way as anyone else can?

**VD51**

**Problems by barriers [WHODAS]**

In the past 30 days, how much of a problem did you have because of barriers or hindrances in the world around you?

**VD52**

**Human rights [WHODAS]**

In the past 30 days, how much of a problem did you have living with dignity because of the attitudes and actions of others?

**VD53**

**Time spent on health condition [WHODAS]**

In the past 30 days, how much time did you spend on your health condition, or its consequences?

**VD54**

**Emotional effect of health condition [WHODAS]**

In the past 30 days, how much have you been emotionally affected by your health condition?

**VD55**

**Health drain on financial resources [WHODAS]**

In the past 30 days, how much has your health been a drain on the financial resources of you or your family?

**VD56**

**Health problems causing family problems [WHODAS]**

In the past 30 days, how much of a problem did your family have because of your health problems?

**VD57**

**Problems in relaxation or pleasure [WHODAS]**

In the past 30 days, how much of a problem did you have in doing things by yourself for relaxation or pleasure?

## Brief Model Disability Survey

This subsection includes the domains and questions for use with the WHO Model Disability Survey (MDS) brief version. The brief MDS includes body functions as well as activities and participation categories. The brief MDS allows to generate an overall summary score of functioning.

**VE00**

**Seeing and related functions [BMDS]**

How much difficulty do you have seeing things at a distance [without glasses]?

**VE01**

**Hearing and vestibular functions [BMDS]**

How much difficulty do you have hearing [without hearing aids]?

Mental functions [BMDS]

- VE10      Energy and drive functions [BMDS]**
- VE11      Sleep functions [BMDS]**
- VE12      Emotional functions [BMDS]**
- VE13      Attention functions [BMDS]**
- VE14      Memory functions [BMDS]**

Sensory functions and pain [BMDS]

- VE20      Sensation of pain [BMDS]**

## Generic functioning domains

This subsection contains a generic set of functioning categories of high explanatory power derived from the ICF Annex 9.

Mental functions

This chapter is about the functions of the brain: both global mental functions, such as consciousness, energy and drive, and specific mental functions, such as memory, language and calculation mental functions.

- VV00      Energy and drive functions**

General mental functions of physiological and psychological mechanisms that cause the individual to move towards satisfying specific needs and general goals in a persistent manner.

**Exclusions:**      Consciousness functions (VV00-VV0Z)  
                          Emotional functions (VV04)  
                          Psychomotor functions (VV00-VV0Z)  
                          Sleep functions (VV01)  
                          Temperament and personality functions (VV00-VV0Z)

- VV01      Sleep functions**

General mental functions of periodic, reversible and selective physical and mental disengagement from one's immediate environment accompanied by characteristic physiological changes.

**Exclusions:**      Attention functions (VV02)  
                          Consciousness functions (VV00-VV0Z)  
                          Energy and drive functions (VV00)  
                          Psychomotor functions (VV00-VV0Z)

VV02

### Attention functions

Specific mental functions of focusing on an external stimulus or internal experience for the required period of time.

**Exclusions:** Consciousness functions (VV00-VV0Z)

Energy and drive functions (VV00)

Memory functions (VV03)

Perceptual functions (VV00-VV0Z)

Psychomotor functions (VV00-VV0Z)

Sleep functions (VV01)

VV03

### Memory functions

Specific mental functions of registering and storing information and retrieving it as needed.

**Inclusions:** immediate memory

recent memory

remote memory

memory span

remembering

**Exclusions:** Attention functions (VV02)

Calculation functions (VV00-VV0Z)

Consciousness functions (VV00-VV0Z)

Higher-level cognitive functions (VV00-VV0Z)

intellectual functioning (VV00-VV0Z)

Mental functions of language (VV00-VV0Z)

Orientation functions (VV00-VV0Z)

Perceptual functions (VV00-VV0Z)

Thought functions (VV00-VV0Z)

**VV04**

**Emotional functions**

Specific mental functions related to the feeling and affective components of the processes of the mind.

**Inclusions:**      affect

sadness

tension

lability of emotion

flattening of affect

**Exclusions:**      Energy and drive functions (VV00)

Temperament and personality functions (VV00-VV0Z)

**VV0Y**

**Other specified mental functions**

**VV0Z**

**Mental functions, unspecified**

Sensory functions and pain

This chapter is about the functions of the senses, seeing, hearing, tasting and so on, as well as the sensation of pain.

**VV10**

**Seeing and related functions**

**VV11**

**Hearing and vestibular functions**

**VV12**

**Sensation of pain**

Sensation of unpleasant feeling indicating potential or actual damage to some body structure.

**Inclusions:**      aching pain

burning pain

dull pain

sensations of generalized or localized pain

stabbing pain

**VV1Y**

**Other specified sensory functions and pain**

**VV1Z**

**Sensory functions and pain, unspecified**

Voice and speech functions

This chapter is about the functions of producing sounds and speech.

**VV20**

**Voice functions**

Functions of the production of various sounds by the passage of air through the larynx.

**Exclusions:**

Alternative vocalization functions (VV20-VV2Z)

Articulation functions (VV20-VV2Z)

Mental functions of language (VV00-VV0Z)

**VV2Y**

**Other specified voice and speech functions**

**VV2Z**

**Voice and speech functions, unspecified**

Functions of the cardiovascular, haematological, immunological and respiratory systems

This chapter is about the functions involved in the cardiovascular system (functions of the heart and blood vessels), the haematological and immunological systems (functions of blood production and immunity), and the respiratory system (functions of respiration and exercise tolerance).

**VV30**

**Exercise tolerance functions**

Functions related to respiratory and cardiovascular capacity as required for enduring physical exertion.

**Exclusions:**

additional respiratory functions (VV30-VV3Z)

Functions of the cardiovascular system (VV30-VV3Z)

Haematological system functions (VV30-VV3Z)

Respiration functions (VV30-VV3Z)

Respiratory muscle functions (VV30-VV3Z)

**VV3Y**

**Other specified functions of the cardiovascular, haematological, immunological and respiratory systems**

**VV3Z**

**Functions of the cardiovascular, haematological, immunological and respiratory systems, unspecified**

Functions of the digestive, metabolic and endocrine systems

This chapter is about the functions of ingestion, digestion and elimination, as well as functions involved in metabolism and the endocrine glands.

**VV40**

**Functions related to the digestive system**

**VV4Y**

**Other specified functions of the digestive, metabolic and endocrine systems**

**VV4Z**

**Functions of the digestive, metabolic and endocrine systems, unspecified**

Genitourinary and reproductive functions

This chapter is about the functions of urination and the reproductive functions, including sexual and procreative functions.

**VV50**

**Urination functions**

Functions of discharge of urine from the urinary bladder.

**Exclusions:**      Sensations associated with urinary functions (VV50-VV5Z)

Urinary excretory functions (VV50-VV5Z)

**VV51**

**Sexual functions**

Mental and physical functions related to the sexual act, including the arousal, preparatory, orgasmic and resolution stages.

**Exclusions:**      Procreation functions (VV50-VV5Z)

Sensations associated with genital and reproductive functions (VV50-VV5Z)

**VV5Y**

**Other specified genitourinary and reproductive functions**

**VV5Z**

**Genitourinary and reproductive functions, unspecified**

Neuromusculoskeletal and movement-related functions

This chapter is about the functions of movement and mobility, including functions of joints, bones, reflexes and muscles.

**VV60**

**Mobility of joint functions**

Functions of the range and ease of movement of a joint.

**Exclusions:**      Control of voluntary movement functions (VV60-VV6Z)

Stability of joint functions (VV60-VV6Z)

**VV61**

**Muscle power functions**

Functions related to the force generated by the contraction of a muscle or muscle groups.

**Exclusions:**      Functions of structures adjoining the eye (VV10)

Muscle endurance functions (VV60-VV6Z)

Muscle tone functions (VV60-VV6Z)

**VV6Y**

**Other specified neuromusculoskeletal and movement-related functions**

**VV6Z**

**Neuromusculoskeletal and movement-related functions, unspecified**

Functions of the skin and related structures

This chapter is about the functions of skin, nails and hair.

**VV70 Functions of the skin**

**VV7Y Other specified functions of the skin and related structures**

**VV7Z Functions of the skin and related structures, unspecified**

Learning and applying knowledge

This chapter is about learning, applying the knowledge that is learned, thinking, solving problems, and making decisions.

**VV80 Basic learning**

**VV81 Solving problems**

Finding solutions to questions or situations by identifying and analysing issues, developing options and solutions, evaluating potential effects of solutions, and executing a chosen solution, such as in resolving a dispute between two people.

**Exclusions:** Making decisions (VV80-VV8Z)

Thinking (VV80-VV8Z)

**VV8Y Other specified learning and applying knowledge**

**VV8Z Learning and applying knowledge, unspecified**

General tasks and demands

This chapter is about general aspects of carrying out single or multiple tasks, organizing routines and handling stress. These items can be used in conjunction with more specific tasks or actions to identify the underlying features of the execution of tasks under different circumstances.

**VV90 Carrying out daily routine**

Carrying out simple or complex and coordinated actions in order to plan, manage and complete the requirements of day-to-day procedures or duties, such as budgeting time and making plans for separate activities throughout the day.

**Exclusions:** Undertaking multiple tasks (VV90-VV9Z)

**VV91 Handling stress and other psychological demands**

Carrying out simple or complex and coordinated actions to manage and control the psychological demands required to carry out tasks demanding significant responsibilities and involving stress, distraction, or crises, such as taking exams, driving a vehicle during heavy traffic, finishing a task within a time-limit or taking responsibility for a group of individuals.

**VV9Y Other specified general tasks and demands**

**VV9Z General tasks and demands, unspecified**

## Communication

This chapter is about general and specific features of communicating by language, signs and symbols, including receiving and producing messages, carrying on conversations, and using communication devices and techniques.

**VW00**

### **Communicating with - receiving - spoken messages**

Comprehending literal and implied meanings of messages in spoken language, such as understanding that a statement asserts a fact or is an idiomatic expression.

**VW01**

### **Conversation**

Starting, sustaining and ending an interchange of thoughts and ideas, carried out by means of spoken, written, signed or other forms of language, with one or more people one knows or who are strangers, in formal or casual settings.

**VW0Y**

### **Other specified communication**

**VW0Z**

### **Communication, unspecified**

## Mobility

This chapter is about moving by changing body position or location or by transferring from one place to another, by carrying, moving or manipulating objects, by walking, running or climbing, and by using various forms of transportation.

**VW10**

### **Maintaining a standing position**

Staying in a standing position for some time such as when standing in a queue.

**Inclusions:**

staying in a standing position or hard surfaces

staying in a standing position on a slope

staying in a standing position on slippery surfaces

**VW11**

### **Transferring oneself**

Moving from one surface to another, such as sliding along a bench or moving from a bed to a chair, without changing body position.

**Exclusions:**

Changing basic body position (VW10-VW1Z)

**VW12**

### **Carrying, moving and handling objects**

**VW13**

### **Walking**

Moving along a surface on foot, step by step, so that one foot is always on the ground, such as when strolling, sauntering, walking forwards, backwards, or sideways.

**Exclusions:**

Moving around (VW10-VW1Z)

Transferring oneself (VW11)

**VW14**

### **Moving around within the home**

Walking and moving around in one's home, within a room, between rooms, and around the whole residence or living area.

- Inclusions:**
- moving from floor to floor
  - moving on an attached balcony
  - moving in a restricted area such as a courtyard, porch or garden

**VW15**

### **Moving around using equipment**

Moving the whole body from place to place, on any surface or space, by using specific devices designed to facilitate moving or create other ways of moving around, such as with skates, skis, or scuba equipment, or moving down the street in a self-propelled wheelchair or a walker.

- Exclusions:**
- Driving (VW10-VW1Z)
  - Moving around (VW10-VW1Z)
  - Transferring oneself (VW11)
  - Using transportation (VW16)
  - Walking (VW13)

**VW16**

### **Using transportation**

Using transportation to move around as a passenger, such as being driven in a car, bus, rickshaw, jitney, pram or stroller, wheelchair, animal-powered vehicle, private or public taxi, train, tram, subway, boat or aircraft and using humans for transportation.

- Exclusions:**
- Driving (VW10-VW1Z)
  - Moving around using equipment (VW15)

**VW1Y**

### **Other specified mobility**

**VW1Z**

### **Mobility, unspecified**

## **Self-care**

This chapter is about caring for oneself, washing and drying oneself, caring for one's body and body parts, dressing, eating and drinking, and looking after one's health.

**VW20**

### **Washing oneself**

Washing and drying one's whole body, or body parts, using water and appropriate cleaning and drying materials or methods, such as bathing, showering, washing hands and feet, face and hair, and drying with a towel.

- Exclusions:**
- Caring for body parts (VW21)
  - Toileting (VW22)

**VW21**

### **Caring for body parts**

Looking after those parts of the body, such as skin, face, teeth, scalp, nails and genitals, that require more than washing and drying.

**Exclusions:**      Toileting (VW22)

Washing oneself (VW20)

**VW22**

### **Toileting**

Planning and carrying out the elimination of human waste (menstruation, urination and defecation), and clean oneself afterwards.

**Exclusions:**      Caring for body parts (VW21)

Dressing (VW23)

Moving around within the home (VW14)

Walking (VW13)

Washing oneself (VW20)

**VW23**

### **Dressing**

Carrying out the coordinated actions and tasks of putting on and taking off clothes and footwear in sequence and in keeping with climatic and social conditions, such as by putting on, adjusting and removing shirts, skirts, blouses, pants, undergarments, saris, kimono, tights, hats, gloves, coats, shoes, boots, sandals and slippers.

**VW24**

### **Eating**

Carrying out the coordinated tasks and actions of eating food that has been served, bringing it to the mouth and consuming it in culturally acceptable ways, cutting or breaking food into pieces, opening containers and packets, using eating implements, having meals, feasting or dining.

**Exclusions:**      Drinking (VW20-VW2Z)

Preparing meals (VW30)

**VW25**

### **Looking after one's health**

Ensuring physical comfort, health and physical and mental well-being, such as by maintaining a balanced diet, and an appropriate level of physical activity, keeping warm or cool, avoiding harms to health, following safe sex practices, such as using condoms, getting immunizations and regular physical examinations.

**VW2Y**

### **Other specified self-care**

**VW2Z**

### **Self-care, unspecified**

## Domestic life

This chapter is about carrying out domestic and everyday actions and tasks. Areas of domestic life include caring for one's belongings and space, acquiring food, clothing and other necessities, household cleaning and repairing, caring for personal and other household objects, and assisting others.

VW30

### Preparing meals

Planning, organizing, cooking and serving simple and complex meals for oneself and others, such as by making a menu, selecting edible food and drink, getting together ingredients for preparing meals, cooking with heat and preparing cold foods and drinks, and serving the food.

**Exclusions:**

- Acquisition of goods and services (VW30-VW3Z)
- Caring for household objects (VW30-VW3Z)
- caring for others (VW32)
- Doing housework (VW31)
- Drinking (VW20-VW2Z)
- Eating (VW24)

VW31

### Doing housework

Managing a household by cleaning the house, washing clothes, using household appliances, storing food and disposing of garbage, such as by sweeping, mopping, washing counters, walls and other surfaces; collecting and disposing of household garbage; tidying rooms, closets and drawers; collecting, washing, drying, folding and ironing clothes; cleaning footwear; using brooms, brushes and vacuum cleaners; using washing machines, dryers and irons.

**Exclusions:**

- Acquiring a place to live (VW30-VW3Z)
- Acquisition of goods and services (VW30-VW3Z)
- Caring for household objects (VW30-VW3Z)
- caring for others (VW32)
- Preparing meals (VW30)

VW32

### Assisting others

Assisting household members and others with their learning, communicating, self-care, movement, within the house or outside; being concerned about the well-being of household members and others.

**Exclusions:**

- Remunerative employment (VW50)

VW3Y

### Other specified domestic life

VW3Z

### Domestic life, unspecified

## Interpersonal interactions and relationships

This chapter is about carrying out the actions and tasks required for basic and complex interactions with people (strangers, friends, relatives, family members and lovers) in a contextually and socially appropriate manner.

**VW40**

### **Basic interpersonal interactions**

Interacting with people in a contextually and socially appropriate manner, such as by showing consideration and esteem when appropriate, or responding to the feelings of others.

**VW41**

### **Relating with strangers**

Engaging in temporary contacts and links with strangers for specific purposes, such as asking for directions or making a purchase.

Engaging in temporary contacts and links with strangers for specific purposes, such as when asking for information, directions or making a purchase.

**VW42**

### **Intimate relationships**

Creating and maintaining close or romantic relationships between individuals, such as husband and wife, lovers or sexual partners.

**VW4Y**

### **Other specified interpersonal interactions and relationships**

**VW4Z**

### **Interpersonal interactions and relationships, unspecified**

## Major life areas

This chapter is about carrying out the tasks and actions required to engage in education, work and employment and to conduct economic transactions.

**VW50**

### **Remunerative employment**

Engaging in all aspects of work, as an occupation, trade, profession or other form of employment, for payment, as an employee, full or part time, or self-employed, such as seeking employment and getting a job, doing the required tasks of the job, attending work on time as required, supervising other workers or being supervised, and performing required tasks alone or in groups.

**VW5Y**

### **Other specified major life areas**

**VW5Z**

### **Major life areas, unspecified**

## Community, social and civic life

This chapter is about the actions and tasks required to engage in organized social life outside the family, in community, social and civic areas of life.

**VW60**

### **Recreation and leisure**

Engaging in any form of play, recreational or leisure pursuit, such as informal or organized play and sports, programmes of physical fitness, relaxation, amusement or diversion, going to art galleries, museums, cinemas or theatres; engaging in crafts or hobbies, reading or singing for enjoyment, playing musical instruments; sightseeings, tourism and travelling for pleasure.

**Exclusions:** Political life and citizenship (VW60-VW6Z)

Religion and spirituality (VW60-VW6Z)

remunerative and non-remunerative work ( and )  
(VW50-VW5Z)

Riding animals for transportation (VW10-VW1Z)

Reading (VV80-VV8Z)

Singing (VW00-VW0Z)

**VW61**

### **Human rights**

Enjoying all nationally and internationally recognized rights that are accorded to people by virtue of their humanity alone, such as human rights as recognized by the United Nations Universal Declaration of Human Rights (1948), the United Nations Convention on the Rights of the Child (1989), the United Nations Standard Rules for the Equalization of Opportunities for Persons with Disabilities (1993), and the United Nations Convention on the Rights of Persons with Disabilities (2006); the right to self-determination or autonomy; and the right to control over one's destiny.

**Exclusions:** Political life and citizenship (VW60-VW6Z)

**VW6Y**

### **Other specified community, social and civic life**

**VW6Z**

### **Community, social and civic life, unspecified**

---

**VW8Y**

### **Other specified generic functioning domains**

**VW8Z**

### **Generic functioning domains, unspecified**

# CHAPTER X

---

## Extension Codes

This chapter has 6928 four-character categories.

Code range starts with XS8H

Extension codes should never be used in primary classification coding or tabulation.

- They are provided for use as supplementary or additional codes when desired to identify more detail in statistical categories classified elsewhere.
- Extension codes may be used alone in other contexts.

**Coded Elsewhere:** Extension codes of particular relevance to skin diseases

This chapter contains the following top level blocks:

- Severity Scale Value
- Temporality
- Aetiology
- Topology Scale Value
- Anatomy and topography
- Histopathology
- Dimensions of injury
- Dimensions of external causes
- Consciousness
- Substances
- Diagnosis code descriptors
- Capacity or context
- Health Devices, Equipment and Supplies
- Extension codes of particular relevance to skin diseases

## Severity Scale Value

Generic Severity Scale Value

**Coded Elsewhere:** Basic 3-Value Severity Scale Value: Mild-Moderate-Severe

Clinical Severity Scale Value: Stage 1-2-3-4

Clinical Severity Scale Value: Stage 1-2-2a-2b-3-4

### Mild Moderate Severe Scale Value

<b>XS8H</b>	<b>None</b>
<b>XS5W</b>	<b>Mild</b>
<b>XS0T</b>	<b>Moderate</b>
<b>XS25</b>	<b>Severe</b>
<b>XS2R</b>	<b>Profound</b>

*Inclusions:* Complete

### Clinical Staging Scale Value

<b>XS7A</b>	<b>Stage 1</b>
<b>XS5S</b>	<b>Stage 2</b>
<b>XS4D</b>	<b>Stage 2a</b>
<b>XS6D</b>	<b>Stage 2b</b>
<b>XS00</b>	<b>Stage 3</b>
<b>XS3T</b>	<b>Stage 3a</b>
<b>XS90</b>	<b>Stage 3b</b>
<b>XS6G</b>	<b>Stage 4</b>
<b>XS9N</b>	<b>Stage 5</b>
<b>XS88</b>	<b>Stage 6</b>
<b>XS52</b>	<b>Stage 7</b>
<b>XS0G</b>	<b>Stage 8</b>
<b>XS2C</b>	<b>Stage 9</b>
<b>XS2X</b>	<b>Stage 10</b>

### Grading Scale Value

<b>XS24</b>	<b>Grade 0</b>
<b>XS6P</b>	<b>Grade 1</b>
<b>XS31</b>	<b>Grade 2</b>
<b>XS6F</b>	<b>Grade 3</b>
<b>XS0K</b>	<b>Grade 4</b>
<b>XS87</b>	<b>Grade 5</b>
<b>XS9M</b>	<b>Grade 6</b>
<b>XS5M</b>	<b>Grade 7</b>
<b>XS7F</b>	<b>Grade 8</b>
<b>XS8J</b>	<b>Grade 9</b>
<b>XS57</b>	<b>Grade 10</b>

### Phase Scale Value

<b>XS4A</b>	<b>Phase 0</b>
<b>XS3K</b>	<b>Phase 1</b>
<b>XS4M</b>	<b>Phase 2</b>
<b>XS8V</b>	<b>Phase 3</b>
<b>XS21</b>	<b>Phase 4</b>
<b>XS8Z</b>	<b>Phase 5</b>
<b>XS41</b>	<b>Phase 6</b>
<b>XS73</b>	<b>Phase 7</b>
<b>XS9Z</b>	<b>Phase 8</b>
<b>XS83</b>	<b>Phase 9</b>
<b>XS47</b>	<b>Phase 10</b>

### Problem Scale Value

<b>XS5C</b>	<b>0 No problem</b>
<b>XS6Y</b>	<b>1 Mild problem</b>
<b>XS8T</b>	<b>2 Moderate problem</b>

<b>XS9D</b>	<b>3 Severe problem</b>
<b>XS91</b>	<b>4 Complete problem</b>
<b>XS5P</b>	<b>9 Not applicable</b>

Disease Specific Severity Scale Value

Tumour spread simplified Scale Value

<b>XS0J</b>	<b>A Remission / Free of disease</b>
<b>XS05</b>	<b>B Local Disease</b>
<b>XS0E</b>	<b>Local limited</b>
<b>XS67</b>	<b>Locally advanced</b>
<b>XS9S</b>	<b>C Regional disease</b>
<b>XS4Z</b>	<b>D Distant disease</b>

Tumour spread staging Scale Value

<b>XS76</b>	<b>Stage 0</b>
<b>XS1G</b>	<b>Stage I</b>
<b>XS4P</b>	<b>Stage II</b>
<b>XS6H</b>	<b>Stage III</b>
<b>XS9R</b>	<b>Stage IV</b>

Histological Grading Scale Value

<b>XS56</b>	<b>Grade I</b>
	Well differentiated
<b>XS58</b>	<b>Grade II</b>
	Moderately differentiated
<b>XS7Z</b>	<b>Grade III</b>
	Poorly differentiated
<b>XS7M</b>	<b>Grade IV</b>
	Undifferentiated

**XS7H** **Undetermined grade**  
Grade cannot be assessed

#### NYHA Functional Classification: Class I-IV

- XS3A** **NYHA Class I - No limitation of physical activity**  
No limitation of physical activity. Ordinary physical activity does not cause undue fatigue, palpitation, dyspnoea (shortness of breath).
- XS6B** **NYHA Class II - Slight limitation of physical activity**  
Slight limitation of physical activity. Comfortable at rest. Ordinary physical activity results in fatigue, palpitation, dyspnoea (shortness of breath).
- XS9T** **NYHA Class III - Marked limitation of physical activity**  
Marked limitation of physical activity. Comfortable at rest. Less than ordinary activity causes fatigue, palpitation or dyspnoea.
- XS9F** **NYHA Class IV - Unable to carry on any physical activity without discomfort**  
Unable to carry on any physical activity without discomfort. Symptoms of heart failure at rest. If any physical activity is undertaken, discomfort increases.

#### Chronic Obstructive Lung Disease Criteria: GOLD 1-4

- XS80** **GOLD 1 - mild:  $FEV1 \geq 80\% \text{ predicted}$**
- XS7U** **GOLD 2 - moderate:  $50\% \leq FEV1 < 80\% \text{ predicted}$**
- XS8K** **GOLD 3 - severe:  $30\% \leq FEV1 < 50\% \text{ predicted}$**
- XS50** **GOLD 4 - very severe:  $FEV1 < 30\% \text{ predicted}$**

#### Peripheral arterial disease (PAD) Severity Classification by Fontaine

- XS1Y** **Stage I: Asymptomatic, incomplete blood vessel obstruction**
- XS5L** **Stage II: Mild claudication pain in limb**
- XS5V** **Stage IIA: Claudication at a distance > 200 metres**
- XS6C** **Stage IIB: Claudication at a distance < 200 metres**
- XS9L** **Stage III: Rest pain, mostly in the feet**
- XS2J** **Stage IV: Necrosis and/or gangrene of the limb**

#### Endometriosis Severity Scale Value

- XS3V** **No endometriosis**

**XS5N**      **Filmy endometriosis**

**XS55**      **Dense endometriosis**

Vocal Cord Paralysis Severity Scale Value

**XS1H**      **Incomplete vocal cord paralysis**

**XS66**      **Partial vocal cord paralysis**

**XS7K**      **Complete vocal cord paralysis**

Sepsis Severity Scale Value

**XS5E**      **Mild sepsis**

**XS65**      **Severe sepsis**

**XS26**      **Septic shock**

Peripheral arterial disease (PAD) Severity Classification by Rutherford

**XS1T**      **Grade 0 Category 0: Asymptomatic -no hemodynamically significant occlusive disease**

Objective criteria: Normal treadmill or reactive hyperemia test

**XS0Q**      **Grade 0 Category 1: Mild claudication**

Objective criteria: Completes treadmill exercise; ankle pressure (AP) after exercise > 50 mm Hg but at least 20 mm Hg lower than resting value

**XS2W**      **Grade I Category 2: Moderate claudication**

Objective criteria: Between categories 1 and 3

**XS51**      **Grade I Category 3: Severe claudication**

Objective criteria: Cannot complete standard treadmill exercise, and ankle pressure (AP) after exercise < 50 mm Hg

**XS8M**      **Grade II Category 4: Ischaemic rest pain**

Objective criteria: Resting ankle pressure (AP) < 40 mm Hg, flat or barely pulsatile ankle or metatarsal pulse volume recording (PVR); toe pressure (TP) < 30 mm Hg

**XS6U**      **Grade III Category 5: Minor tissue loss - nonhealing ulcer, focal gangrene with diffuse pedal ischaemia**

Objective criteria: Resting ankle pressure (AP) < 60 mm Hg, ankle or metatarsal pulse volume recording (PVR) flat or barely pulsatile; toe pressure (TP) < 40 mm Hg

**XS0U**

**Grade III Category 6: Major tissue loss - extending above transmetatarsal (TM) level, functional foot no longer salvageable**

Objective criteria: Same as category 5.

## Pain Severity Scale Value

The chronic pain severity scale value is a compound measure comprised of pain intensity, pain-related distress, and pain-related interference. Each of this measures is a patient rating.

### Pain intensity

Pain intensity is defined as the strength of the subjective pain experience ("how much does the pain hurt?"). The patient should be asked to rate the average pain intensity for the last week on an 11-point numerical rating scale (ranging from 0 'no pain' to 10 'worst pain imaginable') or a 100 mm visual rating scale.

**XS5B**

**No pain**

Pain intensity rating NRS: 0

**XS5D**

**Mild pain**

Pain intensity rating NRS: 1-3

**XS9Q**

**Moderate pain**

Pain intensity rating NRS: 4-6

**XS2E**

**Severe pain**

Pain intensity rating NRS: 7-10

### Pain-related distress

Pain-related distress is defined as the multifactorial unpleasant emotional experience of a cognitive, behavioral, emotional, social, or spiritual nature due to the chronic pain ("how distressed are you by the pain?"). The patient should be asked to rate the average pain-related distress they experienced in the last week on an 11-point numerical rating scale (ranging from 0 'no pain-related distress' to 10 'extreme pain-related distress') or a 100mm visual rating scale.

**XS1J**

**No distress**

Pain-related distress rating NRS: 0

**XS3R**

**Mild distress**

Pain-related distress rating NRS: 1-3

**XS7C**

**Moderate distress**

Pain-related distress rating NRS: 4-6

**XS7N**

**Severe distress**

Pain-related distress rating NRS: 7-10

#### Pain-related interference

Pain-related interference is a measure for how much the pain interferes with daily activities and participation ("how much does the pain interfere with your life?"). The patient should be asked to rate the average pain-related interference they experienced in the last week on an 11-point numerical rating scale (ranging from 0 'no interference' to 10 'unable to carry on activities') or a 100mm visual rating scale.

<b>XS71</b>	<b>No pain-related interference</b> Pain-related interference rating NRS: 0
<b>XS5R</b>	<b>Mild pain-related interference</b> Pain-related interference rating NRS: 1-3
<b>XS2L</b>	<b>Moderate pain-related interference</b> Pain-related interference rating NRS: 4-6
<b>XS2U</b>	<b>Severe pain-related interference</b> Pain-related interference rating NRS: 7-10

#### Presence of psychosocial factors Scale Value

Use this extension code to code the presence or absence of problematic emotional (e.g., anger, fear), cognitive (e.g., excessive worry, catastrophizing), behavioral (e.g., avoidance) or social factors (eg, work, relationships) that accompany a given health condition (e.g., chronic pain). The code for the presence of psychosocial factors is appropriate when there is positive evidence that psychological or social factors contribute to the cause, the maintenance or the exacerbation of the health condition, or associated disability, or when the health condition results in negative psychobehavioral consequences (eg, demoralisation, hopelessness, avoidance, withdrawal). Assigning this extension code does not require a judgement regarding aetiological contributions or causal priorities.

<b>XS7G</b>	<b>Psychosocial factors present</b>
<b>XS8B</b>	<b>No psychosocial factors present</b>

#### Adult Nutritional Status Scale Value

<b>XS11</b>	<b>Underweight BMI Below 18.5 kg/m<sup>2</sup></b>
<b>XS43</b>	<b>Normal weight BMI 18.5–24.9 kg/m<sup>2</sup></b>
<b>XS7R</b>	<b>Pre-obesity BMI 25.0–29.9 kg/m<sup>2</sup></b>
<b>XS3Y</b>	<b>Obesity class I BMI 30.0–34.9 kg/m<sup>2</sup></b>
<b>XS6N</b>	<b>Obesity class II BMI 35.0–39.9 kg/m<sup>2</sup></b>
<b>XS2B</b>	<b>Obesity class III BMI greater than or equal to 40 kg/m<sup>2</sup></b>

## Coronary atherosclerosis Severity Scale Value

- XS2V      Single vessel disease**
- XS8U      Multiple vessel disease**

## Anaphylaxis Severity Scale Value

- XS09      Anaphylaxis grade 1**  
Anaphylaxis grade 1 is considered when there is a single organ system involved.
- XS59      Anaphylaxis grade 2**  
Anaphylaxis grade 2 is considered in cases of more than one organ system involvement; but not life-threatening.
- XS2Y      Anaphylaxis grade 3**  
Anaphylaxis grade 3 is considered in life-threatening cases with more than one organ system involved.
- XS85      Anaphylaxis grade 4**  
Anaphylaxis grade 4 is considered in life-threatening cases with cardiac arrest.

## Temporality

### Course of the Condition

### Pattern, Activity, or Clinical Status

#### Intermittent-Persistent Scale Value

- XT5G      Intermittent**
- XT6Z      Persistent**
- XT5T      Persistent with overlaid attacks**
- XT3B      Asymptomatic**
- XT1T      Subclinical**
- XT98      Active**
- XT7X      Episodic**
- XT4M      Prodromal**
- XT44      Recurrent**
- XT4D      Relapse**

**XT9C      Cause of late effect**  
A condition that results in a late effect.

## Course

**Coded Elsewhere:** Acute-Chronic Scale Value

Acute-Subacute-Chronic Scale Value

**XT5R      Acute**  
**XT1L      Subacute**  
**XT8W      Chronic**

## Onset

**XT2Q      Early onset**  
**XT46      Immediate onset**  
**XT3R      Late onset**  
**XT64      Delayed onset**  
**XT3Z      Rapid onset**  
Rapid or sudden onset of a condition/illness that requires more immediate and/or aggressive treatment  
**XT42      Gradual onset**

## Time in Life

**XT0S      Pregnancy**  
For the mother, the period of time between fertilization and parturition.  
**XT4Z      Postpartum**  
**XT1G      Puerperium**  
For the mother, the period of time that lasts from birth through the 42nd day of life for the child.  
**XT77      Antenatal - WHO Standard**  
For the fetus, the period of time between fertilization and parturition.  
**XT5L      Antenatal - Aus. Standard**  
**XT5P      Antenatal - Can. Standard**  
**XT04      Antenatal - Ger. Standard**

<b>XT9S</b>	<b>Antenatal - US Standard</b>
<b>XT16</b>	<b>Neonatal</b> The period of time from birth through the 28th day of life.
<b>XT6P</b>	<b>Early Neonatal</b> The period of time from birth through the seventh day of life.
<b>XT30</b>	<b>Late Neonatal</b> The period of time from the eighth through the 28th day of life.
<b>XT3N</b>	<b>Perinatal</b> The period of time between 22 weeks after fertilization and 7 days after parturition.
<b>XT2C</b>	<b>Infancy</b> The period of time between 29 and 365 days of life.
<b>XT4X</b>	<b>Child under 5</b> The period of time from the start of the 1st year of life through the end of the 4th.
<b>XT50</b>	<b>Child over 5</b> The period of time from the start of the 5th year of life through the end of the 14th
<b>XT9V</b>	<b>Middle Childhood</b> The period of time from the start of the 5th year of life through the end of the 10th.
<b>XT7Q</b>	<b>Early Adolescence</b> The period of time from the start of the 11th year of life through the end of the 14th
<b>XT7M</b>	<b>Adolescent</b> The period of time from the start of the 15th year of life through the end of the 19th.
<b>XT4T</b>	<b>Middle Adolescence</b> The period of time from the start of the 15th year of life through the end of the 17th.
<b>XT9X</b>	<b>Late Adolescence</b> The period of time from the start of the 18th year of life through the end of the 19th.
<b>XT15</b>	<b>Young Adult</b> The period of time from the start of the 20th year of life through the end of the 24th.
<b>XT6S</b>	<b>Adult</b> The period of time from the start of the 25th year of life through the end of the 64th.
<b>XT19</b>	<b>Early Geriatric</b> The period of time from the start of the 65th year of life through the end of the 84th year

**XT13****Late Geriatric**

The period of time from the start of the 85th year through the end of life.

**Duration of pregnancy**

Use as additional code, if desired, for cases of Abortive outcome of pregnancy, Threatened abortion, Fetal death in utero, Premature rupture of membranes (before 37 completed weeks of gestation), False labour before 37 completed weeks of gestation (threatened premature labour) and Preterm labour (early onset of labour).

**XT3X****Duration of pregnancy less than 5 completed weeks****XT09****Duration of pregnancy 5-13 completed weeks****XT65****Duration of pregnancy 14-19 completed weeks****XT5N****Duration of pregnancy 20-21 completed weeks****XT0T****Duration of pregnancy 20-25 completed weeks****XT4J****Duration of pregnancy 26-33 completed weeks****XT84****Duration of pregnancy 34-36 completed weeks****XT6G****Duration of pregnancy more than 36 completed weeks****XT6K****Unspecified duration of pregnancy**

Duration of pregnancy not specified

**Aetiology****Coded Elsewhere:** Allergens**Causality****XB8M****Congenital****XB8D****Iatrogenic****XB5F****Idiopathic****XB1Y****Familial****XB25****Nosocomial****Inclusions:** Hospital-acquired**XB4Q****Environmental****Occupational relevance****XB17****Occupation as primary factor**

<b>XB5G</b>	<b>Occupation as cofactor</b>

<b>XN81C</b>	yaba monkey tumour virus
<b>XN5G8</b>	Molluscipoxvirus
<b>XN7YE</b>	Molluscum contagiosum virus
<b>XN22T</b>	<b>Reovirus</b> Reovirus is a nonenveloped double-stranded RNA virus. This virus was initially not known to be related to any specific disease, and so was named Respiratory Enteric Orphan virus. However, some members of the reovirus family have been shown to cause mild illnesses such as diarrhea.
<b>XN6FR</b>	<b>Retrovirus</b> This is an RNA virus that replicates in a host cell. First it uses its own reverse transcriptase enzyme to produce DNA from its RNA genome, reverse of the usual pattern, thus retro (backwards).

Nerve

**Coded Elsewhere:** Peripheral nerve (XA06U6)

- Accessory obturator nerve (XA55J8)
- Auricular branch of vagus nerve (XA0P44)
- Anococcygeal nerve (XA9JU0)
- Ansa cervicalis (XA2M04)
- Anterior interosseous nerve (XA6RQ4)
- Anterior superior alveolar nerve (XA6PJ8)
- Aortic plexus (XA3XN8)
- Auerbach plexus (XA2G56)
- Auriculotemporal nerve (XA5DA8)
- Axillary nerve (XA1ZC4)
- Buccal nerve (XA7UK9)
- Bulbar nuclei (XA54B9)
- Cardiac plexus (XA9QM5)
- Cauda equina (XA84W1)
- Cavernous plexus (XA3FS7)
- Celiac ganglion (XA89R1)
- Chorda tympani (XA2BL2)
- Ciliary ganglion (XA1SG6)
- Coccygeal nerve (XA5C62)
- Cochlear nerve (XA1QU6)
- Common palmar digital nerves of median nerve (XA1LW6)
- Common fibular nerve (XA7HH4)
- Conus medullaris (XA2FQ1)
- Cranial Nerve (XA8EK9)
- Deep branch of the radial nerve (XA5179)
- Deep fibular nerve (XA3QB5)
- Deep petrosal nerve (XA9CT5)
- Deep temporal nerve (XA52H1)
- Diagonal band of Broca (XA8QL3)
- Digital nerve (XA37M8)
- Dorsal branch of ulnar nerve (XA1TY7)
- Dorsal nerve of clitoris (XA76C3)
- Dorsal nerve of the penis (XA8CC3)
- Dorsal scapular nerve (XA9RP3)
- Oesophageal plexus (XA7K49)
- Ethmoidal nerve (XA5BP8)
- External laryngeal nerve (XA9LP4)
- Femoral nerve (XA11D4)

Frontal nerve (XA7F46)  
Gastric plexus (XA2Y82)  
Geniculate ganglion (XA66H0)  
Genital branch of genitofemoral nerve (XA99Q6)  
Genitofemoral nerve (XA9JZ4)  
Gluteal nerve (XA60R4)  
Greater auricular nerve (XA4WK4)  
Greater occipital nerve (XA6BB0)  
Greater petrosal nerve (XA4W18)  
Hepatic plexus (XA4YZ0)  
Iliohypogastric nerve (XA8T30)  
Ilioinguinal nerve (XA5Q50)  
Inferior alveolar nerve (XA3VT0)  
Inferior anal nerves (XA8CZ0)  
Inferior cardiac nerve (XA9TB4)  
Inferior cervical ganglion (XA20S2)  
Inferior gluteal nerve (XA1GU3)  
Inferior hypogastric plexus (XA05T1)  
Inferior mesenteric plexus (XA8QG3)  
Inferior palpebral nerve (XA4E11)  
Infraorbital nerve (XA3G43)  
Intercostal nerve (XA5HJ3)  
Intercostobrachial nerve (XA2F71)  
Intermediate cutaneous nerve (XA6B81)  
Internal carotid plexus (XA5JN1)  
Internal laryngeal nerve (XA6UK8)  
Jugular ganglion (XA8AU6)  
Lacrimal nerve (XA16M4)  
Lateral cord of brachial plexus (XA9PG2)  
Lateral cutaneous nerve of forearm (XA6166)  
Lateral femoral cutaneous nerve (XA4834)  
Lateral pectoral nerve (XA5A06)  
Lateral plantar nerve (XA9958)  
Lateral pterygoid nerve (XA3114)  
Left recurrent laryngeal nerve (XA3524)  
Lesser occipital nerve (XA3ND8)  
Lingual nerve (XA5CT7)  
Long ciliary nerves (XA3VY1)  
Long root of the ciliary ganglion (XA1Z01)  
Long thoracic nerve (XA0A05)

Lower subscapular nerve (XA9XA5)  
Lumbar nerve (XA5UE9)  
Lumbar splanchnic nerve (XA8U35)  
Lumboinguinal nerve (XA8307)  
Lumbosacral trunk (XA76D3)  
Trigeminal nerve, mandibular branch (XA1F17)  
Masseteric nerve (XA5NQ5)  
Trigeminal nerve, maxillary branch (XA8KJ5)  
Medial cord of brachial plexus (XA7UA9)  
Medial cutaneous nerve of arm (XA7K97)  
Medial cutaneous nerve of forearm (XA26F7)  
Medial cutaneous nerve (XA9HJ5)  
Medial pectoral nerve (XA49V5)  
Medial plantar nerve (XA9AF5)  
Medial pterygoid nerve (XA1RH8)  
Meissner plexus (XA8Z10)  
Mental nerve (XA6ZD8)  
Middle cardiac nerve (XA8ML2)  
Middle cervical ganglion (XA9RD0)  
Middle meningeal nerve (XA9G70)  
Muscular branches of the radial nerve (XA3P46)  
Musculocutaneous nerve (XA5QF4)  
Mylohyoid nerve (XA9FV5)  
Nasociliary nerve (XA5WM9)  
Nasopalatine nerve (XA0S35)  
Nerve of pterygoid canal (XA9LR9)  
Nerve of the cervical region (XA96Q6)  
Spinal nerve plexus (XA64F0)  
Spinal nerve root (XA6EC2)  
Nerve to obturator internus (XA1HC7)  
Nerve to quadratus femoris (XA7S27)  
Nerve to the piriformis (XA8PE3)  
Nerve to the stapedius (XA69Y7)  
Nerve to the subclavius (XA4XD7)  
Nervus intermedius (XA0869)  
Nervus spinosus (XA2KG8)  
Nodose ganglion (XA5NY4)  
Obturator nerve (XA4548)  
Trigeminal nerve, ophthalmic branch (XA95Y8)  
Otic ganglion (XA2260)

Ovarian plexus (XA9PB2)  
Palatine nerve (XA7P00)  
Palmar branch of the median nerve (XA89K2)  
Palmar branch of ulnar nerve (XA7FU0)  
Pancreatic plexus (XA0C44)  
Paraganglion (XA9519)  
Patellar plexus (XA5186)  
Pelvic splanchnic nerve (XA1GM8)  
Perforating cutaneous nerve (XA6GZ8)  
Perineal branches of posterior femoral cutaneous nerve (XA4A74)  
Perineal nerve (XA0W10)  
Petrous ganglion (XA48Z8)  
Pharyngeal nerve (XA5Q86)  
Phrenic nerve (XA9ZM0)  
Phrenic plexus (XA9ME3)  
Plantar nerve (XA3906)  
Posterior auricular nerve (XA7F87)  
Posterior branch of spinal nerve (XA11K1)  
Posterior cord of brachial plexus (XA1UT5)  
Posterior cutaneous nerve of arm (XA2XU7)  
Posterior cutaneous nerve of forearm (XA0KL7)  
Posterior cutaneous nerve of thigh (XA83P9)  
Posterior scrotal nerve (XA7NU3)  
Posterior superior alveolar nerve (XA9AN9)  
Proper palmar digital nerves of median nerve (XA7ZD7)  
Prostatic plexus (XA16Y3)  
Pterygopalatine ganglion (XA0ER1)  
Pudendal nerve (XA6WU3)  
Pudendal plexus (XA9411)  
Renal plexus (XA82M9)  
Right recurrent laryngeal nerve (XA1BR5)  
Sacral splanchnic nerves (XA0SA1)  
Saphenous nerve (XA9EW1)  
Sciatic nerve (XA9KK8)  
Semilunar ganglion (XA1SM8)  
Short ciliary nerves (XA07F8)  
Sphenopalatine nerves (XA3W58)  
Spinal nerve (XA65L3)  
Splenic plexus (XA4V38)  
Subcostal nerve (XA3RU6)

Submandibular ganglion (XA74N6)  
Suboccipital nerve (XA0Z50)  
Superficial branch of the radial nerve (XA2E94)  
Superficial fibular nerve (XA2I25)  
Superior cardiac nerve (XA1AC5)  
Superior cervical ganglion (XA6BG1)  
Superior ganglion (XA6YL5)  
Superior gluteal nerve (XA9AC5)  
Superior hypogastric plexus (XA33C1)  
Superior labial nerve (XA6AE9)  
Superior laryngeal nerve (XA2HA5)  
Superior lateral cutaneous nerve of arm (XA6B07)  
Superior mesenteric plexus (XA3DJ3)  
Superior rectal plexus (XA4G22)  
Supraclavicular nerves (XA5318)  
Suprarenal plexus (XA6MY2)  
Suprascapular nerve (XA8QY6)  
Supratrochlear nerve (XA95V8)  
Sural nerve (XA4HR8)  
Sympathetic trunk (XA6W14)  
Third occipital nerve (XA18D0)  
Thoracic splanchnic nerve (XA2R06)  
Thoraco-abdominal nerve (XA0462)  
Thoracodorsal nerve (XA2542)  
Tibial nerve (XA7534)  
Transverse cervical nerve (XA25F4)  
Tympanic nerve (XA4Q30)  
Upper subscapular nerve (XA5KR0)  
Vestibular nerve (XA1AL7)  
Zygomatic nerve (XA4DJ9)  
Zygomaticofacial nerve (XA62X3)  
Zygomaticotemporal nerve (XA9MM8)

**XA3PR2**      **Nerve ganglia**

**XA2B55**      **Infraorbital plexus**

**XA0GB0**      **Median nerve**

**XA3M58**      **Nerve of the Thorax**

## Number of Nerves

XA2330	<b>Multiple Nerves</b>
XA7MX8	<b>Single Nerve</b>
XA8BJ3	<b>Radial nerve</b>
XA2AS2	<b>Ulnar nerve</b>
XA4M27	<b>Ventral ramus</b>

## Visual system

XA7D89	<b>Eye</b> <i>Coded Elsewhere:</i> Lacrimal gland (XA75Y9)
XA17K1	<b>Eyelid and ocular surface</b> <i>Coded Elsewhere:</i> Cornea (XA4C02)
XA3RB1	Eyelids
XA9K79	Upper eyelid
XA53T1	Upper eyelid margin <i>Coded Elsewhere:</i> Superior lacrimal punctum (XA2VR4)
XA4649	Superior palpebral sulcus
XA0JV9	Lower eyelid
XA4AX5	Lower eyelid margin <i>Coded Elsewhere:</i> Inferior lacrimal punctum (XA99D0)
XA0403	Lateral canthus
XA2GQ3	Medial canthus
XA8PS3	Conjunctiva
XA3X70	Palpebral conjunctiva
XA6EZ4	Conjunctival fornices
XA4H06	Superior conjunctival fornix
XA3KE6	Inferior conjunctival fornix
XA6V06	Bulbar conjunctiva
XA0M40	<b>Eyeball</b> <i>Coded Elsewhere:</i> Anterior chamber of the eye (XA4MZ4) Posterior chamber of the eye (XA0N58)

<b>XA2AF4</b>	Sclera
<b>XA4C02</b>	Cornea
<b>XA1DA5</b>	Limbus of cornea
<b>XA4MT3</b>	Uvea
<b>XA03X9</b>	Ciliary body
<b>XA9SH1</b>	Ciliary muscle
<b>XA1S43</b>	Ciliary processes
<b>XA96A7</b>	Choroid
	<b><i>Coded Elsewhere:</i></b> Crystalline lens (XA13U9)
<b>XA3GW7</b>	Iris
<b>XA0B15</b>	Pupil
<b>XA0571</b>	Pupillary membrane
<b>XA13U9</b>	Crystalline lens
<b>XA6U53</b>	Suspensory ligament of lens
<b>XA8WV8</b>	Retina
<b>XA9V06</b>	Macula lutea
<b>XA2U02</b>	Fovea
<b>XA4A75</b>	Optic disc
<b>XA4YS8</b>	Peripheral retina
<b>XA0BB2</b>	<b>Chamber of eye</b>
<b>XA0N58</b>	Posterior chamber of the eye
<b>XA4HU2</b>	Vitreous humor
<b>XA4MZ4</b>	Anterior chamber of the eye
<b>XA3518</b>	Aqueous humour
<b>XA1TF9</b>	<b>Eye fluid</b>
	<b><i>Coded Elsewhere:</i></b> Aqueous humour (XA3518)
	Vitreous humor (XA4HU2)
<b>XA0096</b>	<b>Lacrimal apparatus</b>
<b>XA75Y9</b>	<b>Lacrimal gland</b>
	<b><i>Coded Elsewhere:</i></b> Nasolacrimal duct (XA5SW9)
	Lacrimal sac (XA0096)

<b>XA2PA4</b>	Lacrimal gland ducts
<b>XA9D80</b>	<b>Meibomian gland</b>
<b>XA8EM9</b>	<b>Lacrimal puncta</b>
<b>XA2VR4</b>	Superior lacrimal punctum
<b>XA99D0</b>	Inferior lacrimal punctum
<b>XA6C35</b>	<b>Lacrimal canaliculi</b>
<b>XA5SW9</b>	<b>Nasolacrimal duct</b>
<b>XA2WJ9</b>	<b>Orbit</b>
	<i>Coded Elsewhere:</i> Orbital bone (XA8E69)
<b>XA9WT4</b>	<b>Connective and other soft tissue of orbit</b>
	<i>Coded Elsewhere:</i> Lateral palpebral artery (XA00Q9)
	Superior rectus muscle (XA51R1)
	Superior oblique muscle (XA2X27)
	Medial rectus muscle (XA95N1)
	Inferior rectus muscle (XA1X67)
	Inferior oblique muscle (XA4N79)
	Lateral rectus muscle (XA3282)
	Levator palpebrae superioris muscle (XA2R46)
<b>XA8GT2</b>	Nasofrontal vein
<b>XA7LQ0</b>	Supraorbital vein

## Auditory system

<b>XA01U5</b>	<b>Ear</b>
<b>XA57R3</b>	<b>Inner Ear</b>
<b>XA3MS6</b>	Semicircular canals
<b>XA0JV0</b>	Cochlea
<b>XA6ZY7</b>	Internal Acoustic Meatus
<b>XA0L54</b>	Labyrinth
<b>XA44P4</b>	Auditory vestibule
<b>XA0G74</b>	<b>Middle Ear</b>
	<i>Coded Elsewhere:</i> Bones of middle ear (XA6EQ1)
<b>XA7XY6</b>	Eustachian tube
<b>XA16S6</b>	Oval window

<b>XA9RH9</b>	Mastoid antrum
<b>XA3KB2</b>	Tympanic cavity
<b>XA3UT7</b>	Connective and other soft tissues of middle ear
<b>XA08X4</b>	Tympanic membrane
<b>XA6ZY6</b>	<b>External Ear</b> The external portion of the ear comprising the pinna (auricle) and the external auditory canal.
<b>XA4E71</b>	Pinna
<b>XA6B58</b>	Helix of pinna
<b>XA9A86</b>	Crus of helix
<b>XA9M10</b>	Apex of helix
<b>XA7AB8</b>	Spine of helix
<b>XA1BZ8</b>	Tail of helix
<b>XA7V14</b>	Antihelix
<b>XA96Q7</b>	Crura of antihelix
<b>XA5LW2</b>	Scaphoid fossa of pinna
<b>XA8W55</b>	Concha of pinna
<b>XA5KM5</b>	Cymba conchae
<b>XA8D58</b>	Conchal bowl of pinna
<b>XA3RC6</b>	Triangular fossa of pinna The concavity bounded by the superior and inferior crura of the antihelix and the ascending portion of the helix of the external ear
<b>XA2N71</b>	Tragus of pinna
<b>XA5VK5</b>	Intertragic notch of pinna
<b>XA0TW7</b>	Earlobe
<b>XA7RR9</b>	Antitragus of pinna
<b>XA3S47</b>	Posterior surface of pinna
<b>XA6NU1</b>	Antihelical fossa
<b>XA6KW8</b>	Eminence of concha
<b>XA0H47</b>	Eminence of scapha
<b>XA8VK6</b>	Eminence of triangular fossa
<b>XA4DV9</b>	Retroauricular sulcus

<b>XA3UC1</b>	External auditory canal The tubular skin-lined canal which focuses sound from the external environment onto the ear-drum  <b>Coded Elsewhere:</b> Tympanic membrane (XA08X4)
<b>XA5GS5</b>	External auditory meatus The entrance to the external auditory canal
<b>XA5K66</b>	Ceruminal gland
<b>XA9E26</b>	Skin of auricle

## Circulatory system

<b>XA4PM9</b>	<b>Cardiovascular system</b>
<b>XA5999</b>	<b>Arteries</b>
<b>XA4TS7</b>	Artery of head, face, and neck
<b>XA2B10</b>	Anterior communicating artery
<b>XA2QF4</b>	Anterior ethmoidal artery
<b>XA53D3</b>	Nasal branches of the anterior ethmoidal artery
<b>XA00K1</b>	Anterior meningeal artery
<b>XA1GU9</b>	Anterior superior alveolar artery
<b>XA2505</b>	Artery of pterygoid canal
<b>XA9AD7</b>	Carotid artery
<b>XA0F61</b>	Carotid body
<b>XA1V84</b>	Common carotid artery
<b>XA78C0</b>	Internal carotid artery
<b>XA1CW5</b>	Ophthalmic artery
<b>XA9EK2</b>	External carotid artery
<b>XA5SN3</b>	Cerebellar artery
<b>XA13S2</b>	Cerebral artery
<b>XA1VB0</b>	Anterior cerebral artery
<b>XA2K99</b>	Basilar artery
<b>XA3185</b>	Pontine branches of the basilar artery
<b>XA2JH8</b>	Middle cerebral artery
<b>XA4WT4</b>	Anterolateral central artery

<b>XA7C50</b>	Posterior cerebral artery
<b>XA2UK9</b>	Costocervical trunk
<b>XA7SK1</b>	Deep auricular artery
<b>XA1NY7</b>	Deep cervical artery
<b>XA18D8</b>	Dorsal nasal artery

<b>XA7NQ7</b>	Left anterior descending coronary artery
<b>XA2N78</b>	Diagonal branches of left anterior descending coronary artery Diagonal branches of the left anterior descending coronary artery supply blood flow to the anterior and anterolateral walls of the left ventricle. There are usually denoted as D1, D2, D3, etc. There are termed "diagonal" due to them branching from their parent vessel at acute angles. They extend over the left ventricle in a diagonal fashion toward the acute margin and the cardiac apex. They often run parallel to one another and are variable in number (often 2 to 9).
<b>XA20E5</b>	D1 - first diagonal branch

Blood vessel tumours, benign

**XH3U29 Capillary haemangioma**

**XH1GU2 Cavernous haemangioma**

**XH10T4 Epithelioid haemangioma**

A benign neoplasm most commonly affecting the skin and characterised by local proliferation of vascular channels. Affected individuals typically present with a cluster of small, translucent nodules on the head and neck, particularly around the ear or the hairline. The neoplasm may rarely arise in oral mucosa or in internal organs.

**XH0LN3 Haemangioendothelioma, benign**

Miscellaneous tumours, malignant

**XH2S71 Mixed pineal tumour**

*Inclusions:* Mixed pineocytoma-pineoblastoma

**XH1S48 Pineal parenchymal tumour of intermediate differentiation**

**XH1ZH1 Pineoblastoma**

Pineoblastomas are a rare, malignant type of supratentorial primitive neuroectodermal tumour, found mainly in children (less than 10% of cases are reported in adults), located in the pineal region of the brain but that can metastasize along the neuroaxis. As they are the most aggressive of the pineal parenchymal tumours, they are usually associated with a poor prognosis.

**XH3D20 Transitional pineal tumour**

**XH7K24 Neuroectodermal tumour, NOS**

**XH6P76 Peripheral primitive neuroectodermal tumour**

**XH9GH0 Chordoma, NOS**

**XH8KJ8 Ewing sarcoma**

Mast cell tumours, uncertain whether benign or malignant

<b>XH1J17</b>	<b>Mastocytoma, NOS</b>
<b>XH74F2</b>	<b>Cutaneous mastocytosis</b>
	<i>Inclusions:</i> Cutaneous mastocytosis, NOS
<b>XH2RG8</b>	<b>Diffuse cutaneous mastocytosis</b>
<b>XH8VS0</b>	<b>Urticaria pigmentosa</b>
<b>XH2Y59</b>	<b>Indolent systemic mastocytosis</b>
<b>XH2RL8</b>	<b>Solitary mastocytoma of skin</b>

Neoplasms of histiocytes and accessory lymphoid cells

**Coded Elsewhere:** Erdheim-Chester disease (XH1VJ3)

Neoplasms of histiocytes and accessory lymphoid cells, malignant

**Coded Elsewhere:** Langerhans cell histiocytosis (XH1J18)

<b>XH2WJ3</b>	<b>Malignant histiocytosis</b>
<b>XH7PV7</b>	<b>Histiocytic medullary reticulosis</b>
<b>XH4XT4</b>	<b>Acute progressive histiocytosis X</b>
<b>XH8VV4</b>	<b>Histiocytosis X, NOS</b>
<b>XH86U0</b>	<b>Hand-Schuller-Christian disease</b>
<b>XH60Q1</b>	<b>Letterer-Siwe disease</b>
<b>XH0YE1</b>	<b>Nonlipid reticuloendotheliosis</b>
<b>XH40U7</b>	<b>Langerhans cell histiocytosis, disseminated</b>
	<i>Inclusions:</i> Langerhans cell granulomatosis
<b>XH4JD4</b>	<b>Histiocytic sarcoma</b>
<b>XH46Q0</b>	<b>True histiocytic lymphoma</b>
<b>XH8J76</b>	<b>Langerhans cell sarcoma</b>

<b>XH7UM7</b>	<b>Interdigitating dendritic cell sarcoma</b>
	<i>Inclusions:</i> Interdigitating cell sarcoma
<b>XH8Q19</b>	<b>Dendritic cell sarcoma, NOS</b>
<b>XH3ZM0</b>	<b>Indeterminate dendritic cell tumour</b>
<b>XH1JT6</b>	<b>Follicular dendritic cell sarcoma</b>
<b>XH6ZR5</b>	<b>Follicular dendritic cell tumour</b>
<b>XH0124</b>	<b>Fibroblastic reticular cell tumour</b>
<b>XH75E6</b>	<b>Eosinophilic granuloma</b>

Neoplasms of histiocytes and accessory lymphoid cells, uncertain whether benign or malignant

*Coded Elsewhere:* Erdheim-Chester disease (XH1VJ3)

<b>XH0RF4</b>	<b>Langerhans cell histiocytosis, monostotic</b>
<b>XH2PY9</b>	<b>Langerhans cell histiocytosis, polyostotic</b>
<b>XH1J18</b>	<b>Langerhans cell histiocytosis</b>

### Dimensions of injury

A grouping for dimensions of injury that are supplementary to the fully specified injury chapter codes, i.e. concepts that can not, or are likely to not be able to be used as a standalone code in mortality or morbidity-coded data.

#### Dimensions of Burns

Burns classified according to extent of body surface involved

<b>XJ4PF</b>	<b>Burns involving less than 10% of body surface</b>
<b>XJ4NH</b>	<b>Burns involving less than 5% of body surface</b>
<b>XJ7TR</b>	<b>Burns involving 5-9% of body surface</b>
<b>XJ257</b>	<b>Burns involving 10-19% of body surface</b>
<b>XJ5GA</b>	<b>Burns involving 20-29% of body surface</b>
<b>XJ7ZW</b>	<b>Burns involving 30-39% of body surface</b>
<b>XJ3R2</b>	<b>Burns involving 40-49% of body surface</b>
<b>XJ19C</b>	<b>Burns involving 50-59% of body surface</b>

<b>XJ4B7</b>	<b>Burns involving 60-69% of body surface</b>
<b>XJ7F7</b>	<b>Burns involving 70-79% of body surface</b>
<b>XJ1HD</b>	<b>Burns involving 80-89% of body surface</b>
<b>XJ9JX</b>	<b>Burns involving 90% or more of body surface</b>

Extent of body surface with full thickness or deep full thickness burn

<b>XJ31W</b>	<b>Full thickness or deep full thickness burn involving less than 10% of body surface</b>
<b>XJ243</b>	<b>Full thickness or deep full thickness burn involving less than 5% of body surface</b>
<b>XJ4FJ</b>	<b>Full thickness or deep full thickness burn involving 5-9% of body surface</b>
<b>XJ82Z</b>	<b>Full thickness or deep full thickness burn involving 10-19% of body surface</b>
<b>XJ3XZ</b>	<b>Full thickness or deep full thickness burn involving 20-29% of body surface</b>
<b>XJ1NG</b>	<b>Full thickness or deep full thickness burn involving 30-39% of body surface</b>
<b>XJ4CR</b>	<b>Full thickness or deep full thickness burn involving 40-49% of body surface</b>
<b>XJ9MY</b>	<b>Full thickness or deep full thickness burn involving 50-59% of body surface</b>
<b>XJ8E0</b>	<b>Full thickness or deep full thickness burn involving 60-69% of body surface</b>
<b>XJ68M</b>	<b>Full thickness or deep full thickness burn involving 70-79% of body surface</b>
<b>XJ9UE</b>	<b>Full thickness or deep full thickness burn involving 80-89% of body surface</b>
<b>XJ3MB</b>	<b>Full thickness or deep full thickness burn involving 90% or more of body surface</b>

Outcome of deep full thickness or complex burn

Whether a deep full thickness or complex burn has resulted in the loss of a limb.

<b>XJ71T</b>	<b>Deep full thickness or complex burn with no loss of limb</b>
--------------	---

- XJ6NX** **Deep full thickness or complex burn with loss of digit**  
Loss of digit or digits (toes or fingers including thumbs) either by surgical amputation necessitated by the burn, or through complete physical destruction as a result of a burn.
- XJ36Y** **Deep full thickness or complex burn with loss of limb**  
Loss of limb or limbs (arms or legs) either by surgical amputation necessitated by the burn, or through complete physical destruction as a result of a burn.

Joint involvement in fracture

- XJ5GS** **Fracture extends into joint**  
Fracture involves articular surface or surfaces.
- XJ5L7** **Fracture extends into joint and a portion of the articular part remains attached to the main part of the bone**  
*Inclusions:* partial articular fractures
- XJ92H** **Fracture extends into joint and the entire articular part is detached from the main part of the bone**
- XJ5VJ** **Fracture does not extend into joint**  
Fractures that do not involve an articular surface.

Open fracture or closed fracture

- XJ44E** **Closed fracture**
- XJ7YM** **Open fracture**

Fracture types

- XJ36W** **Avulsion fracture**
- XJ2EL** **Bucket handle or corner fracture**
- XJ76E** **Buckle fracture**
- XJ7ZH** **Burst fracture**
- XJ1Z6** **Comminuted fracture**
- XJ1PP** **Compound fracture**
- XJ778** **Compression fracture**
- XJ9UB** **Depressed fracture**
- XJ69V** **Dislocated fracture**
- XJ8PQ** **Displaced fracture**

XJ0QE	Elevated fracture
XJ5N9	Fissured fracture
XJ45W	Greenstick fracture
XJ7AT	Impacted fracture
XJ4PE	Infected fracture
XJ392	Linear fracture
XJ6RL	Longitudinal fracture
XJ4CX	Missile fracture
XJ4FU	Osteochondral fracture
XJ3HH	Physeal fracture
XJ64N	Puncture fracture
XJ909	Simple fracture
XJ9XQ	Slipped epiphysis fracture
XJ967	Spiral fracture
XJ5V7	Transverse fracture
XJ6NA	Wedge fracture
XJ8QL	Fracture with foreign body

Types of superficial injuries

XJ652	Abrasions
XJ8JK	Blister, nonthermal
XJ9NV	Contusion
XJ4D1	External constriction
XJ69A	Insect bite, nonvenomous
XJ06K	Superficial foreign body
XJ3U1	Superficial splinter
XJ1C6	Superficial haematoma

## Dimensions of external causes

Additional aspects of mechanism

<b>XE72E</b>	<b>Exposure to injurious transport event</b>
<b>XE9S7</b>	<b>Exposure to land transport injury event</b>
<b>XE9EE</b>	Exposure to land transport on-road injury event
<b>XE8TM</b>	Exposure to land transport off-road injury event
<b>XE3S3</b>	<b>Exposure to railway transport injury event</b>
<b>XE85L</b>	<b>Exposure to water transport injury event</b>
<b>XE5XH</b>	<b>Exposure to air or space transport injury event</b>
<b>XE3Y8</b>	<b>Exposure to fall</b>
<b>XE8J4</b>	<b>Exposure to fall on the same level or from less than 1 metre</b>
<b>XE3QG</b>	<b>Exposure to fall from a height of 1 metre or more</b>
<b>XE4U1</b>	<b>Exposure to person, animal or plant</b>
<b>XE1TU</b>	<b>Exposure to being struck, kicked, or bumped</b>
<b>XE0VW</b>	<b>Exposure to being stepped on or crushed</b>
<b>XE359</b>	<b>Exposure to being bitten</b>
<b>XE9PG</b>	<b>Exposure to being scratched or clawed</b>
<b>XE972</b>	<b>Exposure to being stung or envenomated</b>
<b>XE214</b>	<b>Exposure to object, not elsewhere classified</b>
<b>XE2YW</b>	<b>Exposure to being struck by projectile from firearm</b>
<b>XE4UV</b>	<b>Exposure to being struck by moving object</b>
<b>XE6LQ</b>	<b>Exposure to being struck against stationary object</b>
<b>XE20S</b>	<b>Exposure to being cut or pierced by sharp object</b>
<b>XE59C</b>	<b>Exposure to being struck by blunt object</b>
<b>XE4FE</b>	<b>Exposure to being caught, crushed, jammed or pinched between objects</b>
<b>XE64Q</b>	<b>Exposure to immersion, submersion or falling into water</b>
<b>XE72F</b>	<b>Exposure to drowning or submersion, while in body of water</b>
<b>XE1AF</b>	<b>Exposure to drowning or submersion, following fall into body of water</b>
<b>XE8NX</b>	<b>Exposure to threat to breathing</b>

XE9N2	Exposure to threat to breathing by suffocation from object covering mouth or nose
XE9LA	Exposure to threat to breathing by hanging
XE17S	Exposure to threat to breathing by strangulation
XE2NR	Exposure to threat to breathing by external compression of airways or chest
XE33X	Exposure to threat to breathing by inhalation or ingestion of gastric contents
XE2PV	Exposure to threat to breathing by inhalation or ingestion of liquids
XE5QH	Exposure to threat to breathing by inhalation or ingestion of food
XE9RJ	Exposure to threat to breathing by inhalation or ingestion of other objects or materials
XE2DJ	Exposure to threat to breathing from low oxygen environment
<b>XE6JM</b>	<b>Exposure to thermal mechanism</b>
XE0S0	Exposure to uncontrolled fire
XE5WP	Exposure to controlled fire
XE9T8	Exposure to ignition, or melting of material
XE494	Exposure to hot object or liquid
XE515	Exposure to steam, hot vapour, air or gases
XE00Z	Exposure to excessive heat
XE4AY	Exposure to excessive cold
<b>XE3SH</b>	<b>Exposure to or harmful effects of substances</b>
XE13E	Poisoning or toxic effect of exposure to substance
XE1SS	Corrosion due to exposure to substance

#### Exposure to other mechanism

<b>XE202</b>	Foreign body in orifice
<b>XE8A0</b>	Exposure to electric current
<b>XE8DS</b>	Exposure to sunlight
<b>XE60C</b>	Exposure to radiation
XE82Y	Exposure to welding light
XE436	Exposure to other visible and ultraviolet light of man-made sources
XE500	Exposure to ultraviolet radiation

<b>XE6JQ</b>	<b>Exposure to other non-ionizing radiation</b>
<b>XE6VK</b>	Exposure to microwave radiation
<b>XE9G0</b>	Exposure to infrared radiation
<b>XE5PJ</b>	<b>Exposure to ionizing radiation</b>
<b>XE5DF</b>	<b>Exposure to high or low air pressure or changes in air pressure</b>
<b>XE4ZB</b>	<b>Exposure to changes in air pressure</b>
<b>XE07M</b>	<b>Exposure to high air pressure</b>
<b>XE67J</b>	<b>Exposure to low air pressure</b>
<b>XE9Y8</b>	<b>Exposure to explosion</b>
<b>XE22U</b>	<b>Exposure to chemical explosion</b>
<b>XE27P</b>	<b>Exposure to explosion or rupture of pressurised materials or object</b>
<b>XE7Y1</b>	<b>Exposure to noise</b>
<b>XE3RX</b>	<b>Exposure to vibration</b>
<b>XE7BT</b>	<b>Exposure to suction</b>
<b>XE7SS</b>	<b>Lack of food</b>
<b>XE3WS</b>	<b>Lack of water</b>
<b>XE4TW</b>	<b>Exposure to physical overexertion</b>
<b>XE67Q</b>	<b>Exposure to other specified privation</b>
<b>XE42R</b>	<b>Abandonment</b>
<b>XE00G</b>	<b>Neglect</b>

Activity when injured

<b>XE545</b>	<b>Paid work</b>
<b>XE7NW</b>	<b>Travelling to or from paid work</b>
<b>XE9Q2</b>	<b>Travelling in the course of paid work</b>
<b>XE2QJ</b>	<b>Repetitive forceful work</b>
<b>XE88E</b>	<b>Extended periods of work in a kneeling position</b>
<b>XE714</b>	<b>Extended periods of work in a squatting position</b>
<b>XE8VF</b>	<b>Unpaid work</b>
<b>XE1C6</b>	<b>Travelling to or from unpaid work</b>

<b>XE3RL</b>	<b>Travelling in the course of unpaid work</b>
<b>XE9ME</b>	<b>Unpaid cleaning, cooking or maintenance at own place of residence</b>
<b>XE729</b>	<b>Educational activity</b>
<b>XE3HD</b>	<b>Physical education class, school sports</b>
	<i>Exclusions:</i> Sports, recreation or leisure activity (XE5UF-XE5C9)
<b>XE4SM</b>	<b>Travelling to or from educational activity</b>

Sports, recreation or leisure activity

<b>XE5UF</b>	<b>Organised sports and exercise during leisure time</b>
	<i>Exclusions:</i> Physical education class, school sports (XE3HD)
	Travelling to or from paid work (XE7NW)
	Leisure or play (XE617)
<b>XE617</b>	<b>Leisure or play</b>
	<i>Exclusions:</i> Unpaid work (XE8VF)
<b>XE5C9</b>	<b>Other specified sports and exercise during leisure time</b>
	<i>Exclusions:</i> Organised sports and exercise during leisure time (XE5UF)
	Leisure or play (XE617)
	Travelling to or from paid work (XE7NW)
	Physical education class, school sports (XE3HD)

Being taken care of

<b>XE245</b>	<b>Being taken care of by health care professional</b>
<b>XE2EZ</b>	<b>Being taken care of by non health care person</b>
	<i>Exclusions:</i> Leisure or play (XE617)
<b>XE643</b>	<b>Being taken care of by a person, not specified as a health care professional or non health care person</b>
	<i>Exclusions:</i> Leisure or play (XE617)

Aspects of place of injury occurrence

## Type of place

<b>XE266</b>	<b>Home</b>
	<b><i>Exclusions:</i></b> Residential institution (XE9DC) Prison (XE30E) Sidewalk (XE53A) Building under construction (XE11T) Demolition site (XE0Z7) Nursing home (XE498)
<b>XE9XY</b>	<b>Detached house</b>
<b>XE9P0</b>	<b>Terrace house or row house</b>
<b>XE7DU</b>	<b>Apartment or flat</b>
<b>XE7F8</b>	<b>Farmhouse</b>
<b>XE1LE</b>	<b>Residential caravan, mobile home, houseboat or motor home</b>
<b>XE3ZC</b>	<b>Hut</b>
<b>XE6X4</b>	<b>Boarding house or hotel</b>
<b>XE9DC</b>	<b>Residential institution</b>
<b>XE8PL</b>	<b>Home for the elderly</b>
	<b><i>Exclusions:</i></b> Nursing home (XE498)
<b>XE498</b>	<b>Nursing home</b>
	<b><i>Exclusions:</i></b> Home for the elderly (XE8PL)
<b>XE30E</b>	<b>Prison</b>
<b>XE8BC</b>	<b>Shelter for battered women and their children</b>
<b>XE138</b>	<b>Military institution</b>
	<b><i>Exclusions:</i></b> Hospital (XE28K) Prison (XE30E)
<b>XE9VC</b>	<b>Medical service area</b>
	<b><i>Exclusions:</i></b> Residential institution (XE9DC) Building under construction (XE11T)
<b>XE28K</b>	<b>Hospital</b>
	<b><i>Exclusions:</i></b> Nursing home (XE498)
<b>XE8DZ</b>	<b>Outpatient clinic or health centre</b>

<b>XE86F</b>	<b>Health professionals' office</b>
<b>XE9ZD</b>	<b>Hospice</b>
<b>XE6TU</b>	<b>School or educational area</b>
	<i>Exclusions:</i> Building under construction (XE11T)
<b>XE3JM</b>	<b>Child centre or day care centre</b>
<b>XE9LH</b>	<b>Preschool or kindergarten</b>
<b>XE1ZF</b>	<b>Primary school</b>
<b>XE3CZ</b>	<b>Secondary school</b>
<b>XE9BK</b>	<b>College or university</b>
<b>XE1JM</b>	<b>Adult education institution</b>
<b>XE7K0</b>	<b>Sports and athletics area</b>
	<i>Exclusions:</i> Home (XE266)
<b>XE9WC</b>	<b>Outdoor sporting grounds</b>
<b>XE1CY</b>	<b>Indoor sporting hall</b>
	<i>Exclusions:</i> Outdoor sporting grounds (XE9WC)
<b>XE3YG</b>	<b>Public swimming centre</b>
<b>XE8BN</b>	<b>Racetrack or racecourse</b>
<b>XE2LU</b>	<b>Equestrian facility</b>
<b>XE7QG</b>	<b>Skating rink or ice palace</b>
	<i>Exclusions:</i> Roadway (XE6NQ) Area of still water (XE0ZP) Sidewalk (XE53A)
<b>XE7WU</b>	<b>Skiing or snowboarding area</b>
<b>XE5NE</b>	<b>Public highway, street or road</b>
<b>XE6NQ</b>	<b>Roadway</b>
<b>XE53A</b>	<b>Sidewalk</b>
	<i>Exclusions:</i> Home (XE266)
<b>XE4U4</b>	<b>Cycleway</b>
<b>XE5KY</b>	<b>Transport area other than highway, street or road</b>
<b>XE3NV</b>	<b>Parking area</b>
<b>XE4N9</b>	<b>Public transport area or facility</b>

<b>XE7T4</b>	<b>Industrial or construction area</b>
<b>XE11T</b>	<b>Building under construction</b>
<b>XE0Z7</b>	<b>Demolition site</b>
<b>XE3U5</b>	<b>Factory or plant</b>
	<i>Exclusions:</i> Home (XE266)
<b>XE0Y1</b>	<b>Mine or quarry</b>
<b>XE7GD</b>	<b>Oil or gas extraction facility</b>
<b>XE7MT</b>	<b>Shipyard</b>
<b>XE8Q1</b>	<b>Power station</b>
<b>XE9CS</b>	<b>Farm or other place of primary production</b>
	<i>Exclusions:</i> Home (XE266)
<b>XE1ES</b>	<b>Area for growing crops, market gardening, horticulture</b>
	<i>Exclusions:</i> Area for growing crops combined with raising and care of animals (XE9C6)
<b>XE54N</b>	<b>Area for raising or care of animals</b>
<b>XE9WB</b>	<b>Animal stables</b>
<b>XE9C6</b>	<b>Area for growing crops combined with raising and care of animals</b>
<b>XE1WL</b>	<b>Place for socialising and consumption of alcoholic drinks</b>
<b>XE03P</b>	<b>Bar, pub, saloon or other commercial place primarily for provision of alcoholic drinks</b>
<b>XE7Y2</b>	<b>Nightclub, restaurant or other commercial place for socialising and recreation</b>
<b>XE7GY</b>	<b>Recreational area, cultural area, or public building</b>
<b>XE0AJ</b>	<b>Public playground</b>
	<i>Exclusions:</i> Home (XE266)
<b>XE35Q</b>	<b>Amusement park or theme park</b>
<b>XE5C2</b>	<b>Public park</b>
	<i>Exclusions:</i> Countryside (XE5JL)
<b>XE774</b>	<b>Non-cultural public building</b>
	<i>Exclusions:</i> Prison (XE30E)
<b>XE4TG</b>	<b>Holiday park or campground</b>
<b>XE0ES</b>	<b>Public religious place</b>
<b>XE48U</b>	<b>Commercial area (non-recreational)</b>

<b>XE319</b>	<b>Shop or store</b>
<b>XE058</b>	<b>Café or fast food outlet</b>
<b>XE543</b>	<b>Commercial garage</b>
	<b><i>Exclusions:</i></b> Home (XE266)
	Parking area (XE3NV)
<b>XE58T</b>	<b>Office building</b>
	<b><i>Exclusions:</i></b> Health professionals' office (XE86F)
<b>XE5JL</b>	<b>Countryside</b>
<b>XE0ZP</b>	<b>Area of still water</b>
	<b><i>Exclusions:</i></b> Beach, shore or bank of a body of water (XE010)
	Large area of water (XE93X)
<b>XE17F</b>	<b>Stream of water</b>
	<b><i>Exclusions:</i></b> Beach, shore or bank of a body of water (XE010)
<b>XE93X</b>	<b>Large area of water</b>
	<b><i>Exclusions:</i></b> Area of still water (XE0ZP)
	Beach, shore or bank of a body of water (XE010)
<b>XE5TX</b>	<b>Marsh or swamp</b>
	<b><i>Exclusions:</i></b> Beach, shore or bank of a body of water (XE010)
<b>XE010</b>	<b>Beach, shore or bank of a body of water</b>
<b>XE6AV</b>	<b>Forest</b>
<b>XE601</b>	<b>Desert</b>
<b>XE2BE</b>	<b>Out-of-hospital</b>
<b>XE36S</b>	<b>In-hospital</b>

#### Part of place

<b>XE2XM</b>	<b>Part of building or grounds, bathroom, toilet</b>
<b>XE4XM</b>	<b>Part of building or grounds, kitchen</b>
<b>XE1M5</b>	<b>Part of building or grounds, living room</b>
<b>XE8RZ</b>	<b>Part of building or grounds, bedroom</b>
<b>XE45Z</b>	<b>Part of building or grounds, playroom or family room</b>
<b>XE051</b>	<b>Part of building or grounds, office or home office</b>
<b>XE115</b>	<b>Part of building or grounds, classroom</b>

XE70Z	Part of building or grounds, canteen or cafeteria
XE4U5	Part of building or grounds, balcony
XE2NQ	Part of building or grounds, stairs
XE9L8	Part of building or grounds, elevator
XE6ZJ	Part of building or grounds, corridor
XE3R6	Part of building or grounds, lobby
XE3DE	Part of building or grounds, garden or yard
	<i>Exclusions:</i> Part of building or grounds, tennis court (XE7DE) Part of building or grounds, swimming pool (XE4PW)
XE2Q4	Part of building or grounds, garage
XE65J	Part of building or grounds, driveway
XE4PW	Part of building or grounds, swimming pool
XE7DE	Part of building or grounds, tennis court
XE9DN	Part of building or grounds, other specified sporting facility
XE8SG	Part of building or grounds, playground
XE5RE	Part of building or grounds, private road
XE5MW	Part of building or grounds, private parking area
XE6ZY	Part of building or grounds, other specified indoor part of building or grounds
XE06N	Part of building or grounds, other specified outdoor part of building or grounds

Objects, living things or substances involved in causing injury

**Coded Elsewhere:** Health Devices, Equipment and Supplies (XD7FF9-XD6UU3)  
Substances (XM1349-XM7XM0)

## Land vehicle or means of land transport

<b>XE81T</b>	<b>Person-powered means of transport</b>
<b>XE38Y</b>	<b>Transport vehicle drawn or pushed by person</b>
<b>XE94Q</b>	<b>Pedal cycle</b>
<b>XE1MP</b>	<b>Animal-powered means of transport</b>
<b>XE0ZZ</b>	<b>Animal being ridden</b>

XE1CF	Animal-drawn vehicle
<b>XE3ZP</b>	<b>Motorised two- or three-wheeled vehicle</b>
XE0TY	Motorcycle
XE9N6	Moped, scooter
XE9AX	Three-wheeled motor vehicle or scooter
<b>XE3GH</b>	<b>Light transport vehicle with four or more wheels</b>
XE50Z	Passenger car
XE4BF	Light truck, Sports Utility Vehicle (SUV), utility van, 4x4 vehicle, jeep, pick-up truck
XE6DC	Minibus
<b>XE4NR</b>	<b>Heavy transport vehicle with four or more wheels</b>
XE60G	Bus, coach
XE8XB	Tractor-trailer, articulated lorry, 18-wheeler, rig
XE5A8	Heavy truck, not elsewhere classified
XE5KW	Trailer or horse-float
<b>XE0ZK</b>	<b>Rail vehicle</b>
XE40X	Streetcar, tram, electric car, car trolley
XE9Q3	Train
XE3P6	Funicular, monorail, or other similar rail vehicle
<b>XE0YD</b>	<b>Parts or components of land vehicle or means of land transport</b>
XE954	Vehicle doors, not elsewhere classified
XE226	Vehicle seat belts, deploying air bags
XE8UK	Tyre (tire) or battery (attached or unattached)
XE8CT	Vehicle window or windshield
XE1LF	Interior of vehicle
XE5D5	Engine of vehicle
<b>XE3C0</b>	<b>Certain specified land vehicle or means of land transport</b>
XE8KJ	Cable car, ski chair lift, ski lift with gondola
XE8C8	Motorized wheelchair
XE4D7	Small-sized motorized vehicles for children
XE3FP	Motor home

Mobile machinery or special purpose vehicle

<b>XE7X0</b>	<b>Mobile machinery or special purpose vehicle mainly used in agriculture</b>
XE9HQ	Ride-on lawn mower
XE0S2	Tractor
XE0YP	Harvesting machine
XE7SF	Auger, post hole digger
XE0LF	Equipment towed or powered by tractors, not elsewhere classified
<b>XE0M8</b>	<b>Mobile machinery or special purpose vehicle mainly used in industry</b>
XE21P	Forklift or lift truck
XE8TB	Mobile crane
XE6VY	Battery-powered airport passenger vehicle
XE13Q	Logging car
XE6B4	Coal-car in mine
XE1BG	Tram, truck, or tub in mine or quarry
<b>XE1GE</b>	<b>Mobile machinery or special purpose vehicle mainly used in construction</b>
XE4MS	Grader
XE69J	Front-end loader, bulldozer
XE6XP	Excavator, digger, mechanical shovel
XE3GR	Road roller
<b>XE381</b>	<b>Certain specified mobile machinery or special purpose vehicle</b>
XE80A	Ambulance
XE5BQ	Fire truck, fire engine
XE387	Race car
XE2LT	Snowmobile, ski-scooter
XE6R9	Special all-terrain vehicle or off-road vehicle

Watercraft or means of water transport

<b>XE70T</b>	<b>Powered watercraft or means of water transport</b>
XE7NQ	Merchant ship, cargo ship, oil tanker

XE3HS	<b>Passenger ship, passenger liner, ocean liner</b>
XE801	<b>Fishing boat, trawler</b>
XE69F	<b>Ferry used for short trips across closed waters</b>
XE3WZ	<b>Motorised yacht, motorboat, powered boat, personal powered watercraft</b>
XE304	<b>Houseboat</b>
XE5ZR	<b>Hovercraft</b>
XE3PW	<b>Airboat</b>
XE4UQ	<b>Submarine or related craft</b>
<b>XE29V</b>	<b>Unpowered watercraft or means of water transport</b>
XE9SF	<b>Sailboat, unpowered yacht</b>
XE8BZ	<b>Canoe, kayak, row boat, pirogue, piragua</b>
XE3CC	<b>Wave board, surfboard, paddle ski</b>
XE3LU	<b>Windsurfer</b>
<b>XE5G3</b>	<b>Part or component of powered or unpowered watercraft</b>

Aircraft or means of air transport

<b>XE9LQ</b>	<b>Powered aircraft or means of air transport</b>
XE4LN	<b>Helicopter</b>
XE8RL	<b>Airship, blimp</b>
XE0WR	<b>Ultralight powered aircraft</b>
XE7MP	<b>Private fixed-wing powered aircraft</b>
XE7FK	<b>Commercial fixed-wing powered aircraft</b>
XE6FD	<b>Military fixed-wing powered aircraft</b>
XE346	<b>Spacecraft</b>
<b>XE4QU</b>	<b>Unpowered aircraft or means of air transport</b>
XE96T	<b>Passenger balloon, unpowered</b>
XE627	<b>Parachute</b>
XE3VU	<b>Hang-glider</b>
XE2KU	<b>Glider</b>
<b>XE79E</b>	<b>Part or component of powered or unpowered aircraft</b>

<b>XE5HA</b>	<b>Furniture or furnishing</b>
<b>XE8PK</b>	<b>Bed, bedding or bedding accessories</b>
<b>XE86G</b>	Bunk bed
<b>XE7QQ</b>	Special bed, orthopaedic bed, or stretcher
<b>XE27V</b>	Hammock
<b>XE0TM</b>	Mattress, sleeping mat
<b>XE2DR</b>	Other specified bed
<b>XE6R1</b>	Pillow, cushion
<b>XE38G</b>	Bed rails
<b>XE769</b>	<b>Chair or sofa</b>
<b>XE33K</b>	Upholstered chair or sofa
<b>XE853</b>	Hard chair or bench
<b>XE5NL</b>	Rocking or gliding chair
<b>XE1NC</b>	Folding chair
<b>XE7FS</b>	Revolving chair
<b>XE484</b>	Stool
<b>XE61B</b>	Commode chair
<b>XE2F3</b>	<b>Table, stand, cupboard, shelf or partition</b>
<b>XE002</b>	Rack, bookshelf
<b>XE3BY</b>	Cabinet, cupboard, side board, chest of drawers, tall boy, dresser
<b>XE1DK</b>	Dining room or kitchen table
<b>XE6E5</b>	Coffee table
<b>XE2C9</b>	Night table, end table
<b>XE2AM</b>	Desk, workbench
<b>XE3TY</b>	Television table, stand, cupboard
<b>XE6EN</b>	Folding table
<b>XE4B1</b>	Room divider or partition
<b>XE7MK</b>	<b>Decoration, decorating item</b>
<b>XE3WK</b>	Rug, mat, loose carpet
<b>XE003</b>	Draperies, curtains

<b>XE92A</b>	Roller or venetian blind or indoor shutter
<b>XE3EA</b>	Window covering hardware
<b>XE962</b>	Mirror or mirror glass
<b>XE05Q</b>	Portrait, picture, picture frame, or other wall hanging or similar decoration
<b>XE1FR</b>	Christmas tree
<b>XE4CE</b>	Holiday decorations
<b>XE8RW</b>	<b>Infant or child product</b>
<b>XE1AW</b>	<b>Baby or child article</b>
<b>XE0CS</b>	Baby pram, buggy, pusher, stroller, carriage
<b>XE4JE</b>	Baby walker
<b>XE8U9</b>	Baby exerciser, jumper, or portable swing for home use
<b>XE39K</b>	High chair, booster seat
<b>XE52H</b>	Baby or child car seat
<b>XE9MB</b>	Potty chair, training seat
<b>XE8RG</b>	Cot, crib, baby bed
<b>XE5QK</b>	Playpen, travel yard
<b>XE12N</b>	Baby gate or barrier
<b>XE34A</b>	Baby carrier, back pack type
<b>XE8HU</b>	Pedal cycle baby carrier
<b>XE8VC</b>	Baby baths or bathinettes
<b>XE49V</b>	Baby or child changing table
<b>XE9R1</b>	Baby or child pacifier, dummy
<b>XE1JQ</b>	Baby bottle or nipple

Aspects of transport injury events

#### Mode of transport of person injured in transport event

Collective term for forms of transportation. Includes types of vehicle; walking and other aspects of being a pedestrian (e.g. lying on a road); and using a pedestrian conveyance.

- |              |   |
|--------------|---|
| <b>XE88K</b> | <b>Pedestrian as mode of transport of person injured in transport event</b><br>A pedestrian is any person involved in a transport crash who was not in or on a vehicle or pedestrian conveyance at the time.  |
| <b>XE645</b> | <b>Person on foot injured in transport related event</b>  |
| <b>XE0HE</b> | <b>Person on foot standing, walking or running at the time of the crash</b>   |
| <b>XE7ZY</b> | <b>Pedestrian conveyance as mode of transport of person injured in transport event</b><br>A device which is designed primarily for, or being used at the time primarily for, conveying the person and is not a transport vehicle.                                   |
| <b>XE0TE</b> | <b>Mobility scooter as mode of transport of person injured in transport related event</b><br>A mobility scooter is a pedestrian conveyance which is a motorised mobility aid, designed for outdoor or indoor/outdoor use to convey one person in a seated position. |
| <b>XE80N</b> | <b>Motorised wheelchair as mode of transport of person injured in transport related event</b>   |

XE1ZG	<b>Ag bike as mode of transport of person injured in transport related event</b>

**XE2W4****Car as mode of transport of person injured in transport related event**

A land transport motor vehicle designed primarily to seat no more than 9 persons, including the driver, designed primarily for on-road use or so as to be registrable for on-road use. A trailer or caravan being towed by a car is considered a part of the car. Usually has four wheels.

**XE0V3****4x4 vehicle as mode of transport of person injured in transport related event**

**Exclusions:** Minibus or passenger van as mode of transport of person injured in transport related event (XE6PF)

Light transport vehicle with four or more wheels used in sport and leisure activities as mode of transport of person injured in transport related event (XE2TP)

**XE2TP**

**Light transport vehicle with four or more wheels used in sport and leisure activities as mode of transport of person injured in transport related event**

**XE9K7**

**Microcar as mode of transport of person injured in transport related event**

**XE62M**

**Motor car as mode of transport of person injured in transport related event**

**XE85J**

**Station wagon as mode of transport of person injured in transport related event**

**XE7LL**

**Minivan as mode of transport of person injured in transport related event**

**XE1CK**

**Jeep as mode of transport of person injured in transport related event**

**XE5X0**

**Sport utility vehicle as mode of transport of person injured in transport related event**

**XE2RA****Bus or coach as mode of transport of person injured in transport related event**

A passenger motor vehicle designed to carry 10 or more persons (including the driver). Buses may be designed to accommodate standing passengers and/or seated passengers.

**XE9JB****Light goods vehicle as mode of transport of person injured in transport related event**

A light goods vehicle is a four- or six-wheeled motor vehicle designed primarily for carrying property on roads, weighing less than the local limit for classification as a heavy goods vehicle (usually less than 3500 kg), and not requiring a special driver's licence.

**XE6PF**

**Minibus or passenger van as mode of transport of person injured in transport related event**

**Exclusions:** Light transport vehicle with four or more wheels used in sport and leisure activities as mode of transport of person injured in transport related event (XE2TP)

4x4 vehicle as mode of transport of person injured in transport related event (XE0V3)

XE165	<b>Pick-up truck, goods or work van, ambulance, motor home as mode of transport of person injured in transport related event</b>
	<b><i>Exclusions:</i></b> 4x4 vehicle as mode of transport of person injured in transport related event (XE0V3)
	Minibus or passenger van as mode of transport of person injured in transport related event (XE6PF)
<b>XE1PH</b>	<b>Heavy goods vehicle as mode of transport of person injured in transport related event</b>
	A heavy goods vehicle is a motor vehicle designed primarily for carrying property on roads, meeting local criteria for classification as a heavy goods vehicle in terms of curbside weight (usually above 3500 kg), and usually requiring a special driver's licence.
XE10A	<b>Trucks, lorries, and other heavy goods vehicle as mode of transport of person injured in transport related event</b>
	<b><i>Exclusions:</i></b> Pick-up truck, goods or work van, ambulance, motor home as mode of transport of person injured in transport related event (XE165)
XE1VN	<b>Fire brigade pump vehicle as mode of transport of person injured in transport related event</b>

XE5ET	<b>Truck with trailer as mode of transport of person injured in transport related event</b>
<b>XE41E</b>	<b>Streetcar or tram as mode of transport of person injured in transport related event</b>
	A streetcar or tram is a device running on rails and operated entirely or partly on roads. Streetcars and trams are used primarily for transporting persons, usually in urban and suburban places. A trailer being towed by a streetcar or tram is considered a part of the streetcar.
<b>XE5WB</b>	<b>Low-powered passenger vehicle as mode of transport of person injured in transport event</b>
	(1) A land transport motor vehicle with three wheels (usually one in front and two behind), designed primarily for on-road use. Globally, most commonly used as taxis. Design, construction, type of motor and registration/licensing requirements vary widely. (2) A low-powered quadricycle or other low-powered four-wheeled passenger vehicle that is not a car.
XE8DK	<b>Tuk-tuk as mode of transport of person injured in transport related event</b>
XE1DF	<b>Mototaxi as mode of transport of person injured in transport related event</b>
XE4SA	<b>Auto rickshaw three-wheeler as mode of transport of person injured in transport related event</b>

<b>XE35C</b>	<b>Special vehicle mainly used in agriculture as mode of transport of person injured in transport related event</b> A motor vehicle designed specifically for use in farming and agriculture (horticulture), for example to work the land, tend and harvest crops and transport materials on the farm.
<b>XE3WV</b>	<b>Self-propelled agricultural machine as mode of transport of person injured in transport related event</b>
<b>XE3QK</b>	<b>Harvester as mode of transport of person injured in transport related event</b>
<b>XE872</b>	<b>Agricultural tractor as mode of transport of person injured in transport related event</b> A motor vehicle designed primarily to provide mechanical power for use in farming and agriculture (horticulture).
<b>XE885</b>	<b>Special vehicle mainly used on industrial premises as mode of transport of person injured in transport related event</b> A motor vehicle designed primarily for use within the buildings and premises of industrial or commercial establishments.
<b>XE31K</b>	<b>Fork lift truck as mode of transport of person injured in transport related event</b>
<b>XE312</b>	<b>Special construction vehicle as mode of transport of person injured in transport related event</b> A motor vehicle designed specifically for use in the construction (or demolition) of roads, buildings and other structures or associated earth-moving.
<b>XE5RK</b>	<b>Special all-terrain vehicle as mode of transport of person injured in transport related event</b> A vehicle designed primarily for off-road use with capability to traverse a wide range of types of terrain by means of wheels, tracks, support on a cushion of air or other form of support/traction.
<b>XE63N</b>	<b>Snowmobile as mode of transport of person injured in transport related event</b>
<b>XE5U7</b>	<b>Hovercraft operating on land or swamp as mode of transport of person injured in transport related event</b>
<b>XE4MT</b>	<b>Amphibious vehicle on land as mode of transport of person injured in transport related event</b>
<b>XE3SA</b>	<b>Quad bike as mode of transport of person injured in transport related event</b>
<b>XE940</b>	<b>Animal being ridden as mode of transport of person injured in transport related event</b> A person riding on an animal of any type. Includes person directing or attempting to direct the animal and any other person riding on it.
<b>XE1ZJ</b>	<b>Horse as mode of transport of person injured in transport related event</b> A person riding on a horse of any type.

<b>XE4ZZ</b>	<b>Animal drawn vehicle as mode of transport of person injured in transport related event</b> A vehicle on wheels (cart, dray, carriage) or runners (sled) the motive power for which is provided by one or more animals.
<b>XE8YD</b>	<b>Railway vehicle as mode of transport of person injured in transport related event</b> A vehicle, or a coupled set of vehicles (a train), designed for traffic on a railway.
<b>XE1KN</b>	<b>Railway train as mode of transport of person injured in transport related event</b>
<b>XE3NY</b>	<b>Funicular or monorail as mode of transport of person injured in transport related event</b>
<b>XE27K</b>	<b>Watercraft as mode of transport of person injured in transport related event</b> A watercraft is any device for transporting passengers or goods on or in water.
<b>XE4FF</b>	<b>Submarine as mode of transport of person injured in transport related event</b>
<b>XE3QY</b>	<b>Merchant ship as mode of transport of person injured in transport related event</b>
<b>XE9YQ</b>	<b>Passenger ship as mode of transport of person injured in transport related event</b>
<b>XE9PA</b>	<b>Fishing boat or trawler as mode of transport of person injured in transport related event</b>
<b>XE0L4</b>	<b>Sailboat or unpowered yacht as mode of transport of person injured in transport related event</b> <b>Exclusions:</b> Other specified unpowered watercraft as mode of transport of person injured in transport related event (XE36L)
<b>XE4AK</b>	<b>Hovercraft and amphibious vehicles when in or above a body of water as mode of transport of person injured in transport related event</b>
<b>XE5WL</b>	<b>Other specified powered or motorised watercraft as mode of transport of person injured in transport related event</b>
<b>XE36L</b>	<b>Other specified unpowered watercraft as mode of transport of person injured in transport related event</b>
<b>XE1JR</b>	<b>Aircraft as mode of transport of person injured in transport related event</b> Device for transporting passengers or goods in the air by means of buoyancy in air or aerodynamic lift
<b>XE3J3</b>	<b>Balloons and other lighter than air devices as mode of transport of person injured in transport related event</b>
<b>XE2UU</b>	<b>Powered aircraft as mode of transport of person injured in transport related event</b>
<b>XE6SQ</b>	<b>Unpowered aircraft as mode of transport of person injured in transport related event</b>

XE4VS	<b>Parachute used in descent from damaged aircraft as mode of transport of person injured in transport related event</b>
XE08L	<b>Parachute used in descent from undamaged aircraft as mode of transport of person injured in transport related event</b>
XE33H	<b>Glider as mode of transport of person injured in transport related event</b>
XE48X	<b>Helicopter as mode of transport of person injured in transport related event</b>
<b>XE0VS</b>	<b>Spacecraft as mode of transport of person injured in transport related event</b> Device designed for transporting passengers or goods to, from and in places with very low atmospheric pressure.
XE82G	<b>Devices or parts of devices designed for ascent from and landing on earth or the surface of other bodies as mode of transport of person injured in transport related event</b>

#### Vehicle user role of person injured in transport event

<b>XE42A</b>	<b>Vehicle driver injured in transport related event</b>  A driver is an occupant of a transport vehicle who is operating or intending to operate it. Includes rider operating a motorcycle or bicycle, and a rider directing or attempting to direct a ridden animal. An autonomous or remotely-controlled vehicle has no driver.  <b>Exclusions:</b> Person boarding or alighting a vehicle injured in transport related event (XE9Y1)
<b>XE8ZW</b>	<b>Person driving a motor vehicle injured in transport related event</b>
<b>XE65U</b>	<b>Person riding, operating or controlling a motorcycle or pedal cycle injured in transport related event</b>
<b>XE3WH</b>	<b>Person responsible to resume manual control of a vehicle under autonomous or partly autonomous control injured in transport related event</b>
<b>XE8SZ</b>	<b>Person with control of steering and braking in the case of a tandem bicycle or similar vehicle injured in transport related event</b>
<b>XE302</b>	<b>Person directing or attempting to direct an animal injured in transport related event</b>
<b>XE1LZ</b>	<b>Vehicle passenger injured in transport related event</b>  A passenger is any occupant of a transport vehicle, other than the driver, in a position designed for the carriage of people.  <b>Exclusions:</b> Person boarding or alighting a vehicle injured in transport related event (XE9Y1)  Person on outside of vehicle or in load space injured in transport related event (XE166)
<b>XE5X3</b>	<b>Vehicle occupant not otherwise specified</b>
<b>XE3FA</b>	<b>Occupant of position provided for patient in an ambulance</b>

XE9FE	<b>Occupants of wheelchair or mobility scooter located in a position in a motor vehicle provided for carrying such devices</b>
XE9CP	<b>Occupants of area in a bus provided for standing</b>
<b>XE9Y1</b>	<b>Person boarding or alighting a vehicle injured in transport related event</b>  A person boarding [attempting to board] a transport vehicle, or alighting [attempting to alight] from a transport vehicle.
XE76V	<b>Person getting into or out of a vehicle injured in transport related event</b>
XE6LC	<b>Person boarding or alighting from a bus, tram, streetcar or railway vehicle injured in transport related event</b>
<b>XE166</b>	<b>Person on outside of vehicle or in load space injured in transport related event</b>  Any person being transported by a vehicle but not occupying the space normally reserved for the driver or passengers.
XE7FA	<b>Person being transported by a vehicle and occupying space intended for the transport of goods or cargo injured in transport related event</b>
XE4CZ	<b>Person being transported by a vehicle and occupying space on the roof injured in transport related event</b>
XE9X1	<b>Person being transported by a vehicle and occupying space on a running board injured in transport related event</b>
XE7PL	<b>Person being transported by a vehicle and occupying space outside the cabin holding onto the vehicle injured in transport related event</b>
<b>XE6R5</b>	<b>Rider of an animal injured in transport event</b>  A person being transported by and upon an animal, whether controlling the animal or being transported as a passenger.

### Counterpart in land transport crash

The vehicle[s] or other object[s], if any, with which the vehicle conveying the injured person collided in the event that resulted in the injury.

<b>XE6K0</b>	<b>Pedestrian as counterpart in land transport crash</b>  A pedestrian is any person involved in a transport crash who was not in or on a vehicle or pedestrian conveyance at the time.
XE57K	<b>Person on foot as counterpart in land transport crash</b>
XE2ZK	<b>Person using a pedestrian conveyance as counterpart in land transport crash</b>
<b>XE3NU</b>	<b>Pedestrian conveyance as counterpart in land transport crash</b>  A device which is designed primarily for, or being used at the time primarily for, conveying the person and is not a transport vehicle.

<b>XE93R</b>	<b>Mobility scooter as counterpart in land transport crash</b> A pedestrian conveyance which is a motorised mobility aid, designed for outdoor or indoor/outdoor use to convey one person in a seated position.
<b>XE3XF</b>	<b>Wheelchair as counterpart in land transport crash</b>
<b>XE1TJ</b>	<b>Ice skates as counterpart in land transport crash</b>
<b>XE5XW</b>	<b>Skis as counterpart in land transport crash</b>
<b>XE4NZ</b>	<b>Snowboard as counterpart in land transport crash</b>
<b>XE5D9</b>	<b>Sled as counterpart in land transport crash</b>
<b>XE5H4</b>	<b>Skateboard as counterpart in land transport crash</b>
<b>XE9J0</b>	<b>Roller skates as counterpart in land transport crash</b>
<b>XE28X</b>	<b>Scooter as counterpart in land transport crash</b>
<b>XE5SX</b>	<b>Baby carriage as counterpart in land transport crash</b>
<b>XE1ZX</b>	Perambulator as counterpart in land transport crash
<b>XE168</b>	<b>Push chair as counterpart in land transport crash</b>
<b>XE2JL</b>	<b>Stroller as counterpart in land transport crash</b>
<b>XE7ZZ</b>	<b>Pedal cycle as counterpart in land transport crash</b> A pedal-cycle is any land transport vehicle propelled by the muscular energy of the person(s) on that vehicle usually by means of a pedal system but sometimes by lever(s) or handle(s). Includes vehicles with two wheels (the usual number) or more.
<b>XE5GG</b>	<b>Trailer or sidecar attached to a pedal cycle as counterpart in land transport crash</b>
<b>XE2PY</b>	<b>Cycle rickshaw or tri-shaw as counterpart in land transport crash</b>
<b>XE8XQ</b>	<b>Motorcycle as counterpart in land transport crash</b> A motorcycle is a land transport motor vehicle with one or two riding saddles, usually with two-wheels in-line. A sidecar or trailer is considered part of the motorcycle.
<b>XE1SA</b>	<b>Motorised bicycle as counterpart in land transport crash</b> <b>Exclusions:</b> Low powered passenger vehicle as counterpart in land transport crash (XE90S)
<b>XE0V4</b>	<b>Moped as counterpart in land transport crash</b>
<b>XE4C1</b>	<b>Underbone motorcycle as counterpart in land transport crash</b>
<b>XE9FR</b>	<b>Motor scooter as counterpart in land transport crash</b>
<b>XE59J</b>	<b>Ag-bike as counterpart in land transport crash</b>

<b>XE0JH</b>	<b>Car as counterpart in land transport crash</b> A land transport motor vehicle designed primarily to seat no more than 9 persons, including the driver, designed primarily for on-road use or so as to be registrable for on-road use. A trailer or caravan being towed by a car is considered a part of the car. Usually four wheels.
<b>XE0LP</b>	<b>Motorcar as counterpart in land transport crash</b>
<b>XE0HH</b>	<b>Station wagon as counterpart in land transport crash</b>
<b>XE0ZR</b>	Microcar as counterpart in land transport crash
<b>XE0T7</b>	<b>Minivan as counterpart in land transport crash</b> <i>Exclusions:</i> Minibus or passenger van as counterpart in land transport crash (XE0ZL) Light transport vehicle with four or more wheels used in sport and leisure activities as counterpart in land transport crash (XE0MB)
<b>XE38X</b>	<b>4x4 as counterpart in land transport crash</b>
<b>XE6G7</b>	<b>Sport utility vehicle as counterpart in land transport crash</b>
<b>XE3BW</b>	<b>Jeep as counterpart in land transport crash</b>
<b>XE5LJ</b>	<b>Bus or coach as counterpart in land transport crash</b> A passenger motor vehicle designed to carry 10 or more persons (including the driver). Buses may be designed to accommodate standing passengers and/or seated passengers. <i>Exclusions:</i> Minibus or passenger van as counterpart in land transport crash (XE0ZL)
<b>XE6UN</b>	<b>Light goods vehicle as counterpart in land transport crash</b> A light goods vehicle is a four- or six-wheeled motor vehicle designed primarily for carrying property on roads, weighing less than the local limit for classification as a heavy goods vehicle (usually less 3500 kg), and not requiring a special driver's licence.
<b>XE0ZL</b>	<b>Minibus or passenger van as counterpart in land transport crash</b> <i>Exclusions:</i> Light transport vehicle with four or more wheels used in sport and leisure activities as counterpart in land transport crash (XE0MB) Minivan as counterpart in land transport crash (XE0T7) Bus or coach as counterpart in land transport crash (XE5LJ)
<b>XE4DB</b>	<b>Pick-up truck, goods or work van, ambulance or motor home as counterpart in land transport crash</b> <i>Exclusions:</i> Minivan as counterpart in land transport crash (XE0T7) Minibus or passenger van as counterpart in land transport crash (XE0ZL)

<b>XE0MB</b>	<b>Light transport vehicle with four or more wheels used in sport and leisure activities as counterpart in land transport crash</b>
<b>XE854</b>	<b>Heavy goods vehicle as counterpart in land transport crash</b> A heavy goods vehicle is a motor vehicle designed primarily for carrying property on roads, meeting local criteria for classification as a heavy goods vehicle in terms of curbside weight (usually above 3500 kg), and usually requiring a special driver's licence.
<b>XE590</b>	<b>Trucks, lorries, and other heavy goods vehicles as counterpart in land transport crash</b> <b>Exclusions:</b> Pick-up truck, goods or work van, ambulance or motor home as counterpart in land transport crash (XE4DB)
<b>XE4Q6</b>	<b>Truck with trailer as counterpart in land transport crash</b>
<b>XE45E</b>	<b>Road tractor with or without semi-trailer as counterpart in land transport crash</b>
<b>XE3M3</b>	<b>Fire brigade pump vehicle as counterpart in land transport crash</b>
<b>XE8UX</b>	<b>Streetcar or tram as counterpart in land transport crash</b> A streetcar or tram is a device running on rails and operated entirely or partly on roads. Streetcars and trams are used primarily for transporting persons, usually in urban and suburban places. A trailer being towed by a streetcar or tram is considered a part of the streetcar.
<b>XE90S</b>	<b>Low powered passenger vehicle as counterpart in land transport crash</b> (1) A land transport motor vehicle with three wheels (usually one in front and two behind), designed primarily for on-road use. Globally, most commonly used as taxis. Design, construction, type of motor and registration/licensing requirements vary widely. (2) A low-powered quadricycle or other low-powered four-wheeled passenger vehicle that is not a car.
<b>XE9VV</b>	<b>Tuk-tuk as counterpart in land transport crash</b>
<b>XE9ML</b>	<b>Mototaxi as counterpart in land transport crash</b>
<b>XE73V</b>	<b>Auto rickshaw three-wheeler as counterpart in land transport crash</b>
<b>XE9HB</b>	<b>Special vehicle mainly used in agriculture as counterpart in land transport crash</b> A motor vehicle designed specifically for use in farming and agriculture (horticulture), for example to work the land, tend and harvest crops and transport materials on the farm.
<b>XE9HZ</b>	<b>Self-propelled agricultural machine as counterpart in land transport crash</b>
<b>XE6W7</b>	<b>Harvester as counterpart in land transport crash</b>
<b>XE9GD</b>	<b>Agricultural tractor as counterpart in land transport crash</b>

<b>XE9DQ</b>	<b>Special vehicle mainly used on industrial premises as counterpart in land transport crash</b> A motor vehicle designed primarily for use within the buildings and premises of industrial or commercial establishments.
<b>XE1U3</b>	<b>Fork lift truck as counterpart in land transport crash</b>
<b>XE1YW</b>	<b>Special construction vehicle as counterpart in land transport crash</b> A motor vehicle designed specifically for use in the construction (or demolition) of roads, buildings and other structures or associated earth-moving.
<b>XE23Q</b>	<b>Special all-terrain vehicle as counterpart in land transport crash</b> A vehicle designed primarily for off-road use with capability to traverse a wide range of types of terrain by means of wheels, tracks, support on a cushion of air or other form of support/traction.
<b>XE60L</b>	<b>Snowmobile as counterpart in land transport crash</b>
<b>XE28S</b>	<b>Hovercraft operating on land or swamp as counterpart in land transport crash</b>
<b>XE8AH</b>	<b>Amphibious vehicle on land as counterpart in land transport crash</b>
<b>XE9KN</b>	<b>Quad bike as counterpart in land transport crash</b>
<b>XE6QK</b>	<b>Animal as counterpart in land transport crash</b> Any animal struck in a transport crash.
<b>XE7A0</b>	<b>Unattended animal as counterpart in land transport crash</b>
<b>XE22V</b>	<b>Animal being herded as counterpart in land transport crash</b>
<b>XE756</b>	<b>Animal being ridden as counterpart in land transport crash</b>
<b>XE6X8</b>	<b>Animal drawn vehicle as counterpart in land transport crash</b> A vehicle on wheels (cart, dray, carriage) or runners (sled) the motive power for which is provided by one or more animals.
<b>XE6DQ</b>	<b>Railway vehicle as counterpart in land transport crash</b> A vehicle, or a coupled set of vehicles (a train), designed for traffic on a railway.
<b>XE320</b>	<b>Railway train as counterpart in land transport crash</b>
<b>XE1W8</b>	<b>Funicular or monorail as counterpart in land transport crash</b> <b>Exclusions:</b> Other specified mechanism with no counterpart (XE5XB)
<b>XE98X</b>	<b>Fixed or stationary object as counterpart in land transport crash</b> Any object, structure or land conformation struck by a vehicle involved in a transport crash other than a transport vehicle in use, or a pedestrian, or a pedestrian conveyance in use.
<b>XE3KY</b>	<b>Vehicle parked at the side of a road or in a parking lot as counterpart in land transport crash</b>

<b>XE1RC</b>	<b>Small loose object as counterpart in land transport crash</b>
<b>XE9KG</b>	<b>Small or light fixed object as counterpart in land transport crash</b>
<b>XE43C</b>	<b>Large or heavy fixed object as counterpart in land transport crash</b>

#### Other mechanisms of transport injury without counterpart

<b>XE0JJ</b>	<b>Fall in mode of transport without counterpart</b>
<b>XE3M5</b>	<b>Fall from mode of transport without counterpart</b> Transport-related injurious event in which injury was sustained when the person fell from his/her mode of transport and did not involve a crash with a counterpart.
<b>XE64P</b>	<b>Fall from horse without counterpart</b>
<b>XE20L</b>	<b>Fall from motor vehicle without counterpart</b>
<b>XE7JA</b>	<b>Fall from motorcycle without counterpart</b>
<b>XE2K7</b>	<b>Fall from pedal cycle without counterpart</b>
<b>XE929</b>	<b>Fall from pedestrian conveyance without counterpart</b>
<b>XE5XB</b>	<b>Other specified mechanism with no counterpart</b> Transport-related injurious event in which a injury was sustained in an event that did not involve a crash with a counterpart or fall from the mode of transport.
<b>XE5FP</b>	<b>Sudden movement of vehicle, without collision, resulting in injury</b>
<b>XE9K8</b>	<b>Vehicle overturned without counterpart</b>
<b>XE5YL</b>	<b>Vehicle out of control without mention of collision with another vehicle or fixed object</b>

#### Aspects of sports injury events

##### Type of sport or exercise activity

<b>XE3GK</b>	<b>Team ball sports</b>
<b>XE9UG</b>	<b>Type of sport or exercise activity, basketball</b>
<b>XE3T2</b>	<b>Type of sport or exercise activity, football - American tackle</b>
<b>XE31W</b>	<b>Type of sport or exercise activity, football - American touch or flag</b>
<b>XE72L</b>	<b>Type of sport or exercise activity, football - Australian rules</b>
<b>XE3BA</b>	<b>Type of sport or exercise activity, football not otherwise specified</b>
<b>XE7D6</b>	<b>Type of sport or exercise activity, handball - team</b>
<b>XE510</b>	<b>Type of sport or exercise activity, netball</b>

XE9RW	Type of sport or exercise activity, rugby union
XE5XZ	Type of sport or exercise activity, rugby league
XE1XR	Type of sport or exercise activity, rugby not otherwise specified
XE5EU	Type of sport or exercise activity, soccer - outdoor
XE0TN	Type of sport or exercise activity, soccer - indoor
XE8WP	Type of sport or exercise activity, soccer not otherwise specified
XE79M	Type of sport or exercise activity, volleyball
XE0JP	Type of sport or exercise activity, wallyball
<b>XE2BF</b>	<b>Team bat or stick sports</b>
XE84M	Type of sport or exercise activity, baseball
XE5M7	Type of sport or exercise activity, cricket
XE2UD	Type of sport or exercise activity, ice hockey
XE6B7	Type of sport or exercise activity, hockey - street or ball
XE8HB	Type of sport or exercise activity, field hockey
XE9N5	Type of sport or exercise activity, floor hockey
XE02P	Type of sport or exercise activity, hockey not otherwise specified
XE8M1	Type of sport or exercise activity, ringette
XE63E	Type of sport or exercise activity, softball
XE5WM	Type of sport or exercise activity, t-ball
<b>XE2BG</b>	<b>Team water sports</b>
XE8KM	Type of sport or exercise activity, rescue and resuscitation
XE6Y2	Type of sport or exercise activity, synchronized swimming <i>Exclusions:</i> Individual water sports (XE6W9)
XE323	Type of sport or exercise activity, underwater hockey
XE2YS	Type of sport or exercise activity, water polo
<b>XE85T</b>	<b>Boating sports</b>
XE1LG	Type of sport or exercise activity, canoeing
XE7BZ	Type of sport or exercise activity, jet skiing
XE99V	Type of sport or exercise activity, kayaking or white-water rafting
XE4LT	Type of sport or exercise activity, power boat racing

XE4XV	Type of sport or exercise activity, rowing or sculling
XE0XD	Type of sport or exercise activity, surf boating
XE0G3	Type of sport or exercise activity, yachting or sailing
<b>XE6W9</b>	<b>Individual water sports</b>
XE3R2	Type of sport or exercise activity, platform diving
	<i>Exclusions:</i> Type of sport or exercise activity, cliff diving (XE5RZ)
XE7S0	Type of sport or exercise activity, springboard diving
XE5UC	type of sport/exercise activity, diving - unspecified
XE5FN	Type of sport or exercise activity, fishing
XE1TE	Type of sport or exercise activity, scuba diving
XE1ZK	Type of sport or exercise activity, snorkelling
XE48G	Type of sport or exercise activity, surfing or boogie boarding
	<i>Exclusions:</i> Type of sport or exercise activity, wind surfing (XE7PV)
XE84Q	Type of sport or exercise activity, surf life saving
XE1FN	Type of sport or exercise activity, competitive swimming
	<i>Exclusions:</i> Type of sport or exercise activity, recreational swimming (XE6P1)
XE167	Type of sport or exercise activity, water skiing
XE92F	Type of sport or exercise activity, water tubing
XE7PV	Type of sport or exercise activity, wind surfing
XE5RZ	Type of sport or exercise activity, cliff diving
XE6P1	Type of sport or exercise activity, recreational swimming
<b>XE9DF</b>	<b>Ice or snow sports</b>
XE225	Type of sport or exercise activity, bobsledding
XE7J1	Type of sport or exercise activity, curling
XE1SZ	Type of sport or exercise activity, ice skating or ice dancing
	<i>Exclusions:</i> Type of sport or exercise activity, speed skating (XE6RE)
XE9KF	Type of sport or exercise activity, luge
XE7E1	Type of sport or exercise activity, ski patrolling
XE9X7	Type of sport or exercise activity, skiing - alpine or downhill
XE8CR	Type of sport or exercise activity, skiing - Nordic cross country

XE8UF	Type of sport or exercise activity, freestyle skiing
XE471	Type of sport or exercise activity, snow ski jumping
XE240	Type of sport or exercise activity, snowmobiling
XE7J0	Type of sport or exercise activity, snow boarding
XE6RE	Type of sport or exercise activity, speed skating
XE8G0	Type of sport or exercise activity, tobogganing
<b>XE3L1</b>	<b>Individual athletic activities</b>
XE286	Type of sport or exercise activity, aerobic or callisthenics
XE5KC	Type of sport or exercise activity, jogging or running
	<i>Exclusions:</i> Type of sport or exercise activity, walking (XE2TV)
XE05C	Type of sport or exercise activity, tai chi
XE1SW	Type of sport or exercise activity, track and field - racing over obstacles or hurdles
XE02A	Type of sport or exercise activity, track and field - sprinting (1-400 metres)
XE2RC	Type of sport or exercise activity, track and field - running middle distances (401-1,500 metres)
XE4Y7	Type of sport or exercise activity, track and field - running long distances (greater than 1,500 metres)
XE1X1	Type of sport or exercise activity, track and field - high jump
XE10W	Type of sport or exercise activity, track and field - long jump
XE8YM	Type of sport or exercise activity, track and field - pole vault
XE5X4	Type of sport or exercise activity, track and field - triple jump
XE4C5	Type of sport or exercise activity, track and field - discus
XE037	Type of sport or exercise activity, track and field - javelin
XE1FT	Type of sport or exercise activity, track and field - hammer throw
XE3M7	Type of sport or exercise activity, track and field - shot putt
XE2TV	Type of sport or exercise activity, walking
XE7F9	Type of sport or exercise activity, yoga or Pilates
XE9V7	Type of sport or exercise activity, stationary aerobic exercise with equipment
<b>XE4HZ</b>	<b>Acrobatic sports</b>
XE2T9	Type of sport or exercise activity, cheerleading
XE65D	Type of sport or exercise activity, gymnastics - balance beam

XE5WY	Type of sport or exercise activity, gymnastics - floor exercise or tumbling
XE69D	Type of sport or exercise activity, gymnastics - high bar
XE6R6	Type of sport or exercise activity, gymnastics - parallel bars
XE4YF	Type of sport or exercise activity, gymnastics - rhythmic with or without props
XE8WK	Type of sport or exercise activity, gymnastics - rings
XE802	Type of sport or exercise activity, gymnastics - side horse or pommel horse
XE8V7	Type of sport or exercise activity, gymnastics - trampoline or mini-trampoline
XE5KU	Type of sport or exercise activity, gymnastics - uneven parallel bars
XE7PU	Type of sport or exercise activity, gymnastics - vault
<b>XE9SK</b>	<b>Aesthetic activities</b>
XE6H2	Type of sport or exercise activity, dancing
XE0R2	Type of sport or exercise activity, marching
<b>XE0KE</b>	<b>Racquet sports</b>
XE3SV	Type of sport or exercise activity, badminton
XE5Z7	Type of sport or exercise activity, racquetball
XE629	Type of sport or exercise activity, squash
XE5JM	Type of sport or exercise activity, table tennis or ping-pong
XE97B	Type of sport or exercise activity, tennis
<b>XE2NY</b>	<b>Target or precision sports</b>
XE0KA	Type of sport or exercise activity, archery
XE760	Type of sport or exercise activity, bocce, boules or petanque
XE5XX	Type of sport or exercise activity, billiards, pool or snooker
XE5VJ	Type of sport or exercise activity, lawn bowling
XE8AU	Type of sport or exercise activity, croquet
XE7NG	Type of sport or exercise activity, darts
XE416	Type of sport or exercise activity, golf
XE6YY	Type of sport or exercise activity, ten-pin bowling
XE08Q	Type of sport or exercise activity, firearm shooting
<i><b>Exclusions:</b></i> Type of sport or exercise activity, paintball gun shooting (XE1N9)	

XE0HX	Type of sport or exercise activity, bb or pellet gun shooting
XE1N9	Type of sport or exercise activity, paintball gun shooting
<b>XE3E4</b>	<b>Combative sports</b>
XE7K5	Type of sport or exercise activity, aikido
XE8AB	Type of sport or exercise activity, boxing
XE4E3	Type of sport or exercise activity, fencing
XE6B1	Type of sport or exercise activity, judo
XE0U2	Type of sport or exercise activity, jujitsu
XE567	Type of sport or exercise activity, karate
XE8WT	Type of sport or exercise activity, kendo
XE0Y9	Type of sport or exercise activity, kick-boxing
XE5QV	Type of sport or exercise activity, kung fu
XE7RA	Type of sport or exercise activity, tae kwon do
XE0CG	Type of sport or exercise activity, freestyle wrestling
XE8M6	Type of sport or exercise activity, Greco-Roman wrestling
XE4QQ	Type of sport or exercise activity, professional wrestling - entertainment style
XE75J	Type of sport or exercise activity, self defence training
<b>XE1EU</b>	<b>Power sports</b>
XE7QE	Type of sport or exercise activity, power lifting
XE6RQ	Type of sport or exercise activity, Olympic weightlifting
XE0N6	Type of sport or exercise activity, strength training or body building
XE3PG	Type of sport or exercise activity, timber-related sports
<b>XE42Q</b>	<b>Equestrian activities</b>
XE6DF	Type of sport or exercise activity, equestrian dressage
XE75K	Type of sport or exercise activity, endurance riding
XE8JM	Type of sport or exercise activity, equestrian eventing
XE0BK	Type of sport or exercise activity, mustering or stock work
XE6PK	Type of sport or exercise activity, equestrian polo or polocrosse
XE4GZ	Type of sport or exercise activity, pony club
XE0P4	Type of sport or exercise activity, horse racing

XE56X	Type of sport or exercise activity, rodeo
XE7X5	Type of sport or exercise activity, show jumping
XE7MC	Type of sport or exercise activity, equestrian steeplechase
XE1LH	Type of sport or exercise activity, trail or general horseback riding
XE2LJ	Type of sport or exercise activity, equestrian trotting or harness
<b>XE3T3</b>	<b>Adventure sports</b>
XE08U	Type of sport or exercise activity, abseiling or rappelling
XE5BS	Type of sport or exercise activity, hiking
XE79W	Type of sport or exercise activity, mountaineering
XE8WG	Type of sport or exercise activity, orienteering or rogaining
XE2J8	Type of sport or exercise activity, river rafting
XE6Z2	Type of sport or exercise activity, rock climbing
XE74G	Type of sport or exercise activity, bungee jumping
<b>XE85A</b>	<b>Wheeled motor sports</b>
XE7HV	Type of sport or exercise activity, riding an all-terrain vehicle (ATV)
XE1R5	Type of sport or exercise activity, motorcycling
XE26F	Type of sport or exercise activity, motor car racing
XE46F	Type of sport or exercise activity, go-carting or carting
XE1MM	Type of sport or exercise activity, motorised scootering
<b>XE4DA</b>	<b>Wheeled non-motored sports</b>
XE5UJ	Type of sport or exercise activity, BMX cycling
XE4SS	Type of sport or exercise activity, mountain cycling
XE87G	Type of sport or exercise activity, road cycling
XE8U6	Type of sport or exercise activity, track or velodrome cycling
XE7MG	Type of sport or exercise activity, cycling not otherwise specified
XE5V9	type of sport/exercise activity, in-line skating/rollerblading
XE2DY	Type of sport or exercise activity, roller skating
XE1AS	Type of sport or exercise activity, skate boarding
XE6X9	Type of sport or exercise activity, scootering
XE72X	Type of sport or exercise activity, spinning or stationary bike riding

XE78K	Type of sport or exercise activity, street luge
<b>XE7BS</b>	<b>Multidiscipline sports</b>
XE3BK	Type of sport or exercise activity, biathlon - cross-country skiing event
XE05T	Type of sport or exercise activity, biathlon - shooting event
XE7ZX	Type of sport or exercise activity, biathlon - unspecified event
XE5PT	Type of sport or exercise activity, decathlon - 100 metre event
XE7ND	Type of sport or exercise activity, decathlon - 400 metre event
XE9AM	Type of sport or exercise activity, decathlon - 1,500 metre event
XE5C1	Type of sport or exercise activity, decathlon - 110 metre hurdles event
XE6CK	Type of sport or exercise activity, decathlon - long jump event
XE331	Type of sport or exercise activity, decathlon - high jump event
XE6GN	Type of sport or exercise activity, decathlon - shot put event
XE11Q	Type of sport or exercise activity, decathlon - discus event
XE37C	Type of sport or exercise activity, decathlon - javelin event
XE7LJ	Type of sport or exercise activity, decathlon - pole vault event
XE48E	Type of sport or exercise activity, decathlon - unspecified event
XE4LW	Type of sport or exercise activity, heptathlon - 200 metre event
XE9EF	Type of sport or exercise activity, heptathlon - 100 metre hurdles event
XE90J	Type of sport or exercise activity, heptathlon - high jump event
XE8WE	Type of sport or exercise activity, heptathlon - long jump event
XE7TG	Type of sport or exercise activity, heptathlon - javelin event
XE294	Type of sport or exercise activity, heptathlon - shot putt event
XE4CW	Type of sport or exercise activity, heptathlon - 800 metre event
XE1JE	Type of sport or exercise activity, heptathlon - unspecified event
XE3GA	Type of sport or exercise activity, modern pentathlon - shooting event
XE758	Type of sport or exercise activity, modern pentathlon - fencing event
XE7GA	Type of sport or exercise activity, modern pentathlon - swimming event
XE8KQ	Type of sport or exercise activity, modern pentathlon - equestrian event
XE84E	Type of sport or exercise activity, modern pentathlon - running event
XE2B4	Type of sport or exercise activity, modern pentathlon - unspecified event

XE2XU	Type of sport or exercise activity, triathlon - cycling event
XE0J9	Type of sport or exercise activity, triathlon - running event
XE8ZK	Type of sport or exercise activity, triathlon - swimming event
XE01T	Type of sport or exercise activity, triathlon - unspecified event
<b>XE03W</b>	<b>Aero (non-motored) sports</b>
XE34L	Type of sport or exercise activity, aerobatics
XE88Y	Type of sport or exercise activity, gliding
XE3VS	Type of sport or exercise activity, hang gliding
XE0JU	type of sport/exercise activity, parachuting/sky diving
XE06C	Type of sport or exercise activity, paragliding or parasailing
XE99S	Type of sport or exercise activity, hot air ballooning
<b>XE68C</b>	<b>Other school-related recreational activities</b>
XE49T	Type of sport or exercise activity, school physical education class
XE67P	Type of sport or exercise activity, school free play

#### Phase of sport or exercise activity

<b>XE9ET</b>	<b>Phase of sport or exercise activity - Training or practice</b>
XE1U5	<b>Phase of activity, sport-specific or skill-specific practice</b>
	<b><i>Exclusions:</i></b> Phase of activity, scrimmaging (XE07B)
XE07B	<b>Phase of activity, scrimmaging</b>
XE0BT	<b>Phase of activity, strength and conditioning or weight training</b>
	<b><i>Exclusions:</i></b> Phase of activity, cardiovascular training (XE945)
XE945	<b>Phase of activity, cardiovascular training</b>
	<b><i>Exclusions:</i></b> Phase of activity, strength and conditioning or weight training (XE0BT)
XE583	<b>Phase of activity, not otherwise specified training or practice</b>
<b>XE8MZ</b>	<b>Phase of activity, pre-event</b>
<b>XE2D1</b>	<b>Phase of activity, warm-up</b>
<b>XE5TJ</b>	<b>Phase of sport or exercise activity - Competition or participation</b>
XE66C	<b>Phase of activity, competition or participation, first 25% of expected event duration</b>

<b>XE0QY</b>	<b>Phase of activity, competition or participation, middle 50% of expected event duration</b>
<b>XE2CG</b>	<b>Phase of activity, competition or participation, last 25% of expected event duration</b>
<b>XE20Y</b>	<b>Phase of activity, competition or participation, events whose time course can not be anticipated</b>
<b>XE4ZN</b>	<b>Phase of activity, competition or participation, unspecified stage of the event</b>
<b>XE1P9</b>	<b>Phase of activity, cool down</b>
<b>XE2BD</b>	<b>Phase of activity, post-event</b>
<b>XE49R</b>	<b>Phase of activity, recreational participation</b>
<b>XE0QV</b>	<b>Phase of activity, other specified phase of activity</b>
<b>XE8ZT</b>	<b>Unspecified phase of activity</b>

Personal countermeasures in sport or exercise

<b>XE4K4</b>	<b>Personal countermeasures, no protective devices used</b>
<b>XE8Z8</b>	<b>Personal countermeasures, braces, guards or orthoses</b>
<b>XE75U</b>	<b>Personal countermeasures, rigid taping of joint</b>
<b>XE9TY</b>	<b>Personal countermeasures, padding of joint, bony prominence, or muscle</b>
<b>XE10N</b>	<b>Personal countermeasures, thermal devices</b>
<b>XE0LS</b>	<b>Personal countermeasures, splints</b>
<b>XE16J</b>	<b>Personal countermeasures, jock strap or protective cup</b>
<b>XE4RU</b>	<b>Personal countermeasures, gloves</b>
<b>XE49L</b>	<b>Personal countermeasures, mouth guard</b>
<b>XE338</b>	<b>Personal countermeasures, eye goggles or protective glasses</b>
<b>XE2ZG</b>	<b>Personal countermeasures, helmet</b>
<b>XE3RM</b>	<b>Personal countermeasures, face mask or shield</b>
<b>XE7K8</b>	<b>Personal countermeasures, foot wear</b>
<b>XE26E</b>	<b>Personal countermeasures, personal flotation device</b>

Environmental countermeasures in sport or exercise

<b>XE3U8</b>	<b>Environmental countermeasures, no protective devices used</b>
--------------	--

<b>XE0DA</b>	<b>Environmental countermeasures, protective padding on competition surface</b>
<b>XE0W0</b>	<b>Environmental countermeasures, padded goal posts, or corner markers</b>
<b>XE8UC</b>	<b>Environmental countermeasures, barrier between area of activity and spectators or surrounds</b>
<b>XE0LL</b>	<b>Environmental countermeasures, safety restraints or vehicle restraints</b>

Aspects of occupational injury events

### Economic activity

<b>XE7J2</b>	<b>Economic activity, agriculture, hunting, or forestry</b>
	<i>Exclusions:</i> Economic activity, health or social work (XE0G4)
<b>XE227</b>	<b>Economic activity, fishing</b>
<b>XE45Q</b>	<b>Economic activity, mining, quarrying, or extraction</b>
<b>XE13G</b>	<b>Economic activity, manufacturing</b>
<b>XE6WE</b>	<b>Economic activity, electricity, gas, or water supply</b>
<b>XE0SE</b>	<b>Economic activity, construction</b>
<b>XE139</b>	<b>Economic activity, wholesale or retail trade</b>
<b>XE6J4</b>	<b>Economic activity, repair of motor vehicles, motorcycles, or personal and household goods</b>
<b>XE4JS</b>	<b>Economic activity, hotels or restaurants</b>
<b>XE5JN</b>	<b>Economic activity, transport, storage, or communications</b>
<b>XE8A7</b>	<b>Economic activity, financial intermediation</b>
<b>XE3YF</b>	<b>Economic activity, real estate, renting, or business activities</b>
<b>XE3K1</b>	<b>Economic activity, public administration, defence, or compulsory social security</b>
<b>XE54F</b>	<b>Economic activity, providing education</b>
<b>XE0G4</b>	<b>Economic activity, health or social work</b>
<b>XE7X1</b>	<b>Economic activity, other community, social, or personal service activities</b>
<b>XE2PM</b>	<b>Economic activity, private households with employed persons</b>
<b>XE6N7</b>	<b>Economic activity, extra-territorial organisations or bodies</b>

## Occupation

XE3TU	<b>Occupation - legislators, senior officials, managers</b>
XE59Y	<b>Occupation - professionals</b>
XE558	<b>Occupation - technicians or associate professionals</b>
XE17U	<b>Occupation - clerks, secretaries</b>
XE1CA	<b>Occupation - service workers, shop and market sales workers</b>
XE6TG	<b>Occupation - skilled agriculture or fishery workers</b>
XE0VC	<b>Occupation - craft or related trades workers</b>
XE37Y	<b>Occupation - plant/machine operators or assemblers</b>
XE4EE	<b>Occupation - elementary occupations</b>
XE5G8	<b>Occupation - armed forces</b>

Aspects of assault and maltreatment

## Perpetrator-victim relationship

XE454	<b>Spouse or partner</b>
XE041	<b>Perpetrator-victim relationship, legal spouse</b> <i>Exclusions:</i> Perpetrator-victim relationship, Ex-spouse (XE6Q9)
XE8JN	<b>Perpetrator-victim relationship, cohabiting partner</b>
XE8GZ	<b>Perpetrator-victim relationship, noncohabiting partner</b> <i>Exclusions:</i> Perpetrator-victim relationship, date (XE7GT)
XE6Q9	<b>Perpetrator-victim relationship, Ex-spouse</b>
XE8TC	<b>Perpetrator-victim relationship, Ex-partner</b>
XE8AA	<b>Parent</b> <i>Exclusions:</i> Perpetrator-victim relationship, foster parent (XE4BZ)
XE8QX	<b>Perpetrator-victim relationship, father or mother</b> <i>Exclusions:</i> Perpetrator-victim relationship, step-parent (XE9FD)
XE9FD	<b>Perpetrator-victim relationship, step-parent</b>
XE5WN	<b>Other relative</b>
XE9JY	<b>Perpetrator-victim relationship, full sibling</b>
XE9RK	<b>perpetrator-victim relationship, partial or half sibling</b>

XE4KJ	<b>Perpetrator-victim relationship, step-sibling</b>
XE9S0	<b>Perpetrator-victim relationship, grandparent</b>
XE10C	<b>Perpetrator-victim relationship, offspring</b>
XE8EU	<b>Perpetrator-victim relationship, other blood relative</b>
XE8FS	<b>Perpetrator-victim relationship, in-laws</b>
<b>XE4BG</b>	<b>Unrelated care giver</b>
XE4BZ	<b>Perpetrator-victim relationship, foster parent</b>
XE670	<b>Perpetrator-victim relationship, care giver in institution</b>
XE02B	<b>Perpetrator-victim relationship, health care provider</b>
<b>XE270</b>	<b>Acquaintance or friend</b>
XE1X5	<b>Perpetrator-victim relationship, parent's partner</b>
	<i><b>Exclusions:</b></i> Perpetrator-victim relationship, step-parent (XE9FD)
XE7GT	<b>Perpetrator-victim relationship, date</b>
XE6WK	<b>Perpetrator-victim relationship, roommate</b>
	<i><b>Exclusions:</b></i> Stranger (XE4WS)
XE6P9	<b>Perpetrator-victim relationship, business relation</b>
XE32X	<b>Perpetrator-victim relationship, neighbour</b>
XE80F	<b>Perpetrator-victim relationship, institutional co-member</b>
XE5MH	<b>Perpetrator-victim relationship, friend not otherwise specified</b>
XE39B	<b>Perpetrator-victim relationship, acquaintance not otherwise specified</b>
<b>XE2HC</b>	<b>Official or legal authority</b>
XE6AM	<b>Perpetrator-victim relationship, official or legal authority, military</b>
	<i><b>Exclusions:</b></i> Perpetrator-victim relationship, official or legal authority, police (XE2Z7)
	Perpetrator-victim relationship, national or official authority not otherwise specified (XE5ZT)
XE2Z7	<b>Perpetrator-victim relationship, official or legal authority, police</b>
	<i><b>Exclusions:</b></i> Perpetrator-victim relationship, official or legal authority, military (XE6AM)
	Perpetrator-victim relationship, security group not otherwise specified (XE8PB)
	Perpetrator-victim relationship, national or official authority not otherwise specified (XE5ZT)

<b>XE5ZT</b>	<b>Perpetrator-victim relationship, national or official authority not otherwise specified</b>
<b>XE8PB</b>	<b>Perpetrator-victim relationship, security group not otherwise specified</b>
<b>XE59K</b>	<b>Perpetrator-victim relationship, official or legal authority, civilian authority</b>
	<b><i>Exclusions:</i></b> Perpetrator-victim relationship, security group not otherwise specified (XE8PB)
<b>XE4WS</b>	<b>Stranger</b>
<b>XE0CA</b>	<b>Perpetrator-victim relationship, stranger in vigilante group</b>
<b>XE7XG</b>	<b>Perpetrator-victim relationship, stranger in mob</b>
<b>XE2XY</b>	<b>Perpetrator-victim relationship, stranger not otherwise specified</b>
<b>XE0H2</b>	<b>Perpetrator-victim relationship, prisoner or detainee</b>
<b>XE3FJ</b>	<b>Perpetrator-victim relationship, person executing a felony or crime</b>
<b>XE388</b>	<b>Perpetrator-victim relationship, person interceding in a crime</b>

#### Gender of perpetrator

<b>XE5YG</b>	<b>Gender of perpetrator, male</b>
<b>XE56C</b>	<b>Gender of perpetrator, female</b>
<b>XE9SL</b>	<b>Gender of perpetrator, unknown</b>
<b>XE6W8</b>	<b>Gender of perpetrator, other</b>

#### Context of assault and maltreatment

<b>XE0UM</b>	<b>Altercation</b>
	<b><i>Exclusions:</i></b> Drug-related incident (XE933)
<b>XE591</b>	<b>About family issues</b>
<b>XE2RR</b>	Context of assault, altercation about family issues, children
<b>XE37R</b>	Context of assault, altercation about family issues, in-laws
<b>XE1B3</b>	Context of assault, altercation about family issues, dowry issues
<b>XE1F9</b>	Context of assault, altercation about family issues, family honour
<b>XE9SP</b>	<b>About personal issues</b>
<b>XE1XB</b>	Context of assault, altercation about current love relationship
<b>XE3YH</b>	Context of assault, altercation about terminating a love relationship

<b>XE6DB</b>	Context of assault, altercation about sex  <b><i>Exclusions:</i></b> Context of assault, sexual assault (XE213)
<b>XE4H5</b>	<b>About personally-held views</b>
<b>XE03X</b>	Context of assault, altercation about personally-held views regarding politics
<b>XE860</b>	Context of assault, altercation about personally-held views regarding religious or spiritual matters
<b>XE1RW</b>	Context of assault, altercation about personally-held views regarding cultural issues
<b>XE6YL</b>	Context of assault, altercation about personally-held views regarding racial or ethnic issues
<b>XE1Q8</b>	Context of assault, altercation about personally-held views regarding issues of gender or sexual orientation
<b>XE0Z5</b>	<b>About business or financial issues</b>
<b>XE4ML</b>	Context of assault, altercation about loss of employment
<b>XE00W</b>	Context of assault, altercation about other financial losses related to employment or business  <b><i>Exclusions:</i></b> Drug-related incident (XE933)
<b>XE05L</b>	Context of assault, other employment disputes
<b>XE62S</b>	Context of assault, altercation about money or property
<b>XE6VD</b>	<b>About sports and other leisure</b>
<b>XE81U</b>	Context of assault, altercation about gambling
<b>XE47F</b>	Context of assault, altercation about sports  <b><i>Exclusions:</i></b> Context of assault, altercation about gambling (XE81U)
<b>XE8NL</b>	<b>Context of assault, altercation about traffic</b>
<b>XE4XA</b>	<b>Context of assault, malicious misconduct</b>
<b>XE4P2</b>	<b>Context of assault, bullying, intimidation</b>
<b>XE3KE</b>	<b>Context of assault, altercation about past altercation</b>
<b>XE91G</b>	<b>Illegal acquisition or attempted illegal acquisition of money or property</b>  <b><i>Exclusions:</i></b> Drug-related incident (XE933) Context of assault, kidnapping (XE1N7)
<b>XE0LR</b>	<b>Context of assault, burglary</b>
<b>XE6PL</b>	<b>Robbery</b>
<b>XE6YM</b>	Context of assault, unarmed robbery
<b>XE989</b>	Context of assault, armed robbery

<b>XE933</b>	<b>Drug-related incident</b>
XE5AY	<b>Context of assault, selling drugs or drug business</b>
XE0Z6	<b>Context of assault, argument over possession, use, or cost of drugs</b>
XE1GC	<b>Context of assault, failure to pay a drug debt</b>
XE1LL	<b>Context of assault, probable drug involvement, but no positive evidence</b>
<b>XE213</b>	<b>Context of assault, sexual assault</b>
XE6U2	<b>Context of assault, rape or attempted rape</b>
XE85Q	<b>Context of assault, sodomy or attempted sodomy</b>
XE29Q	<b>Context of assault, touching or fondling of genitals</b>
XE18N	<b>Context of assault, oral sex</b>
<b>XE8DB</b>	<b>Gang-related incident</b>
XE3QM	<b>Context of assault, gang initiation</b>
XE2A5	<b>Context of assault, gang rivalry</b>
<b>XE3V7</b>	<b>Other criminal activity</b>
XE2QF	<b>Context of assault, blackmail</b>
XE1N7	<b>Context of assault, kidnapping</b>
XE0NB	<b>Context of assault, contract injuring or killing</b>
XE5A7	<b>Context of assault, drive-by shooting</b>
<b>XE5QX</b>	<b>Other specified context of assault</b>
XE6FN	<b>Context of assault, retaliation or revenge</b>
XE3G0	<b>Context of assault, mercy killing or euthanasia</b>
XE90G	<b>Context of assault, neglect</b>
XE580	<b>Context of assault, torture</b>
XE92U	<b>Context of assault, additional context, mistaken identity</b>

Aspects of intentional self-harm events

Proximal risk-factors for intentional self-harm

<b>XE17Z</b>	<b>Conflict in relationship with family member, partner, or friend</b>
XE9SZ	<b>Proximal risk factors for intentional self-harm, Conflict in relationship with spouse, partner, boy/girlfriend</b>

XE6QA	<b>Proximal risk factors for intentional self-harm, Conflict in relationship with parent</b>
XE1A1	<b>Proximal risk factors for intentional self-harm, Conflict in relationship with offspring</b>
<b>XE3GP</b>	<b>Death of a relative, partner, or friend</b>
XE19R	<b>Proximal risk factors for intentional self-harm, Suicide of a relative, partner or friend</b>
XE8T3	<b>Proximal risk factors for intentional self-harm, Other manner of death of a relative, partner or friend</b>
XE2FT	<b>Proximal risk factors for intentional self-harm, Unspecified manner of death of a relative, partner or friend</b>
<b>XE97R</b>	<b>Physical problem</b>
XE5CU	<b>Proximal risk factors for intentional self-harm, HIV or AIDS</b>
XE3AG	<b>Proximal risk factors for intentional self-harm, Unwanted pregnancy</b>
<b>XE6XD</b>	<b>Mental condition</b>
XE2Q7	<b>Proximal risk factors for intentional self-harm, Substance abuse</b>
XE79G	<b>Proximal risk factors for intentional self-harm, Postpartum depression</b>
<b>XE3U9</b>	<b>Income-related or financial problem</b>
XE70C	<b>Proximal risk factors for intentional self-harm, Work-related</b>
XE4UX	<b>Proximal risk factors for intentional self-harm, Dowry</b>
<b>XE5J3</b>	<b>Abuse</b>
XE8HX	<b>Proximal risk factors for intentional self-harm, Sexual abuse</b>
XE8ND	<b>Proximal risk factors for intentional self-harm, Physical abuse</b>
XE2RX	<b>Proximal risk factors for intentional self-harm, Neglect</b>
<b>XE31V</b>	<b>Proximal risk factors for intentional self-harm, Legal system encounters</b>
<b>XE8MK</b>	<b>Proximal risk factors for intentional self-harm, School-related problem</b>
<b>XE98Q</b>	<b>Proximal risk factors for intentional self-harm, Religious belief or affiliation</b>
<b>XE6TW</b>	<b>Proximal risk factors for intentional self-harm, Cultural issue</b>

Previous non-fatal intentional self harm

**XE76W**      **Previous suicide attempt, No**

**XE3YR Previous suicide attempt, Yes**

Intention to die aspect of self-harm

**Inclusions:**

- parasuicide (incomplete suicide attempt)
- self-mutilation
- suicide

**XE97V Intentional self-harm, person intended to die**

Intentional self-harm with intent to cause the death of the person.

**XE5D6 Intentional self-harm, person did not intend to die**

Self-injury, self-harm, cutting or self-mutilation undertaken intentionally for reasons other than to bring about the death of the person.

**XE2SF Intentional self-harm, not known or not determined if person intended to die**

Information that a competent person (e.g. psychiatrist, coroner) had concluded that it could not be determined whether the intentional self-harm was done with intent to die. No information or insufficient information was available.

Aspects of armed conflict

Type of armed conflict

**XE2RB Type of conflict, civil war or guerrilla operation**

**XE324 Type of conflict, war**

**XE4RJ Type of conflict, declared terrorism**

**XE0EG Type of conflict, civil insurrection**

**XE7HW Type of conflict, postconflict incident**

Role of injured person in armed conflict

**XE42H Military personnel**

**XE2WZ Civilian**

**XE3P0 Role of injured person in armed conflict unknown**

Type of legal intervention

**XE52B Potential arrest situation**

**XE9JF Type of legal intervention, potential arrest related traffic pursuit**

XE25D	Type of legal intervention, potential arrest related investigation of a suspicious person or incident
XE3XD	Type of legal intervention, potential arrest related execution of an arrest
<b>XE8Z9</b>	<b>Response to a disturbance call</b>
XE84H	Type of legal intervention, response to a disturbance call because of a family dispute
XE8WD	Type of legal intervention, response to a disturbance call because of a person behaving aberrantly
XE3FV	Type of legal intervention, response to other specified disturbance call
XE439	Type of legal intervention, response to unspecified disturbance call
<b>XE8M2</b>	<b>Type of legal intervention, ambush situation</b>
<b>XE1DD</b>	<b>Type of legal intervention, civil disorder</b>
<b>XE0RZ</b>	<b>Type of legal intervention, handling, transporting, or custody of prisoner</b>
<b>XE7AT</b>	<b>Type of legal intervention, execution of a legal sentence</b>

Aspects of incidents related to devices

Problem related to the interaction between the patient and the device.

<b>XE4HK</b>	<b>Patient device interaction problem</b>
<b>XE6GS</b>	<b>Patient-device incompatibility</b>
<b>XE7ZE</b>	Biocompatibility Problem associated with undesirable local or systemic effects due to exposure to medical device materials or leachates from those materials by a patient who has an implant or is receiving treatment with a device made from them.
<b>XE2CL</b>	Device appears to trigger rejection The device appears to elicit undesired response in the patient to the presence of an implanted or invasive device, without inherent device failure, e.g. fibrous encapsulation, or inflammation of the tissue around the device, or extrusion of the device
<b>XE584</b>	Inadequacy of device shape or size The physical size or shape of the device was inadequate with regard to the patient's anatomy.
<b>XE7JV</b>	<b>Osseointegration problem</b> Problem associated with interconnection between the bone tissue and the implanted device.

<b>XE94Z</b>	Failure to osseointegrate Problem associated with the failure to see direct anchorage of an implant by the formation of bony tissue around the implant without the growth of fibrous tissue at the bone-implant interface.
<b>XE0Z9</b>	Loss of osseointegration Problem associated with weakened integration of the device at the bone-implant interface due to loss of fibrous and/or bony tissue and leading to compromised anchorage of the device
<b>XE2K9</b>	<b>Loosening of implant not related to bone-ingrowth</b> Problem associated with the loss of direct anchorage of an implanted device over time or due to an injury.
<b>XE0VD</b>	<b>Migration or expulsion of device</b> Problem with an implanted or invasive device moving within the body, or being completely expelled from the body.
<b>XE763</b>	Migration of device Problem with all or part of an implanted or invasive device moving from its intended location within the body.
<b>XE1FH</b>	Expulsion of device Problem with all or part of an implanted or invasive device being completely expelled from its intended location within the body.
<b>XE7Q8</b>	<b>Manufacturing, packaging or shipping problem</b> Problem associated with any deviations from the documented specifications of the device that relate to nonconformity during manufacture to the design of an item or to specified manufacturing, packaging or shipping processes (out of box problem).
<b>XE5Y1</b>	<b>Product quality problem</b>
<b>XE4UR</b>	Dull or blunt Problem associated with a device not being as sharp as intended or expected.
<b>XE46G</b>	Nonstandard device Problem associated with the device that does not meet the specifications or requirements for which it was manufactured (e.g. materials, parts, manufacturing process).
<b>XE1K1</b>	<b>Defective component</b>
<b>XE9CD</b>	<b>Defective device</b>
<b>XE12L</b>	<b>Device damaged prior to use</b>
<b>XE8RY</b>	<b>Packaging problem</b> Problem associated with the materials used to construct the cover or outer wrapping of the device.

<b>XE01Z</b>	Difficult to open or remove packaging material Problem associated with difficulty for users to operate the device, specifically as it relates to the opening or removal of the outer wrapping.
<b>XE5YH</b>	Incomplete or missing packaging Problem associated with the nonconformance to the device specifications due to incomplete or missing packaging that may compromise the device operation as intended.
<b>XE4VM</b>	Unsealed device packaging Problem associated with the loss of packaging seal.
<b>XE2AN</b>	Tear, rip or hole in device packaging Problem associated with packaging damage (tear, rip or hole) prior to the use of the device.
<b>XE151</b>	<b>Device misassembled during manufacturing or shipping</b>
<b>XE9R8</b>	Component misassembled A device found to have one or more components incorrectly assembled when delivered to the user facility.
<b>XE89V</b>	Component missing A device component(s) found to be missing when delivered to the user facility.
<b>XE8ZA</b>	<b>Shipping damage or problem</b> Problem associated with shipping damage or problem prior to the use of the device.
<b>XE78P</b>	Delivered as unsterile product Problem associated with a device being received in such a manner to indicate that its sterility has been compromised (e.g. sterile packaging breached, visible contaminant present)
<b>XE52X</b>	<b>Chemical problem</b> Problem associated with any from the documented specifications of the device that relate to any chemical characterization, i.e., element, compound, or mixture.
<b>XE9AC</b>	<b>Device emits odour</b> Problem associated with an unexpected or inappropriate smell released by the device.
<b>XE3E0</b>	<b>Device ingredient or reagent problem</b> Problem associated with any deviations from the documented specifications of the device that relate to any ingredient or reagent characterization.
<b>XE4BC</b>	Clumping in device or device ingredient Problem associated with the aggregation of particles into irregular masses.

<b>XE49W</b>	Coagulation in device or device ingredient Problem associated with the undesired characterization of congealing, solidifying, thickening, curdling.
<b>XE4VP</b>	Precipitate in device or device ingredient Problem associated with the separation of solid particles from a liquid as the result of a chemical or physical change.
<b>XE8Z6</b>	Cross reactivity Problem associated with the degree to which an antibody or antigen participates in cross reactions.
<b>XE0VB</b>	Particulates Substances that consist of separate particles that are introduced by the device during use.
<b>XE0K7</b>	High pH pH higher than expected and / or anticipated.
<b>XE657</b>	Low pH pH lower than expected and / or anticipated.
<b>XE6E7</b>	<b>Improper chemical reaction</b>
<b>XE4LP</b>	<b>Material integrity problem</b> Problem associated with any deviations from the documented specifications of the device that relate to the limited durability of all material used to construct device.
<b>XE8D2</b>	<b>Break</b> Problem associated with undesired damage or breakage of those materials used in the device construction.
<b>XE1M6</b>	<b>Fracture of device</b> Problem associated with a partial or full-thickness crack in the device materials.
<b>XE9DU</b>	<b>Loss of or failure to bond</b> Problem associated with lack or loss of adherence between materials intended to be joined together by an adhesive.
<b>XE2ET</b>	<b>Material fragmentation</b> Problem associated with small pieces of the device breaking off unexpectedly.
<b>XE82N</b>	<b>Solder joint fracture</b> Problem associated with undesired damage or breakage in a solder joint of materials used in the device construction.
<b>XE638</b>	<b>Burst container or vessel</b> Problem associated with the pressure inside a vessel or container rising to such a degree that the container ruptures.

<b>XE5EZ</b>	<b>Explosion</b> Problem associated with the violent bursting due to the sudden expansion of air, gas or fluid.
<b>XE38M</b>	<b>Crack</b> Problem associated with an undesired partial separation and/or a visible opening along the length or width in the materials that are used in the device construction.
<b>XE0HB</b>	<b>Degraded</b> Problem associated with a undesired change in the chemical structure, physical properties, or appearance in the materials that are used in the device construction.
<b>XE8J3</b>	<b>Calcified</b> Problem associated with buildup of calcium salts on the device.
<b>XE228</b>	<b>Corroded</b> Problem associated with the chemical or electrochemical reaction between materials, usually a metal and its environment that produces a deterioration of the metal and its properties.
<b>XE1WE</b>	<b>Material erosion</b> Problem associated with a progressive loss of a material from a solid surface.
<b>XE9F6</b>	<b>Pitted</b> Problem associated with the corrosion of a material's surface, confined to a point or small area that takes the form of cavities.
<b>XE0YK</b>	<b>Flaked</b> Problem associated with the detachment of small pieces of the coating film of a material.
<b>XE3VG</b>	<b>Peeled or delaminated</b> Peeling or delamination of composite materials, including coatings, that occurs when layers are separated as a result of stress or impact and resulting in loss of mechanical toughness.
<b>XE975</b>	<b>Naturally worn</b> Problem associated with material damage to a surface, usually involving progressive loss or displacement of material, due to relative motion between that surface and a contacting substance or substances.
<b>XE9JW</b>	<b>Unraveled material</b> Problem due to the undesired unravelling of material (e.g. disentangled, unwound etc.).
<b>XE1LJ</b>	<b>Material deformation</b> Problem associated with an undesired material change in shape or property caused by external forces.

<b>XE0JB</b>	Deformation due to compressive stress Problem associated with an undesired bulge, bend, bow, kink, or wavy condition observed in the device material resulting from compressive stresses.
<b>XE5NT</b>	Dent in material Problem associated with a undesired change in shape, characterised by the presence of a slight hollow (dent) in the device surface.
<b>XE0ZV</b>	Failure to fold Problem associated with an undesired material change in physical property, characterised by failure to fold.
<b>XE06Q</b>	Failure to unfold or unwrap Problem associated with the comprising materials' deformation in that device fails to open its wrapping or open/extend in a certain manner i.e. balloon or lens.
<b>XE37M</b>	Material frayed Problem associated with the comprising materials having damaged edges.
<b>XE8PS</b>	Material invagination Problem associated with an undesired material change in shape, characterised by the infolding of one part within another part of a structure.
<b>XE4Z7</b>	Material too rigid or stiff Problem associated with an undesired material change in physical property, characterised by rigidity (it resists deformation in response to an applied force).
<b>XE9WH</b>	Material too soft or flexible Problem associated with any device material that results in the material's inability to maintain the desired shape or support function.
<b>XE47S</b>	Material twisted or bent Problem associated with deformations that lead to twisting or bending of the device.
<b>XE8ZQ</b>	Melted Problem associated with a solid device being transformed into a molten or liquid state.
<b>XE5D0</b>	Stretched Problem associated with an increase or elongation in a materials' dimension.
<b>XE2G9</b>	<b>Material discoloured</b> Problem associated with an undesired streak, pattern and/or a noticeable change in color from the rest of the materials used in the device construction.
<b>XE0RF</b>	<b>Material disintegration</b> Problem associated with material breaking into small particles.

<b>XE585</b>	<b>Material opacification</b> Problem associated with an undesirableopaqueness or cloudiness.
<b>XE9AR</b>	<b>Material perforation</b> Material constituting device is perforated possibly compromising the device's intended purpose.
<b>XE0X4</b>	Material puncture or hole Device material(s) punctured leading to undesired holes/openings.
<b>XE72S</b>	<b>Material protrusion or extrusion</b> Problem associated with undesired physical appearance of device material, specifically when material extends beyond or above device surface.
<b>XE6G0</b>	<b>Material rupture</b> Problem associated with perforations that lead to bursting of the device.
<b>XE6K7</b>	<b>Material separation</b> Problem associated with an undesired disassociation or breaking apart of the device.
<b>XE4FP</b>	<b>Material split, cut or torn</b> Problem associated with materials composing the device being split, cut or torn due to external forces (e.g. wrenching or laceration) or internal forces (e.g. exceeding the tensile stress limits belonging to the materials used in the device construction).
<b>XE609</b>	<b>Scratched material</b> Problem associated with an undesirable shallow cut or narrow groove in the surface of the device materials.
<b>XE2GF</b>	<b>Mechanical problem</b> Problems associated with mechanical actions or defects, including moving parts or subassemblies, etc.
<b>XE2CM</b>	<b>Detachment of device or device component</b> Problem associated with the separation of the device from its physical construct, integrity, or chassis.
<b>XE634</b>	<b>Device damaged by another device</b> Problem associated with one device causing harm to another device.
<b>XE7NX</b>	<b>Ejection problem</b>
<b>XE0VZ</b>	Failure to eject Problem associated with the inability to remove or discharge the device from the location of use.
<b>XE1PM</b>	Unintended ejection Problem associated with unexpected discharge of the device from expected location includes but not limited to the device such as clip applicers, film cartridge, staples.

<b>XE944</b>	<b>Leak or splash</b>
<b>XE2ZY</b>	Fluid leak Escape (Release, Discharge) of fluid through an unintended location - often accompanied by a loss of pressure and/or output.
<b>XE0RV</b>	Gas leak Problem associated with the unintended escape of a gas from the container in which it is housed.
<b>XE53W</b>	Gel leak Escape (Release, Discharge) of gel through an unintended location - as in leakage of ultrasound gel. Escape or release of gel from containment structures - as in gel filled implant leak.
<b>XE0B1</b>	Radiation leak Escape of radiation (energy in the form of waves or subatomic particles, especially those that cause ionization) through containment structures, leading to unintended exposure.
<b>XE2JE</b>	Perivalvular leak Problem associated with the escape of blood around a heart valve, particularly around its leaflets.
<b>XE1RJ</b>	<b>Firing problem</b>
<b>XE666</b>	Failure to fire Problem associated with failure of the device to discharge its load (e.g. surgical stapler failed to partially or completely deploy its staples).
<b>XE5P4</b>	Misfire Problem associated with a therapy or algorithm not being delivered or executed at the expected time.
<b>XE88N</b>	<b>Mechanical jam</b> The motion of the device is prevented or restricted.
<b>XE279</b>	<b>Mechanics altered</b> Problem associated with a device mechanical functioning of machinery, moving parts or tools of device being changed or modified.
<b>XE7KY</b>	Failure to align Problem associated with a circuit, equipment, or system whereby its functions fail to be properly synchronized or its relative positions properly oriented.
<b>XE0XR</b>	Failure to cut Inability of the device to make an incision, pierce or open as intended.

<b>XE23L</b>	Failure to cycle Problem associated with the device failing to complete a series of processes or events.
<b>XE289</b>	Failure to form staple Problem associated with the device failing to connect tissue with a stapling device due to the staples not forming correctly.
<b>XE4F9</b>	<b>Noise, audible</b> Problem associated with any unintended sound which emanates from the device (for example, squeaking from two parts rubbing together or buzzing sounds from electrical components).
<b>XE635</b>	<b>Physical resistance or sticking</b> Problem associated with the lack of movement in the device due parts sticking or seizing.
<b>XE306</b>	<b>Retraction problem</b> Problem associated with drawing back the device to an intended location.
<b>XE79Q</b>	<b>Structural problem</b> Problem associated with the basic physical construction or physical make-up of the device.
<b>XE8H1</b>	Structural collapse Problem associated with the buckling or crushing of material from external forces.
<b>XE3VF</b>	Sharp edges The device has undesirable sharp edges which can cause harm or damage.
<b>XE8ZX</b>	Difficult to fold or unfold Problem associated with the use of the device in terms of user experiencing difficulty to close or to spread out/extend length of the device, even if the operation is being performed according to labeled instructions for use.
<b>XE2EV</b>	Difficult to open or close Problem associated with the use of the device in terms of user experiencing difficulty opening and closing the device, even if the operation is being performed according to labeled instructions for use.
<b>XE3UJ</b>	Incomplete coaptation Problem associated with the heart valve leaflet not closing properly.
<b>XE8ZZ</b>	<b>Unintended movement</b> Problem associated with an undesired movement of the device, which may be related to malfunction of the device, misdiagnosis, or mistreatment.
<b>XE6KT</b>	Device dislodged or dislocated Problems associated with the device not remaining in an expected location.

<b>XE78C</b>	Device tipped over Problem associated with the inability of the device to stay in an upright position.
<b>XE5JJ</b>	Device fell Problem associated with the device or a component unexpectedly being dropped or moving down from an intended place.
<b>XE1Q1</b>	Device slipped Problem associated with the device moving or sliding from the intended position.
<b>XE0QZ</b>	Unintended collision of device Problem associated with the device impacting with another object.
<b>XE1Y1</b>	Unintended system motion Problem associated with any motion of the system or components that was not initiated by the user.
<b>XE5CH</b>	Unstable device Problem associated with the mechanical stability of the device.
<b>XE76A</b>	Vibration of device Problem associated with the undesirable mechanical oscillation.
<b>XE941</b>	<p><b>Optical problem</b></p> <p>Problem associated with transmission of visible light affecting the quality of the image transmitted or otherwise affecting the intended application of the visible light path.</p>
<b>XE5CX</b>	<p><b>Misfocusing</b></p> <p>The problem relates to the poor focusing of the object or the focus is on the wrong object or in the wrong area.</p>
<b>XE4W1</b>	<p><b>Optical decentration</b></p> <p>Problem associated with being off-center of optical lenses.</p>
<b>XE1VT</b>	<p><b>Optical discolouration</b></p> <p>Problem associated with an undesired change of color.</p>
<b>XE4BE</b>	<p><b>Optical distortion</b></p> <p>Problem associated with an optical defect in an image-forming system whereby the image is not the shape of an ideal image of the object.</p>
<b>XE93N</b>	<p><b>Optical obstruction</b></p> <p>Problem associated with the blocking of optical devices, e.g. visual pathways.</p>
<b>XE28Y</b>	<p><b>Output problem</b></p> <p>Problem associated with any deviation from the documented specifications of the device that relate to the end result, data, or test results provided by the device.</p>

<b>XE8NW</b>	<b>Audible prompt or feedback</b> Problem with any deviation from the documented specifications of the device that relate to audible feedback, e.g. voice prompts or beeps, but not safety-related alarms which are covered under "Protective measures problem".
<b>XE0WU</b>	Inappropriate audible prompt or feedback Problem with audible messages which do not guide a device user to the correct action.
<b>XE487</b>	Inaudible or unclear audible prompt or feedback Problem associated with audible prompts which cannot be heard clearly.
<b>XE8MP</b>	No audible prompt or feedback Problem associated with the device ceasing to provide audible prompts.
<b>XE2S2</b>	<b>Display or visual feedback problem</b> Problem with any deviation from the documented specifications of the device that relate to visual feedback, e.g. the display of information, images on a screen, or output from the device.
<b>XE4TX</b>	Device displays incorrect message Problem associated with providing incorrect display information.
<b>XE2NW</b>	Display difficult to read Problem associated with legibility of the display, compromising for instance the reading/interpretation of patient parameters or test results. Legibility problems can be due to color, size of font, display screen contrast or other factors.
<b>XE2ES</b>	Erratic or intermittent display A device does not consistently display the same message, result, reading, or image. E.g. the display might flicker, switch between readings or messages, or go completely blank for brief periods of time.
<b>XE7T8</b>	Image display error or artifact Problem with image display leading to corrupted images or readouts/measurement indications.
<b>XE2V3</b>	Image orientation incorrect Problem associated with an incorrect image orientation on the device display.
<b>XE5Q5</b>	No display or image Problem associated with the absence of display or image.
<b>XE4FQ</b>	No visual prompts or feedback Problem associated with the device ceasing to provide visual feedback.
<b>XE5XP</b>	Poor quality image Inadequate quality of an image or any visual representation displayed by the device, or output from the device.

<b>XE1C5</b>	Visual prompts will not clear Problem with visual messages which continue to be displayed on / by the device after the appropriate action has been taken.
<b>XE7Z4</b>	<b>Tactile prompts or feedback</b> Problem with any deviation from the documented specifications of the device that relate to tactile feedback, e.g. device vibrational prompt.
<b>XE6CE</b>	Inappropriate tactile prompt or feedback Problem with tactile feedback which does not guide a device user to the correct action.
<b>XE963</b>	No tactile prompts or feedback Problem associated with the device ceasing to provide tactile feedback.
<b>XE0KH</b>	<b>Energy output problem</b> Problem with the device's intended output of energy.
<b>XE7ST</b>	Energy spectrum incorrect Problem associated with the energy output from the device not being in the expected part of the spectrum.
<b>XE5PU</b>	Failure to deliver energy Problem associated with the failure of the device to deliver any energy.
<b>XE538</b>	Intermittent energy output Problem associated with the energy output from the device being inconsistent over time.
<b>XE81P</b>	Output above specifications Device output is exceeding the documented specifications of the device.
<b>XE8XC</b>	Output below specifications Device output is below the documented specifications of the device.
<b>XE2MC</b>	Therapeutic or diagnostic output failure Problem associated with the failure of the device to deliver the output required for treatment or identification of a disease.
<b>XE1US</b>	Therapy delivered to incorrect body area Problem associated with the device causing unintended therapeutic action to an area of the body other than the intended area.
<b>XE1ED</b>	<b>Radiation output problem</b> Problem with the device's intended output of radiation.
<b>XE5F0</b>	Radiation output failure Problem associated with the absence of radiation output from radiological or diagnostic devices.

<b>XE0JA</b>	Radiation overexposure Problem associated with excessive radiation emitted from radiological or diagnostic devices.
<b>XE74E</b>	Radiation underexposure Problem associated with too little radiation emitted from radiological or diagnostic devices.
<b>XE6UD</b>	Unexpected or unintended radiation output Device-emitted radiation when it was not supposed to. This applies to devices which are intended to emit radiation, and the radiation being emitted from the correct part of the device, but at an incorrect time.  Use "radiation leak" if the device emits radiation which should never have been emitted, or from a location from which it should never be emitted.
	<b><i>Exclusions:</i></b> Radiation leak (XE0B1)
<b>XE68Z</b>	<b>Gas output problem</b> Problem associated with gas output.
<b>XE7E5</b>	<b>No device output</b> Problem associated with no measurement outcome, value or data obtained from the device.
<b>XE4BB</b>	<b>Incorrect, inadequate or imprecise result or readings</b> Problem associated with a nonconforming end result, data, or test results provided by the device to its performance specifications.
<b>XE7TS</b>	Signal artifact Problem associated with impurities or interference in a signal (e.g. ECG artifact).
<b>XE3MS</b>	Failure to obtain sample The device does not collect or transfer the sample.
<b>XE2E8</b>	False negative result Problem associated with the device incorrectly reporting that something has not been detected and may mislead the operator into not taking certain actions when action should be taken.
<b>XE9K2</b>	False positive result Problem associated with the device incorrectly reporting that something has been detected and may mislead the operator to take certain actions.
<b>XE3XG</b>	Incorrect measurement Measurement obtained from or provided by the device is obviously incorrect.
<b>XE5E8</b>	Nonreproducible results Device results cannot be reliably reproduced.

<b>XE9D6</b>	High readings Reading provided by the device is too high or higher than expected.
<b>XE5KE</b>	Low readings Reading provided by the device is too low or lower than expected.
<b>XE485</b>	High test results Test results provided by the device are too high or higher than expected.
<b>XE8EM</b>	Low test results Test results provided by the device are too low or lower than expected.
<b>XE8YH</b>	Unable to obtain readings The device does not provide or display a valid reading.
<b>XE56S</b>	Missing test results Problem associated with the results of a test or measurement not appearing.
<b>XE3YZ</b>	<b>Unexpected therapeutic results</b> Problem associated with the use of the device for therapeutic purposes.
<b>XE16C</b>	<b>Electrical or electronic property problem</b> Problem associated with a failure of the electrical circuitry of the device.
<b>XE57L</b>	<b>Capturing problem</b> Problem associated with the inability of the device to achieve successful depolarization and contraction of a cardiac chamber caused by a pacemaker output pulse.
<b>XE0UH</b>	Failure to capture Problem associated with the failure to achieve effective and consistent depolarization of the heart resulting from the electrical stimulus of the pacemaker.
<b>XE18Z</b>	High capture threshold Problem with the amount of output energy needed to cause cardiac depolarization being higher than expected/desired.
<b>XE1T0</b>	Intermittent capture Problem associated with the ineffective and inconsistent depolarization of the heart.
<b>XE350</b>	Unstable capture threshold Problem with the amount of output energy needed to cause cardiac depolarization being unstable.
<b>XE4QC</b>	<b>Continuous firing</b> Problem associated with the excessive production of electrical impulses over a period.

<b>XE4HP</b>	<b>Arcing</b> Problem associated with electrical current flowing through a gap between two conductive surfaces, typically resulting in a visible flash of light.
<b>XE4X8</b>	Arcing at paddles Problem associated with electrical current flowing through a gap between paddles (conductive surfaces), typically resulting in a visible flash of light.
<b>XE7KZ</b>	Arcing of electrodes Problem associated with electrical current flowing through a gap between electrodes (conductive surfaces), typically resulting in a visible flash of light.
<b>XE2SR</b>	<b>Sparking</b> Problem associated with a flash of light related to an electrical discharge into a normally non conductive medium, such as air. Not associated with a discharge between two conductive surfaces.
<b>XE16Z</b>	<b>Battery problem</b> Problem associated with the internal power of the device (e.g. battery, transformer, fuel cell or other power sources).
<b>XE2MD</b>	Battery problem with high impedance Problem related to increased battery internal impedance.
<b>XE41Q</b>	Battery problem with low impedance Problem related to decreased battery internal impedance.
<b>XE548</b>	Failure to run on battery Problem associated with the device failing to operate when not connected to a fixed power source.
<b>XE5U8</b>	Premature discharge of battery Battery discharging earlier than expected.
<b>XE5ER</b>	<b>Charging problem</b> Problem associated with the inability of the device to successfully charge an electrical source.
<b>XE6QY</b>	Aborted charge Problem associated with the premature ending of the charging process (e.g. of a battery or other charge storage device).
<b>XE67U</b>	Delayed charge time Problem associated with an unexpected amount of time required to charge the device (e.g. a delay in starting charging or a longer than expected charge time).
<b>XE5PM</b>	Failure to charge Problem associated with inability to initiate the appropriate charging process (e.g. of a battery or other charge storage device)

<b>XE8DT</b>	<b>Failure to discharge</b> Problem associated with the failure of a battery or other charge storage device to appropriately discharge as intended. Does not apply to defibrillation.
<b>XE2B3</b>	<b>Power problem</b> Problem associated with the energy to operate the device.
<b>XE1DB</b>	Complete loss of power Problem associated with the lack of power to run the device.
<b>XE2A6</b>	Intermittent loss of power Problem associated with an intermittent disruption to the power to run the device.
<b>XE38R</b>	Failure to power up Problem associated with the inability of the device to turn on related to energy delivered to the device.
<b>XE7Z7</b>	Unintended power up Problem associated with the device turning on when not intended.
<b>XE0Q2</b>	<b>Device sensing problem</b> Problem associated with the device features that are designed to respond to a physical stimulus (temperature, illumination, motion, cardiac rhythms) and that do not transmit a resulting signal for interpretation or measurement.
<b>XE6SM</b>	Decreased sensitivity Problem with the device being less sensitive to an input than intended or expected.
<b>XE7QR</b>	Increased sensitivity Problem with the device being more sensitive to an input than intended or expected.
<b>XE8H3</b>	Failure to analyze signal Problem with the device not analyzing a signal.
<b>XE0K3</b>	Failure to select signal Problem associated with the failure of the device to select the appropriate input signal.
<b>XE6H7</b>	High sensing threshold Problem associated with the amount of input required by the device to detect a signal being higher than expected/desired.
<b>XE2P7</b>	Low sensing threshold Problem associated with the amount of an input required by the device to detect a signal being lower than expected/desired.
<b>XE9TK</b>	Loss of threshold Problem associated with the loss of the minimum amount of energy, voltage, or current needed to consistently stimulate the heart muscle.

<b>XE210</b>	Failure to sense Problem associated with the failure of the device designed to respond to a physical stimulus (as temperature, illumination, motion) to transmit a resulting signal for interpretation or measurement.
<b>XE02C</b>	Over-sensing Problem related to failure of the device to properly filter cardiac signals resulting in inappropriate device response.
<b>XE73Q</b>	Under-sensing Problem related to failure of the device to properly detect intrinsic cardiac activity and respond appropriately.
<b>XE69X</b>	Sensing intermittently Problem with the device receiving an incoming signal on an intermittent basis when expected to be continuous.
<b>XE28F</b>	Incorrect interpretation of signal Problem with the device inappropriately analyzing a signal.
<b>XE22D</b>	<b>Failure to conduct</b> Problem associated with the inability of the device to allow a current of electricity to pass or to conduct electricity continuously along an electrical path.
<b>XE8S0</b>	<b>Interrogation problem</b> Problems associated with the device's ability to respond to signals from a system designed to interrogate its status.
<b>XE9HR</b>	Difficult to interrogate Problem associated with difficulty of a transponder system to trigger a response.
<b>XE3PE</b>	Failure to interrogate Problem associated with the device failure to appropriately respond to signals from a system designed to interrogate its status.
<b>XE8HJ</b>	<b>Pacing problem</b> Problem associated with the inability of the device to generate a therapeutic simulated heart beat via electrical impulses.
<b>XE19S</b>	Failure to convert rhythm Failure of the device therapy or set of therapies to terminate the harmful cardiac rhythm that the therapy is meant to terminate.
<b>XE47M</b>	Inaccurate synchronization Problem associated with an error due to imperfect timing of two operations, e.g. signal transmission time.

<b>XE2LL</b>	Inappropriate waveform Failure of the device to generate a correctly-shaped pacing output, e.g., a waveform that is too wide.
<b>XE9A9</b>	No pacing Problem associated with the device ceasing to deliver paces.
<b>XE281</b>	Pacemaker found in back-up mode A device with a pacing function found in back-up Mode. This may be an appropriate fail-safe action (e.g. end of battery life), or be caused by device-malfunction or due to operator error.
<b>XE13R</b>	Pacing asynchronously Problem associated with a pacing transmission process such that between any two significant instants in the same group, there is always an integral number of unit intervals. Between two significant instants located in different groups, there are not always an integral number of unit intervals.
<b>XE10M</b>	Pacing inadequately Pacing voltage or pulse width is less than desired.
<b>XE1SU</b>	Pacing intermittently Problem associated with the failure of pacing device for a limited period of time, following which the item recovers its ability to perform its required function without being subjected to any external corrective action. Note: such a failure is often recurrent.
<b>XE99K</b>	Pocket stimulation Problem associated with a pocket of skin in which the pulse generator is housed.
<b>XE440</b>	<b>Defibrillation problem</b> Problem associated with the inability of the device to provide an appropriate or successful electrical shock.
<b>XE12S</b>	Failure to deliver shock Problem associated with the failure of the device to deliver electrical energy intended to change an electrical rhythm.
<b>XE6T0</b>	Inappropriate shock Problem associated with the inappropriate delivery of an electrical energy.
<b>XE8BU</b>	Intermittent shock Problem associated with the failure to deliver shock for a limited period of time, following which the item recovers its ability to perform its required function without being subjected to any external corrective action. Note: such a failure is often recurrent.
<b>XE739</b>	<b>Unintended electrical shock</b> The device delivers unintended electrical shock.

<b>XE9QT</b>	<b>Grounding malfunction</b> Problem associated with the inability to connect conductors of an electronic system for the purpose of controlling or impeding ground currents and voltages.
<b>XE3S7</b>	<b>Electrical overstress</b> Problem associated with an electrical activity that exceeded the specified threshold limit of the internal integrated circuitry.
<b>XE268</b>	<b>Electro-static discharge</b> Problem associated with the discharge of electricity between two bodies previously electrically charged.
<b>XE20P</b>	<b>Failure to shut off</b> Problem associated with the device not powering off when a shutdown was requested.
<b>XE7JN</b>	<b>Unexpected shutdown</b> Problem associated with the device unexpectedly powering down.
<b>XE4PR</b>	<b>Electromagnetic compatibility problem</b> Problem associated with the ability of a system to function in its electromagnetic environment without introducing intolerable disturbances to anything in its environment.
<b>XE5FA</b>	<b>Circuit failure</b> Problem associated with a failure of the internal network paths or electrical circuitry (i.e. electrical components, circuit boards, wiring)
<b>XE6ZB</b>	<b>Impedance problem</b> Problem associated with electrical impedance levels between device and patient connections.
<b>XE55U</b>	<b>Calibration problem</b> Problem associated with the operation of the device, related to its accuracy, and associated with the calibration of the device.
<b>XE6GR</b>	<b>Failure to calibrate</b> Problem associated with the failure of the device to perform a self-calibration procedure or process designed to assure the accuracy and proper performance of the device.
<b>XE8MT</b>	<b>Failure to recalibrate</b> Problem associated with the failure of the device which is unable to regain a standard level of accuracy when performing a calibration procedure or process designed to assure the accuracy and proper performance of the device.
<b>XE7H5</b>	<b>Imprecision</b> Problem associated with the device providing imprecise measurements when compared to a reference standard.

<b>XE1WU</b>	<b>Overcorrection</b> Problem associated with an adjustment that surpasses a set of criteria.
<b>XE586</b>	<b>Temperature problem</b> Problem associated with the device producing unintended temperatures
<b>XE9C7</b>	<b>Excessive cooling</b> Problem associated with the device producing temperatures that are lower than specified.
<b>XE77H</b>	<b>Excessive heating</b> Problem associated with the device having a warming or heating function, producing excessive heat.
<b>XE200</b>	<b>Insufficient cooling</b> Problem associated with the device insufficiently cooled in device active (working) or/and non-active (nonworking) state.
<b>XE2A4</b>	<b>Insufficient heating</b> Problem associated with the device or its components producing temperatures that are not as high as what is specified.
<b>XE14Q</b>	<b>Overheating of device</b> Problem associated with the device producing high temperatures, such that its operation is compromised or harm is caused (e.g. overheating that produces melting of components or automatic shutdown).
<b>XE6DP</b>	<b>Thermal decomposition of device</b> Problems associated with a discoloration or destruction as a result of thermal decomposition of the device.
<b>XE5T3</b>	<b>Fire</b> Problem associated with the combustion of the device with a steady flame.
<b>XE03F</b>	<b>Flare or flash</b> Problem associated with device-related burn with an unsteady flame.
<b>XE5H5</b>	<b>Smoke</b> Problem associated with a cloud of vapor or gas generated from the device, generally associated after a fire or a burn.
<b>XE85E</b>	<b>Computer software problem</b> Problem associated with written programs, codes, and/or software system that affects device performance or communication with another device.
<b>XE6PS</b>	<b>Application network problem</b> Problem associated with the deviations from documented system specifications that affects overall system performance and/or the performance of an individual device connected to that system.

<b>XE8HP</b>	<b>Application program problem</b> Problem associated with the requirement for software to fulfill its function within an intended use or application.
<b>XE5YA</b>	Application program freezes, or becomes nonfunctional Problem associated with freezing and becoming nonfunctional of an application program.
<b>XE46R</b>	Application program problem, dose calculation error Problem associated with the written program code or application software used by the device to calculate specific measurements or quantities managed by the device.
<b>XE09U</b>	Application program problem, medication error Event in which the device software results in errors of medication preparation or administration.
<b>XE2BJ</b>	Application program problem, parameter calculation error Problem associated with the written program code or application software used by the device to calculate parameters other than those related to dose or power.
<b>XE6SW</b>	Application program problem, power calculation error Problem associated with the written program code or application software used by the device for calculations related to device power.
<b>XE2CW</b>	Application program version or upgrade problem Problem associated with installing updates to a software system that affects the device performance or communication with another device.
<b>XE5CT</b>	Problem with software installation Problem associated with installing the device software in a manner that allows full functioning of the device. Source of installation could be manufacturer or user.
<b>XE842</b>	Unintended application program shutdown Problem associated with an unintended shutdown by malfunction of the application program.
<b>XE1HG</b>	<b>Program or algorithm execution problem</b> Problem associated with execution problems relating to program or algorithm.
<b>XE87N</b>	Delayed program or algorithm execution Problem associated with delayed execution relating to program or algorithm.
<b>XE1WW</b>	Intermittent program or algorithm execution Problem associated with intermittent execution relating to program or algorithm.
<b>XE0UN</b>	Program or algorithm execution failure Problem associated with the failure of a program or algorithm to execute. Sudden/unexpected interruption to a program's execution.

<b>XE4Z0</b>	<b>Computer operating system problem</b> Problem associated with software, firmware, and/or hardware elements that control the execution of computer programs and provide such services as computer resource allocation, job control, input/output control, and file management in a computer system.
<b>XE5F1</b>	Operating system becomes nonfunctional Problem associated with malfunction of the computer operating system as opposed to an application software problem.
<b>XE6VL</b>	Operating system version or upgrade problem Problem associated with replacing an older operating system to an up-to-date operating system.
<b>XE5EP</b>	<b>Computer system security problem</b> Problem associated with unauthorized access to or modification of a software system resulting in a loss of confidentiality, integrity, or availability of written program code, application software, or data or entire device.
<b>XE9XK</b>	Application security problem Problem associated with the acquisition of computer programming codes that can replicate and spread from one computer system to another thereby leading to damaged software, hardware and data.
<b>XE15X</b>	Unauthorized access to computer system Problem associated with an access that was not permitted to the computer system that may lead to modification of program, corruption of data, or a break in network security. This concept is closely associated with computer integrity which is the degree to which a system or component prevents unauthorized access to, or modification of, computer programs or data.
<b>XE2ZM</b>	<b>Data back-up problem</b> Problems relating to a system, component, file, procedure, or person available to replace or help restore a primary item in the event of a failure or externally caused disaster.
<b>XE72G</b>	Failure to back up Problem associated with the inability to back up or to retrieve a backed-up version (corrupted file) of device data or system files.
<b>XE8PZ</b>	Failure to convert to back-up Problem associated with a failure to transition from a primary system, component, file, procedure to a backup in response to a failure in the primary item.
<b>XE99Y</b>	<b>Data problem</b> Event in which data (charting, orders, results) is not correctly stored, transferred, updated, or displayed.

<b>XE992</b>	<p><b>Loss of data</b></p> <p>Event in which data is unintentionally permanently or temporarily lost, deleted, corrupted, or overwritten.</p>
<b>XE7BE</b>	<p><b>Patient data problem</b></p> <p>Event in which data is accessed by the healthcare provider and either the wrong patient or the wrong data is retrieved despite correct inquiry procedures.</p>
<b>XE048</b>	<p><b>Date or time related software problem</b></p> <p>Problem associated with programming of calendar dates and/or time as a factor in the operation of the device.</p>
<b>XE3UR</b>	<p><b>Connection problem</b></p> <p>Problem associated with linking of the device and/or the functional units set up to provide means for a transfer of liquid, gas, electricity or data.</p>
<b>XE9D0</b>	<p><b>Blocked connection</b></p> <p>Problem associated with linking of the device whereby their functional units set up to provide means for a transfer of fluid, gas, or data is prevented or impeded.</p>
<b>XE74X</b>	<p><b>Decoupling</b></p> <p>Problem associated with the device being unassociated in such a way that fluid, gas, power or signal information may not be transferred from one to another.</p>
<b>XE5WZ</b>	<p><b>Disconnection</b></p> <p>Problem associated with the linking of the device having a sufficient open space to prevent gas, liquid or electrical current flow between connectors.</p>
<b>XE9HJ</b>	<p><b>Failure to disconnect</b></p> <p>Problem associated with the linking of the device whereby termination of the transfer of liquid, gas, electricity, or information cannot be accomplished, or linking components do not come apart, or disconnect, when expected.</p>
<b>XE3G6</b>	<p><b>Loose or intermittent connection</b></p> <p>Problem associated with the connection of the device being loose or intermittent.</p>
<b>XE0WB</b>	<p><b>Misconnection</b></p> <p>Problem associated with the connection of the device being improper or not in accordance with device specification, requirements or intended uses.</p>
<b>XE4C0</b>	<p><b>Incomplete or inadequate connection</b></p> <p>Problem associated with a partial linking of the device whereby device may appear to be connected however only a partial, intermittent or no transfer of liquid, gas, electricity, or information can be accomplished.</p>
<b>XE0P9</b>	<p><b>Fitting problem</b></p> <p>Problem associated with the connection of the device whereby channels, switching systems, and other functional units set up to provide means for a transfer of liquid, gas, electricity, or information do not match or fit.</p>

<b>XE0JD</b>	<b>Communication or transmission problem</b> Problem associated with the device sending or receiving signals or data. This includes transmission among internal components of the device to which the device is intended to communicate.
<b>XE3EG</b>	<b>Failure to read input signal</b> Problem associated with a failure of the device to read a signal for interpretation or measurement.
<b>XE0V5</b>	<b>Failure to transmit record</b> Problem associated with a failure of the device to transmit a record for interpretation or measurement.
<b>XE4JX</b>	<b>Intermittent communication failure</b> Inconsistent or lack of intended communication of data among internal components or with other external devices.
<b>XE5H8</b>	<b>Telemetry discrepancy</b> Problem associated with variability of the transmission of telemetry signals.
<b>XE4YY</b>	<b>Wireless communication problem</b> Problems with the RF wireless technology characteristics and performance (e.g., frequency, output power, range, reception), wireless quality of service, wireless coexistence, security of wireless signals and data, and electromagnetic compatibility.
<b>XE7NV</b>	<b>Infusion or flow problem</b> Problem associated with the device failing to deliver liquids or gases as intended (e.g. delivering drugs at incorrect rate, problems with drawing fluid from a system).
<b>XE4VT</b>	<b>Deflation problem</b> Problem associated with the inability of the device to release its contents.
<b>XE6YH</b>	<b>Excess flow or over-infusion</b> Problem associated with a delivery overdose of therapeutic agents, such as drugs or fluids being delivered into a device or a patient.
<b>XE49K</b>	<b>Filling problem</b> Problem associated with the method or amount of time associated with the delivery of a fluid. Time to delivery or amount of delivered entity may be affected.
<b>XE3T4</b>	Inability to auto-fill Complete failure to fill as part of an automated process. For insufficient filling use "Short Fill". For excessive filling use "Overfill". For inconsistent filling use "Volume Accuracy Problem".

<b>XE97E</b>	<p>Overfill Excessive filling of a device</p> <p><b>Exclusions:</b>      Insufficient filling (XE8RE)                         Inconsistent filling (XE1QQ)</p>
<b>XE8RE</b>	<p>Short fill Insufficient filling of a device.</p> <p><b>Exclusions:</b>      Complete failure to fill (XE3T4)                         Inconsistent filling (XE1QQ)</p>
<b>XE1QQ</b>	<p>Volume accuracy problem Inconsistent filling of a device. This describes a problem which is observed to vary between overfilling and under filling, and may be intermittent.</p> <p><b>Exclusions:</b>      Consistent overfilling (XE97E)                         Consistent short filling (XE8RE)</p>
<b>XE2YK</b>	<p><b>Filtration problem</b> Problem associated with the process of passing a substance through a porous medium, e.g., a blood clot filter for the removal of suspended matter.</p>
<b>XE3VH</b>	<p>Inadequate filtration process Problem associated with the filter failing to remove items or substances which should have been removed.</p>
<b>XE4UN</b>	<p>Inadequate ultra filtration Problem associated with the transfer of fluid between the blood and dialysate through the dialysis membrane due to a pressure gradient (trans-membrane pressure) existing between the blood and dialysate compartments.</p>
<b>XE1H4</b>	<p><b>Improper flow or infusion</b> Problem associated with the regulation and delivery of therapeutic agents (e.g. air, gas, drugs or fluids into a device or a patient under positive pressure).</p>
<b>XE9RA</b>	<p>Backflow Continuous flow of fluid (e.g. liquid, gas) against the intended flow direction.</p>
<b>XE447</b>	<p>Free or unrestricted flow Problem associated with uncontrolled flow of infusion of air, gas or fluids.</p>
<b>XE628</b>	<p>Gradient increase Problem associated with the increased rate of change in temperature, pressure, or other variables as a function of distance, time, etc.</p>
<b>XE667</b>	<p>Inaccurate delivery Delivery at endpoint not as intended; either too low or too high.</p>

<b>XE44F</b>	Inaccurate flow rate Problem associated with fluctuations in the flow volume delivered per time, even if end volume is correct, and delivered in the correct total time.
<b>XE2DM</b>	Intermittent infusion Problem associated with the infusion not being stable, characterised by intermittent stoppages to the flow.
<b>XE09Q</b>	Reflux with device Problem associated with partial backflow, compromising the device's flow output.
<b>XE8AY</b>	Restricted flow rate Problem associated with flow rate. Flow volume delivered over time is not reaching intended flow rate.
<b>XE1V7</b>	Tidal volume fluctuations Problem associated with the amount of gas that is inspired and expired during one respiratory cycle.
<b>XE5GY</b>	<b>Inflation problem</b> Problem associated with the inability of the device to expand or enlarge with the intended inflation agent (e.g. saline or air).
<b>XE1S7</b>	<b>Insufficient flow or under infusion</b> Problem associated with an insufficient dose of therapeutic agents, e.g., drugs or fluids being delivered into a patient under positive pressure.
<b>XE1Y3</b>	<b>No flow</b> Problem arising from the device failing to deliver the specified liquid or gas.
<b>XE94H</b>	Failure to deliver flow Failure (=complete nonperformance) with regard to the intended function of delivery.
<b>XE1JK</b>	Failure to infuse Failure (=complete nonperformance) with regard to the intended function of infusion.
<b>XE8L2</b>	Inability to irrigate Failure (=complete nonperformance) with regard to the intended function of irrigation.
<b>XE3GX</b>	<b>Obstruction of flow</b> Problem related to an obstruction or blockage within the device component (e.g. tube, opening, pipe) that results in restriction of flow.
<b>XE3QL</b>	Complete blockage Problem related to an obstruction or blockage within the device component (e.g. tube, opening, pipe) that results in no flow.

<b>XE2JF</b>	<b>Partial blockage</b> Problem related to an obstruction or blockage within the device component (e.g. tube, opening, pipe) that results in a reduction of the flow rate.
<b>XE6BM</b>	<b>Difficult to flush</b> The device is difficult to flush, possibly indicating an obstruction within device.
<b>XE8Z5</b>	<b>Pressure problem</b> Problem associated with the application of a force either internal or external to device that compromises the flow of fluid or gas.
<b>XE3XR</b>	<b>Decrease in pressure</b> Unintended decrease in pressure, compromising the device's intended function.
<b>XE6S6</b>	<b>Increase in pressure of device</b> Unintended increase in pressure, compromising the device's intended function.
<b>XE94J</b>	<b>No pressure</b> Unintended complete loss of pressure, compromising the device's intended function.
<b>XE6Z5</b>	<b>Pumping problem</b> Problem associated with pump performance deviating from specifications in a way to compromise flow or infusion.
<b>XE64X</b>	<b>Decreased pump speed</b> Unintended decrease in pump speed and hence, probably, flow rate, compromising the intended function of the device.
<b>XE7BN</b>	<b>Increased pump speed</b> Unintended increase in pump speed and hence, probably, flow rate, compromising the intended function of the device.
<b>XE5R0</b>	<b>Failure to pump</b> Problem associated with the device which fails to start pumping.
<b>XE0TF</b>	<b>Pumping stopped</b> Unexpected or unintended cessation of pump.
<b>XE69E</b>	<b>Suction problem</b> Problem associated with suction equipment, which may be a manual, electrical, vacuum or pressure source operated to evacuate and remove undesired substances (air, gas, fluid, or particulates) via tubing and collection bag.
<b>XE3Y3</b>	<b>Decrease in suction</b> Problem associated with the removal of fluid or gas from a body cavity due to decreased suction.

<b>XE35T</b>	Increase in suction Problem associated with the removal of excess fluid or gas from a body cavity due to increased suction.
<b>XE5FE</b>	Suction failure Problem associated with the complete inability to provide suction.
<b>XE0B4</b>	<b>Priming problem</b> Problem associated with the preparation of the device to begin pumping.
<b>XE3KR</b>	Failure to prime Problem associated with the device failing to begin the priming process (i.e. the process of preparation of device for the delivery of fluids).
<b>XE63F</b>	Incomplete or inadequate priming Problem associated with not adequately preparing the device.
<b>XE4GH</b>	<b>Activation, positioning or separation problem</b> Problem associated with any deviations from the documented specifications of the device that relate to the sequence of events for activation, positioning or separation of device. NOTE 1 “Deployment” is synonymous with “activation”.
<b>XE76U</b>	<b>Activation problem</b> Problem associated with the activation of the device.
<b>XE48N</b>	Activation failure or expansion failures Problem associated with the device failing to be activated including expansion.
<b>XE9Y0</b>	Difficult or delayed activation Problem associated with delayed or difficult activation of the device.
<b>XE6E9</b>	Premature activation Problem associated with early and unexpected activation of the device.
<b>XE5VT</b>	Self-activation or keying Problem associated with the unintended activation of the device, or the device having been unexpectedly turned on during use.
<b>XE2J9</b>	<b>Positioning problem</b> Problem associated with the movement of the device to an intended location.
<b>XE41N</b>	Positioning failure Problem associated with the inability of the device to be positioned in a specified location.
<b>XE8P2</b>	Malposition of device Problem associated with the device being positioned in a location other than intended or specified.

<b>XE74U</b>	Difficult or delayed positioning Problem associated with users experiencing difficulty or delay to position the device to a specified location.
<b>XE4CG</b>	Failure to advance Problem associated with failure to move the device to an intended location.
<b>XE9NU</b>	Difficult to advance Problem associated with difficulty moving the device to an intended location (e.g. difficulty in advancing guide wire).
<b>XE2JZ</b>	Difficult to insert Problem associated with problems introducing or inserting the device, even if the user is operating the device in accordance with the instructions for use or labeling.
<b>XE0HC</b>	Difficult to remove Problem associated with the use of the device in terms of user experiencing difficulty to take out or get rid of the device, even if the user is operating device in accordance with the instructions for use or labeling.
<b>XE9MQ</b>	Entrapment of device Problem associated with the device caught within patient vasculature, tissue, or other device.
<b>XE1KB</b>	<b>Separation problem</b> Problem associated with the detachment or separation of the device.
<b>XE9BM</b>	Separation failure Problem associated with the device or one of its components failing to detach or separate as intended.
<b>XE6U9</b>	Difficult or delayed separation Problem associated with users experiencing difficulty or delay with detachment or separation of the device.
<b>XE1TT</b>	Premature separation of device Problem associated with an early and unexpected detachment or separation of the device from the system.
<b>XE1XC</b>	<b>Protective measures problem</b> Problem associated with any deviations from the documented specifications of the device that relate to the implemented and inherited design features specific to devices used for reducing risks to patient or caregiver or maintaining risks within specified levels.
<b>XE98H</b>	<b>Device alarm system</b> Problem associated with the alarm system of the device.

<b>XE5JP</b>	Alarm not visible The device does not display an alarm message when required.
<b>XE6DH</b>	No audible alarm The device fails to emit an audible alarm.
<b>XE2RK</b>	Low audible alarm The audible device alarm cannot be heard clearly.
<b>XE3QU</b>	Delayed alarm The device alarm system operates with delay.
<b>XE2K0</b>	False alarm Problem associated with the device providing incorrect alarm warning or alert to user.
<b>XE3UE</b>	Defective alarm The device alarm does not operate as expected and/or in agreement with device's specifications.
<b>XE78D</b>	<b>Fail-safe problem</b> Problem associated with the feature that prevents the unsafe use of the device.
<b>XE659</b>	Fail-safe did not activate Problem associated with the device fail-safe mechanism, which did not function or function in a non effective way, compromising safe use of the device.
<b>XE6VE</b>	No fail-safe mechanism The device does not have a fail-safe mechanism, although such mechanism would be required for its appropriate and/or safe functioning.
<b>XE3V3</b>	<b>Failure of device to self-test</b> Problem associated with the device failing to perform an internal self-diagnostic process to ensure normal operation during or prior to use.
<b>XE16Y</b>	<b>Failure to auto stop</b> Problem associated with the inability of device to turn itself off when the device is not in an operable condition.
<b>XE4KE</b>	<b>Reset problem</b> Problem associated with setting a variable, register, or other storage location back to a prescribed state.
<b>XE59S</b>	Failure to reset Problem associated with the device failing to set a variable, register, or other storage location back to a prescribed state.

<b>XE0HZ</b>	Failure to zero Problem associated with the device failing to set a variable, register, or other storage location back to zero.
<b>XE2T4</b>	Inappropriate or unexpected reset Problem associated with the device setting a variable, register, or other storage location to an inappropriate or unexpected state.
<b>XE1H0</b>	<b>Premature indicator activation</b> Problems with the activation of a protective measure indicator earlier than expected.
<b>XE6KH</b>	Premature elective replacement indicator Problems with the early or unexpected activation of the elective replacement indicator.
<b>XE6ND</b>	Premature end-of-life indicator Problem with the early or unexpected activation of the end-of-life indicator.
<b>XE4PS</b>	<b>Shielding failure</b> Problem associated with the device inability to act as a barrier for absorption of radiation energy in X-rays, gamma rays, etc.
<b>XE452</b>	<b>Compatibility problem</b> Problem associated with compatibility between device, patients or substances (medication, body fluid, etc.)
<b>XE02E</b>	<b>Component or accessory incompatibility</b> Problem associated with the incompatibility of any device while being operated in the same use environment thereby leading to a dysfunction between the devices.
<b>XE7N5</b>	Accessory incompatible An accessory required for the intended purpose of the device appears incompatible with the device, thus compromising the intended function of the device.
<b>XE1UE</b>	Component incompatible A component required for the proper functioning of the device is not compatible with other components or subassemblies of the device, thus compromising the intended function of the device.
<b>XE8KS</b>	<b>Device-device incompatibility</b> Problem associated with the incompatibility of two or more devices while being operated in the same use environment thereby leading to a dysfunction of more than one device.
<b>XE0HJ</b>	<b>Measurement system incompatibility</b> Problem associated with the incompatibility of the measurement systems between and/or within device systems that are inherent to the individual device thereby leading to miscalculated or mismatched measurements from those devices, e.g., international metric system versus U.S. measurement system.

<b>XE4UP</b>	<b>Unintended compatibility</b> Problem associated with the ability of two or more devices which are intended to be incompatible but are able to work or fit together.
<b>XE4XW</b>	<b>Contamination or decontamination problem</b> Problem associated with the presence of any unexpected foreign substance found in the device, on its surface or in the package materials, which may affect performance or intended use of the device, or problem that compromises effective decontamination of the device.
<b>XE9L2</b>	<b>Contamination during use</b>
<b>XE9H4</b>	Biofilm coating in device Problem associated with the undesired introduction of a biofilm coating into or onto the device.
<b>XE2AR</b>	Contamination of device ingredient or reagent Problem associated with the undesired introduction of impurities either chemical or microbiological in nature, or of foreign matter into or onto the device ingredient or reagent.
<b>XE4VF</b>	Device contamination with body fluid Problem associated with the undesired presence of body fluid in/on the device, which is not part of the documented device specifications and requirements.
<b>XE9AH</b>	Device contamination with chemical or other material Problem associated with contamination of the device with chemical substance or other non biologic material.
<b>XE97G</b>	Microbial contamination of device Problem associated with undesired microbial contamination of the device.
<b>XE450</b>	<b>Device contaminated during manufacture or shipping</b>
<b>XE5LK</b>	<b>Device reprocessing problem</b>
<b>XE3MN</b>	Failure to clean adequately Problem associated with the failure of the device or operator to remove any visible soil, foreign material or organism deposits on the external surfaces, crevices, and joints of the device.
<b>XE4A4</b>	Failure to disinfect Failure to properly disinfect the device when reprocessing it.
<b>XE0VE</b>	Flushing problem Failure to properly disinfect the device when reprocessing it.
<b>XE2LR</b>	Problem with sterilisation Device was not sterilized properly during reprocessing.

<b>XE0HG</b>	Residue after decontamination Problem associated with the decontamination process not adequately removing unwanted visible soil, foreign material, or organism deposits.
<b>XE6K5</b>	<b>Environmental compatibility problem</b> Problem associated with the surrounding conditions in which the device is being used such as temperature, noise, lighting, ventilation, or other external factors such as power supply.
<b>XE027</b>	<b>Ambient noise problem</b> Problem associated with any undesired acoustic energy or vibration that tends to interfere with the operation of the device.
<b>XE5R1</b>	<b>Ambient temperature problem</b> Problem associated with compromised device performance at the ambient temperature or the storage at an inappropriate ambient temperature.
<b>XE50X</b>	<b>Fumes or vapours as environmental compatibility problem</b> Problem associated with the visibility, odor, or toxicity of an ambient vapor or gas.
<b>XE011</b>	<b>Fungus in device environment</b> Problem associated with the visibility of molds, mildews, yeasts, and/or mushrooms in the immediate environment in which the device is being used.
<b>XE8HD</b>	<b>Moisture or humidity problem</b> Problem associated with an unsatisfactory humidity level in the storage or use environment which affects the device performance.
<b>XE7KA</b>	<b>Ventilation problem in device environment</b> Problem associated with the circulation of fresh air in the immediate atmosphere in which the device is being used.
<b>XE5NF</b>	<b>Device unsafe to use in environment</b> Problem associated with environmental condition that results in the unsafe use of the device. (E.g. electromagnetic fields, noise, vibration, microbiological contamination etc.)
<b>XE55E</b>	<b>Environmental particulates</b> Problem associated with fine solids or liquid particles such as dust, smoke, fume, and/or mist suspended in the immediate atmosphere in which the device is being used.
<b>XE6V9</b>	<b>Medical gas supply problem</b> Problem associated with the facility-supplied medical gases such as medical air, oxygen, nitrous oxide, and nitrogen.
<b>XE5ZE</b>	<b>Electrical power problem</b> Problem associated with the quality of the facility-supplied power.

<b>XE2H3</b>	<b>Installation related problem</b> Problem associated with unsatisfactory installation, configuration, and/or setup of a specific device.
<b>XE36N</b>	<b>Misassembled during installation</b> Problem associated with the use of the device characterised by incorrect assembly of device components, parts or constituents.
<b>XE3J4</b>	<b>Labelling, instructions for use or training problem</b> Problem associated with device markings / labelling, instructions for use, training and maintenance documentation or guidelines.
<b>XE23E</b>	<b>Device markings or labelling problem</b> Problem associated with the written, printed or graphic material accompanying or affixed to the device or any of its packaging. This includes verbal instructions relating to identification, technical description, and usage provided by the device manufacturers. Problems can include but are not limited to this material being unclear, missing, worn out, incorrect or inaccurate.
<b>XE25T</b>	<b>Lack of maintenance documentation or guidelines</b> Problem associated with user facility not receiving adequate service documentation, guidelines, or recommendations to perform preventative and corrective maintenance and performance assurance checks.
<b>XE13S</b>	<b>Inadequate instructions for healthcare professional</b> Problem associated with inaccuracies in any written, printed, or graphic matter that is affixed to the device or its packaging with any matter that accompanies the device including verbal instructions related to identification, technical description and use of device provided by the device manufacturers that is intended for healthcare professionals.
<b>XE17P</b>	<b>Inadequate instructions for non-healthcare professional</b> Problem associated with users being unclear and not able to follow any written, printed, or graphic matter that is affixed to device or its packaging with any matter that accompanies the device including verbal instructions related to identification, technical description and use of the device provided by the device manufacturers that vary from the standard of medical care in a given environment.
<b>XE22G</b>	<b>Inadequate or insufficient training</b> Problem associated with facility not providing satisfactory initial and/or periodic user training covering operation of the device.
<b>XE5DG</b>	<b>Human-device interface problem</b> Problem associated with an act or omission of an act that has a different result than that intended by the manufacturer or expected by the operator.
<b>XE1C2</b>	<b>Device difficult to set up or prepare</b> Problem associated with the use of the device in terms of user experiencing difficulty in preparing device for use, even if the operation is being performed according to labeled instructions for use.

<b>XE3B8</b>	<b>Device difficult to program or calibrate</b> The device is difficult to program, calibrate or set to desired state, even by appropriately trained user/operator.
<b>XE2N3</b>	<b>Device difficult to maintain</b> Problem associated with the user's ability to service the device according to the manufacturer specifications relating to the device routine maintenance, i.e., periodic inspection, failure detection, repair, and care of the device to sustain or restore acceptable operating conditions.
<b>XE35S</b>	<b>Inadequate user interface</b> Problem associated with the means by which the operator and the equipment communicate or interact.
<b>XE0AG</b>	<b>Use of device problem</b> Problem associated with failure to process, service, or operate the device according to the manufacturer's recommendations or recognised best practices.
<b>XE6PE</b>	<b>Device handling problem</b> Handling of the device not in accordance with specification, prior to use on the patient.
<b>XE7S3</b>	<b>Use of incorrect control settings</b> Problem associated with the use of the device in terms of inappropriate and false control setting for the device's specified operation and/or intended use.
<b>XE2XZ</b>	<b>Improper or incorrect procedure or method</b> Problem associated with the use of the device in terms of nonconforming to that device's intended use, specifications, procedure and process or service instructions and information provided by the device manufacturers.
<b>XE7VD</b>	<b>Off-label use</b> Problem associated with the device which has been used for an unapproved indication or for an unapproved intended use.
<b>XE61V</b>	<b>Misassembled</b> Problem associated with incorrect assembly of the device or constituents after being put into use.
<b>XE3GL</b>	<b>Adverse event without identified device or use problem</b> An adverse event (e.g. patient harm) appears to have occurred, but there does not appear to have been a problem with the device or the way it was used.
<b>XE3DN</b>	<b>No apparent adverse event</b> A report has been received but the description provided does not appear to relate to an adverse event.  This code allows a report to be recorded for administration purposes, even if it doesn't meet the requirements for adverse event reporting.

**XE1W0****Appropriate term or code not available for aspects of incidents related to devices**

The device problem is not adequately described by any other term.

Note: this code must not be used unless there is no other feasible code. The preferred term should be documented when submitting an adverse event report. This information will be used to determine if a new term should be added to the code table.

Investigation conclusion of events related to devices

**XE1UR****Cause traced to device design****XE7NC****Cause traced to component failure****XE2TX****Cause traced to manufacturing****XE18E****Cause traced to transport or storage****XE7NN****Cause traced to infrastructure****XE1WV****Cause traced to environment****XE5AS****Cause traced to maintenance****XE5UX****Cause traced to training****XE674****Cause traced to labeling****XE5BM****Cause cannot be traced to device****XE6LX****Cause traced to user****XE0QB****Known inherent risk of device****XE8UG****Falsified device****XE51D****No problem with device detected****XE2SY****Cause of problem with device not established****XE0T3****Conclusion not yet available regarding problem with device**

Findings of investigations related to devices

**XE0WX****Biological problem with device identified**

Problems relating to, caused by or affecting biological processes or living organisms.

**XE5T0****Biocompatibility problem with device identified**

The device causes cellular or tissue responses that elicit an undesirable local or systemic effect in the recipient or beneficiary of that therapy. (See ISO 10993)

<b>XE4YZ</b>	<b>Biological contamination of device</b> The undesirable presence of living organisms such as bacteria, fungi, or viruses or their products (enzymes or toxins).
<b>XE7B7</b>	<b>Material or material leachate pyrogenic problem with device identified</b> The undesirable presence of pyrogens or fever-producing organisms caused by materials that permeate through the device.
<b>XE2RY</b>	<b>Cytotoxicity problem with device identified</b> The device was found to have an undesirable level of toxicity to living cells.
<b>XE2PA</b>	<b>Genotoxicity problem with device identified</b> The device's ability to cause damage to genetic material (e.g. leading to malignant tumors). (See ISO 10993)
<b>XE7AM</b>	<b>Hematological problem with device identified</b> The device affects or impacts the blood or its components. (See ISO 10993 all parts)
<b>XE1Y9</b>	<b>Unintended presence of allergens in device identified</b> Unintended or unexpected presence of allergens in the device. <b>Exclusions:</b> Presence of allergen expected but not adequately labelled (XE1YT)
<b>XE2XW</b>	<b>Reproductive toxicity problem with device identified</b> The device affects reproductive function, embryo development (teratogenicity), and prenatal and early postnatal development. (ISO 10993 part 3)
<b>XE4CB</b>	<b>Electrical problem with device identified</b> Events associated with an electrically powered device where an electrical malfunction results in a device problem (e.g. electrical circuitry, contact or component failed) even if the problem is intermittent.
<b>XE1YA</b>	<b>Electrical or electronic component problem with device identified</b> The performance of an electrical or electronic component was found to be inadequate.
<b>XE53K</b>	<b>Hardware timing problem with device identified</b> Problem that results from improper sequential activation of components.
<b>XE546</b>	<b>Impedance problem with device identified</b> Problems due to insufficient or excessive resistance to current flow either by the device or circuit.
<b>XE1TX</b>	<b>Insulation problem with device identified</b> Problems due to inadequate or incorrect electrical insulation material.

<b>XE4PP</b>	<b>Open circuit in device</b> Problem due to an electrical circuit that does not conduct current because a switch is open, a wire is broken, etc.
<b>XE2V6</b>	<b>Current leakage problem of device identified</b> Problems related to leakage currents which may cause electric shock. These currents usually flow through the protective ground conductor. In its absence, these currents could flow from the device to the ground via the human body.
<b>XE0KB</b>	<b>Power source problem identified in device</b> Problems related to the source that provides electrical power to the device.
<b>XE4ZM</b>	<b>Energy storage system problem in device</b> Problems related to the energy storage system (e.g. the rechargeable battery, charging system, or capacitor) and includes problems such as premature power source depletion and battery explosions.
<b>XE2WJ</b>	<b>Loss of power to device</b> A device that experienced problems due to a loss in the power supply.
<b>XE7RB</b>	<b>Power fluctuation in device</b> The device failed due to fluctuations within the power supply (e.g. transient power, power spike, power dip, or power sequencing).
<b>XE7AB</b>	<b>Short circuit of device</b> Problems due to an unintentionally low-resistance connection between two points in an electric circuit, resulting in either excessive current flow that often causes damage or in a new shorter circuit that draws current away from the original pathways and components.
<b>XE8KR</b>	<b>Signal loss of device</b> Problems due to the loss or weakening of an electrical signal or signals.
<b>XE6AQ</b>	<b>Electromagnetic compatibility problem with device identified</b> Device-to-device or device-environment problem resulting from electromagnetic disturbances.
<b>XE6BD</b>	<b>Conducted interference with device</b> Problems related to electromagnetic interference (EMI) by physical contact with conductors (e.g. wires, resistors, terminals) as opposed to radiated EMI which is caused by induction (without physical contact of the conductors).
<b>XE8P9</b>	<b>Electrostatic discharge of device</b> Problems due to sudden and momentary bursts of electrical current flowing between two objects at different electrical potentials.
<b>XE2ME</b>	<b>Inadequate immunity of device</b> Problems related to immunity or capabilities to resist electromagnetic interference (EMI).

<b>XE8TZ</b>	<b>Unintended emission of device</b> Problems due to unintended emission of electromagnetic energy by the device.
<b>XE1LT</b>	<b>Radiofrequency interference with device identified</b> Problems due to radiofrequency interference. RFI is a disturbance that affects an electrical circuit due to either electromagnetic conduction or electromagnetic radiation emitted from an external source.
<b>XE02N</b>	<b>Interoperability problem with device identified</b> Problems with the mechanical, electrical, or communication interface between two or more separate devices.
<b>XE6C8</b>	<b>Communications problem with device identified</b> Devices that do not send or receive adequate signals (this speaks to the interoperability between devices).
<b>XE22K</b>	Wired communication problem with device identified Communications problems between devices within a wired system.
<b>XE1PD</b>	Wireless communication problem with device identified Communications problems between devices within a wireless system.
<b>XE5NA</b>	Network communication problem with device identified Communications problems between devices within a network system.
<b>XE1SP</b>	<b>Incompatible component or accessory of device identified</b> A device that malfunctions due to a component(s)/accessory that does not operate correctly and according to the device's specifications.
<b>XE1YT</b>	<b>Labeling and instructions for use or maintenance of device problem identified</b> Insufficient, inadequate, or incorrect information provided on a device's label or documentation regarding e.g. its intended use, directions for use, and characteristics of the device, including its maintenance.
<b>XE3PV</b>	<b>Inadequate labelling or instructions for use of device identified</b> Inadequate information on the labels or in the instructions for use e.g. steps that are difficult to follow or that are missing.
<b>XE4MR</b>	<b>Incorrect labelling or instructions for use of device identified</b> Missing, incorrect, or inappropriate information on the labels e.g. mislabeled contents or device labeling characteristics or package contents.
<b>XE7Y7</b>	<b>Inadequate or incorrect instructions for maintenance of device identified</b> Inadequate or incorrect information in the instructions for maintenance.
<b>XE3RW</b>	<b>Material or chemical problem with device identified</b> Problems with the device materials or how its materials react to other elements either within the device or within the environment.

<b>XE2H0</b>	<b>Degradation problem identified with device</b> Problems that occur when the device becomes worn, weakened, corroded, or broken down due to processes such as aging, permeation, and corrosion.
<b>XE2WT</b>	<b>Inappropriate material identified in device</b> Problems that occur due to the presence of a material that should not be present or part of the device.
<b>XE60T</b>	<b>Inadequate physicochemical properties identified in device</b> Problems that occur due to the physicochemical properties.
<b>XE4EB</b>	<b>Incompatible material identified in device</b> Problems that occur due to the incompatibility of materials that co-exist simultaneously as part of the device.
<b>XE25Z</b>	<b>Reactivity problem identified with device</b> Problems that occur due to the reactivity of materials (e.g. over-react or under-react).
<b>XE6U0</b>	<b>Tolerance stack-up identified in device</b> Problems that result from a combination of specification variances of the components.
<b>XE640</b>	<b>Mechanical problem with device identified</b> Problems that result from internal or external forces including fluids, other objects, or environmental or physiologic influences.
<b>XE8RU</b>	<b>Device migration identified</b> A device that has moved from its original location due to external forces (e.g. stent or lead movement).
<b>XE3HZ</b>	<b>Friction problem identified with device</b> Problems caused by its surface coming in contact with another surface or fluid.
<b>XE1P8</b>	<b>Leakage or seal problem identified with device</b> Problems caused by inadequate/broken seal within the device.
<b>XE6UT</b>	<b>Lubrication problem identified with device</b> Problems that occurred because of the presence of either too much or too little lubricant where required (e.g. connectors, leading to failure mechanisms such as corrosion).
<b>XE69Q</b>	<b>Stiffness problem identified with device</b> Problems caused by either excessive or inadequate physical force exerted on it by another object resulting in problems e.g. wear, bending, deformation, fracture, fatigue.

<b>XE8V5</b>	<b>Stress problem with device identified</b> Problems caused by either excessive or inadequate physical force exerted on it by another object resulting in problems e.g. wear, bending, deformation, fracture, fatigue.
<b>XE0WG</b>	Deformation problem with device identified Problems caused by changes in the shape or size of the device due to an applied force. This can be a result of tensile forces, compressive forces, shear, bending, tensile (pulling), or torsion.
<b>XE3Y4</b>	Fatigue problem with device identified Problems due to the weakening or breakdown of its material when subjected to stress or a series of repeated stresses.
<b>XE1ZP</b>	Fracture problem with device identified Problems caused by the separation of a component, object, or material into two or more pieces including shear.
<b>XE1UJ</b>	Mechanical shock problem with device identified Problems caused by the sudden violent blow or collision to the whole device (e.g. by dropping).
<b>XE1H3</b>	Vibration problem with device identified Problems caused by the constant rhythmic motion of the device, or something in the environment to which the device is exposed.
<b>XE1ZQ</b>	Wear problem with device identified Problems due to the premature or expected erosion of its material by use, deterioration, or change.
<b>XE1EJ</b>	<b>Incorrect dimension of device identified</b> Problems caused by incorrect physical dimensions of the device or one of its parts
<b>XE4KN</b>	<b>Optical problem with device identified</b> Problems related to the optical properties of a device.
<b>XE42B</b>	<b>Optical transmission problem identified with device</b> Problems with the device's ability to pass light energy.
<b>XE8XT</b>	<b>Light source problem identified with device</b> Problems with the optical properties of a device such as diopter, glare, and irradiance or glistening.
<b>XE05W</b>	<b>Clinical imaging problem with device identified</b> Problems that occur with devices used for radiographic or imaging procedures e.g. CT scanners, magnetic resonance imaging.

<b>XE15N</b>	<b>Gradient induced field problem with device identified</b> Problems that result from the gradient-induced fields generated during radiologic procedures e.g. magnetic resonance imaging.
<b>XE1HK</b>	<b>Image artifact identified in device</b> The unacceptable distortion of an image due to signal loss that may occur during a radiologic procedure such as magnetic resonance imaging.
<b>XE6YW</b>	<b>Magnetically-induced movement of device identified</b> Problems due to unintended or excessive movement created by the application of magnetic fields.
<b>XE9Y9</b>	<b>Radiofrequency induced overheating of device identified</b> Problems due to unintended radiofrequency-induced temperature increase that can occur in the vicinity of the device.
<b>XE6TE</b>	<b>Software problem with device identified</b> Problems related to the device software.
<b>XE77W</b>	<b>Configuration issue of device identified</b> Problems due to change control or incorrect version, including regional requirements.
<b>XE6DT</b>	<b>Design error of device identified</b> The device had faulty (incomplete or incorrect) software design.
<b>XE006</b>	<b>Data compression error in device identified</b> Data was lost or corrupted during the operation of reducing storage space or communication bandwidth.
<b>XE62E</b>	<b>Incorrect algorithm in device identified</b> The device software was found to implement an incorrect sequence of steps for a specific computation.
<b>XE1X4</b>	<b>Incorrect data definition in device identified</b> The device software was found to contain errors in specifying or manipulating data items.
<b>XE2FL</b>	<b>Interface design error of device identified</b> The device software was found to contain errors in the user interface (including usability problems) or the interfaces with other systems.
<b>XE85U</b>	<b>Non-functional defect in device identified</b> The device software contained software errors that did not impact its operation.
<b>XE3RD</b>	<b>Software timing problem in device identified</b> Problem that results from the incorrect sequencing or activation of software modules.

<b>XE9JR</b>	<b>Software maintenance problem identified with device</b> The device software was not maintained/updated properly.
<b>XE688</b>	<b>Software installation problem identified with device</b> The device software was not installed as per the specifications or failed to properly install.
<b>XE4SV</b>	<b>Software requirement error with device identified</b> The software requirements for the device are either incomplete, inadequate, or in conflict.
<b>XE51Q</b>	<b>Software runtime error in device identified</b> The device software failed during operation as a result of a coding error.
<b>XE9W2</b>	<b>Software security vulnerability of device identified</b> The device software failed to provide adequate authorization, access control, protection and accountability features.
<b>XE1KR</b>	<b>Erroneous data transfer in device identified</b> The device software fails to transfer the expected data within a system or to another device.
<b>XE2A7</b>	<b>Data storage or loss of data problem in device identified</b> Storage of data was unsuccessful in total or in part.
<b>XE8XM</b>	<b>Thermal problem with device identified</b> Problems related to the temperature of the device.  <b>Exclusions:</b> Problems related to environmental temperature identified (XE3AL)
<b>XE62G</b>	<b>Overheating of device problem identified</b> The device was found to become hotter than expected during operation. This applies to devices which are not intended to deliver heat.  Use "Excessive heating identified" for devices which are intended to deliver heat during operation.  <b>Exclusions:</b> Overheating of devices intended to deliver heat during operation (XE9HT)
<b>XE9HT</b>	<b>Excessive heating of device problem identified</b> The device delivered more heat than intended or expected during operation.  This applies to devices which are intended to deliver heat.  Use "Overheating problem identified" for devices which are not intended to deliver heat during operation.  <b>Exclusions:</b> Overheating of device not intended to deliver heat during operation (XE62G)
<b>XE7A1</b>	<b>Inadequate cooling of device problem identified</b> The device did not sufficiently cool the patient or another device during operation.

<b>XE5HU</b>	<b>Protective system problem with device identified</b> Problems related to the system(s) designed to prevent or warn about unsafe operation of the device.
<b>XE0WJ</b>	<b>Fail-safe problem with device identified</b> A system intended to prevent unsafe operation of the device did not operate correctly.
<b>XE4JQ</b>	<b>Alarm system problem with device identified</b> A system intended to warn of a potentially unsafe condition did not operate correctly.
<b>XE7ZT</b>	<b>Problem of device to self-test identified</b> Malfunction of the device's self-test system.
<b>XE1JG</b>	<b>Problem of device to auto stop identified</b> An auto stop function of a device did not operate correctly.
<b>XE9AV</b>	<b>Reset problem with device identified</b> The device does not reset properly.
<b>XE2FY</b>	<b>Premature indicator activation problem identified</b> A system intended to indicate the device status was triggered prematurely.
<b>XE3BG</b>	<b>Shielding problem with device identified</b> Inadequate shielding of/by the device.
<b>XE0M6</b>	<b>Missing or inadequate safety measures of device identified</b> Safety measures are inadequately applied or missing.
<b>XE82X</b>	<b>Operational problem with device identified</b> Problems that occur during the performance, use, or functioning of the device.
<b>XE5RS</b>	<b>Device incorrectly reprocessed</b> Problems associated with the failure to properly and adequately reprocess the device.
<b>XE2RQ</b>	Device incorrectly cleaned during reprocessing identified The cleaning procedure is not followed correctly or used inappropriate cleaning materials.
<b>XE63T</b>	Device incorrectly disinfected or sterilised during reprocessing identified The disinfection or sterilization process was incorrect or the wrong products for disinfection or sterilization were used.
<b>XE0TU</b>	Device incorrectly assembled during reprocessing identified Incorrect assembly of the device following reprocessing.

<b>XE15Q</b>	<b>Failure to calibrate problem identified</b> A device that cannot calibrate (establish the relationship between a measuring device and the units of measure) to ensure accurate readings.
<b>XE3W1</b>	<b>Device difficult to operate problem identified</b> Problems including set-up, operation, and disassembly of equipment. Not including reprocessing.
<b>XE2QD</b>	<b>Incorrect interpretation of results or data problem identified</b> Problems resulting from the incorrect interpretation by the user of the results or data provided by the device.
<b>XE2YD</b>	<b>Patient sample problem with device identified</b> Problems that occurred due to endogenous or exogenous interferent in the sample, or unexpected variation in the target analyte/marker.
<b>XE8DL</b>	<b>New or unknown interferent problem with device identified</b> New or unknown endogenous or exogenous interferent (sample) identified.
<b>XE9C0</b>	<b>Known interferent problem with device identified</b> Known interferent in the sample identified.
<b>XE83B</b>	<b>Pre-analytical handling problem with device identified</b> Incorrect pre-analytical handling of patient's sample by the user.
<b>XE3AL</b>	<b>Environment problem with device identified</b> Problems that occurred due to factors within the environment e.g. dust, dirt, humidity, temperature.
<b>XE5K2</b>	<b>Environmental temperature problem with device identified</b> Device performance was affected by the temperature, or changes in temperature, of the environment in which it was used.
<b>XE9HK</b>	<b>Dust or dirt problem with device identified</b> A device that experienced problems due to ingress, or coating, of dust or dirt.
<b>XE2VF</b>	<b>Contamination of environment by device identified</b> Operation of the device results in contamination of the nearby environment e.g. dust, dirt, smoke, heat or biological material.
<b>XE6QW</b>	<b>Environmental pressure problem with device identified</b> Device performance was affected by the pressure, or changes in pressure, of the environment in which it was used.
<b>XE5SF</b>	<b>Ambient light problem with device identified</b> Device performance was affected by ambient light.  This term applies to the direct effects of ambient light on the device, and to the user's ability to operate the device (e.g. to read device output).

XE4V1	<b>Environmental humidity problem with device identified</b> Device performance was affected by the humidity, or changes in humidity, of the environment in which it was used.
XE205	<b>Manufacturing process problem with device identified</b> Problems with a device that can be traced to a problem in the manufacturing and/or production process.
XE3NF	<b>Assembly problem with device identified</b> Problems that occurred because the device was assembled incorrectly.
XE00F	<b>Sterilization problem with device identified</b> Problems that occurred during terminal sterilization by the manufacturer.
XE1PG	<b>Installation problem with device identified</b> A device that malfunctions because it was incorrectly installed, set up, or configured (E.g. misconfiguration of an "automatic" defibrillator to "semi-automatic", thereby leading to failure).
XE843	<b>Maintenance of manufacturing machinery problem with device identified</b> Problems caused by failure to maintain manufacturing equipment used to produce the device.
XE278	<b>Packaging problem with device identified</b> Problems that occurred because of the device packaging.
XE9F7	Packaging of device compromised problem identified Problems that occurred because of a compromised packaging of the device (e.g. broken or incomplete seal).
XE0KG	Packaging materials of device problem identified Problems that occurred because the composition or type of packaging materials was inappropriate for the device.
XE8S1	Packaging of device contains unintended material problem identified Problems that occurred because unintended material was packaged with the device.
XE8TA	Packaging contains incorrect device problem identified Problems that occurred because the packaging contained an incorrect device.
XE6LZ	<b>Maintenance problem with device identified</b> A device malfunction or problem that occurs after production because the device was not properly maintained according to the instructions (e.g. maintenance may be performed by user facility, distributor, or service provider).
XE9VK	<b>Transport or storage problem with device identified</b> Problems caused by transport or storage conditions.

<b>XE32G</b>	<b>Storage of device problem identified</b> Problems that result from storing the device in an uncontrolled or improper environment (e.g. moisture sensitive devices stored in a humid environment).
<b>XE41R</b>	<b>No device problem found</b> The device either functioned as intended or a problem was not found.
<b>XE587</b>	<b>No findings available</b> Use when no investigation can be performed and therefore no results will be obtained.
<b>XE3PA</b>	<b>Results pending completion of investigation</b> Investigation is ongoing and results are not yet available. Do not use this code if the investigation is complete.
<b>XE3WR</b>	<b>Appropriate term or code for investigation of device not available</b> Problems not adequately described by any other term.  Note: This code must not be used unless there is no other feasible code. The preferred term should be documented when submitting an adverse event report. This information will be used to determine if a new term should be added to the code table.
 <b>Cause investigation and type of investigation</b> For describing what was investigated and what kind of investigation was conducted to specify the root cause of the adverse event.	
<b>XE9HD</b>	<b>Testing of actual or suspected device</b> The investigation employed relevant empirical testing of the actual device suspected in the reported adverse event in order to establish their functional and other properties and to identify possible causes for the adverse event. Relevant testing would typically be based on test methods used for evaluating safety and performance as described in the latest relevant standards.
<b>XE7XH</b>	<b>Testing of device from same lot or batch retained by manufacturer</b> The investigation employed relevant empirical testing of the device of the same lot or batch as that of the suspected device in the reported adverse event in order to support the identification of possible causes for the adverse event. Testing was performed using the device retained by the manufacturer (i.e. was not shipped). Relevant testing would typically be based on test methods used for evaluating safety and performance as described in the latest relevant standards.
<b>XE4S0</b>	<b>Testing of device from same lot batch returned from user</b> The investigation employed relevant empirical testing of the device of the same lot or batch as that of the suspected device in the reported adverse event in order to support the identification of possible causes for the adverse event. The device was returned from the user. Relevant testing would typically be based on test methods used for evaluating safety and performance as described in the latest relevant standards.

**XE2ZR****Testing of device from other lot/batch retained by manufacturer**

The investigation employed relevant empirical testing of the device of another lot or batch than that of the suspected device in the reported adverse event in order to support the identification of possible causes for the adverse event. This includes devices without a lot/batch designation. Testing was performed using the device retained by the manufacturer (i.e. was not shipped). Relevant testing would typically be based on test methods used for evaluating safety and performance as described in the latest relevant standards.

**XE4X1****Testing of device from other lot/batch returned from user**

The investigation employed relevant empirical testing of the device of another lot or batch than that of the suspected device in the reported adverse event in order to support the identification of possible causes for the adverse event. This includes devices without a lot/batch designation. The device was returned from the user. Relevant testing would typically be based on test methods used for evaluating safety and performance as described in the technical file. Relevant testing would typically be based on test methods used for evaluating safety and performance as described in the latest relevant standards.

**XE1XT****Testing of model variant**

The investigation employed relevant empirical testing of a model variant of the device involved in the reported adverse event in order to support the identification of possible causes for the adverse event through plausibility reasoning. A model variant is not identical to the actual device, but shares relevant characteristics with the device involved. Relevant testing would typically be based on test methods used for evaluating safety and performance as described in the latest relevant standards.

**XE8XV****Testing of raw or starting materials**

The investigation employed relevant empirical testing of the materials used in construction of the device involved in the reported adverse event in order to support the identification of possible causes for the adverse event. Relevant testing would typically be based on test methods used for evaluating safety and performance as described in the latest relevant standards.

**XE6FS****Testing of patient sample or reference material using manufacturer's device**

The investigation employed relevant empirical testing of a patient sample or reference material using the device (usually an IVD) involved in the reported adverse event in order to support the identification of possible causes for the adverse event. Relevant testing would typically be based on test methods used for evaluating safety and performance as described in the latest relevant standards.

**XE9MY****Testing of patient sample or reference material using reference method**

The investigation employed relevant empirical testing of a patient sample or reference material using an appropriate reference method to the device (usually an IVD) involved in the reported adverse event in order to support the identification of possible causes for the adverse event. Relevant testing would typically be based on test methods used for evaluating safety and performance as described in the latest relevant standards.

**XE89L****Testing of patient sample or reference material using competitor's device**

The investigation employed relevant empirical testing of a patient sample or reference material using a competitor's device that is comparable to the device (usually an IVD) involved in the reported adverse event in order to support the identification of possible causes for the adverse event. Relevant testing would typically be based on test methods used for evaluating safety and performance as described in the latest relevant standards.

**XE8UH****Historical data analysis**

The investigation involved the analysis of historical adverse events data of the actual device involved in the adverse event and/or of products from the same and/or different batches/ lots.

**XE8BM****Trend analysis**

The investigation involved trend analysis of adverse event of the actual device involved in the adverse event and/or of products from the same and/or different batches/ lots. It should be noted that trend analysis typically is not considered sufficient as a stand-alone method, but should be used in conjunction with other investigation methods for providing for instance complementary information.

**XE7GK****Communication or interviews**

The investigation involved communication/interviews (either interpersonal or through technical means, e.g. phone, e-mail) with persons close to the adverse event, e.g. healthcare professionals (doctors, nurses etc.), the affected patient(s) or other users including, where appropriate, relatives or others engaged in caring for the affected patient.

**XE4KV****Analysis of production records**

The investigation involved the analysis of relevant production records in view of supporting the identification of possible causes for the adverse event.

**XE59M****Analysis of data provided by user or third party**

The investigation involved the analysis of relevant data provided by the user (e.g. healthcare professional, patient, clinical engineer) or a third party (e.g. testing facility) in view of supporting the identification of possible causes for the adverse event.

**XE8FB****Device not manufactured by reporting manufacturer**

Further information was obtained which established that the manufacturer of the device involved was not the one to which it was initially attributed.

**XE970****Device not returned**

The actual device involved in the adverse event was not returned for testing despite requests by manufacturer.

**XE18W****Device discarded**

The actual device involved in the adverse event had been already discarded and thus irretrievably lost for testing.

**XE5AN**

**Incomplete device returned**

The device was returned incompletely, lacking parts, components or accessories that would be required for appropriate testing and analysis of root causes.

**XE53L**

**Device not accessible for testing**

The actual device involved in the adverse event is not readily accessible for testing (e.g. remains implanted in patient).

**XE6Q2**

**Type of investigation not yet determined**

Details to determine the type of investigation are not yet available, but are being sought. Do not use this code if the investigation is complete.

**XE3TW**

**Insufficient information available**

The information available relating to the reported event is not sufficient to identify either the manufacturer, the device, or other essential information. This term indicates that no further investigation is possible. Do not use this code if further information is being sought, instead use "Type of investigation not yet determined".

**Medical device component**

Terms/codes for describing the parts and components which were involved in, or affected by, the medical device adverse event/incident.

**Biological and chemical medical device component**

Component whose mode of action involves a biological process (e.g. test strip which acts on antibodies) and chemical reaction or transformation (e.g. activated charcoal absorber).

**XE8XD**

**Absorber component of medical device**

A component or material designed to take in or attenuate a substance.

**XE6Z7**

**Cautery tip component of medical device**

A component designed to coagulate and seal blood vessels or to destroy tissue with heat or electric current.

**XE7JR**

**Device ingredient or reagent component of medical device**

A consumable material that is added to a device and is used to make a finished product or becomes part of a finished product.

**XE8HT**

**Gas scavenging component of medical device**

A component designed to remove certain gases from a gas stream or environment.

**XE4VK**

**Monomer liquid component of medical device**

The liquid that reacts with the polymer powder to form adhesive, resin, or cement.

**XE68H**

**Test strip component of medical device**

A piece of chemically treated medium designed to react in the presence of specific amounts of a trigger substance.

**XE7WP**

**Polymer powder component of medical device**

The powder that reacts with the monomer liquid to form adhesive, resin, or cement.

**Electrical and magnetic medical device component**

Components which relate to the force of magnetism or such as microchips and transistors which control and direct electric currents. Also includes components involved in the representation, storage, or transmission of information by electronic systems.

**XE321**

**Antenna component of medical device**

A component designed to transmit or receive electromagnetic signals.

**XE3WM**

**Battery component of medical device**

A component designed to produce an electric current through chemical reaction.

**XE80Z**

**Battery charger component of medical device**

A device designed to restore the capacity of a battery.

**XE7JQ**

**Cable, electrical component of medical device**

A long, thin, multistranded electrical wire designed to carry signals or power over a distance.

**XE77B**

**Cable grip component of medical device**

Component used for tensioning, pulling or stringing of wires and cables.

**XE2BS**

**Cable sleeve component of medical device**

Component used to protect cables and wires from abrasion, moisture and the elements.

**XE2WY**

**Circuit board component of medical device**

A non-conducting board with conductive tracks and electronic components forming a circuit.

**XE5BT**

**Circuit breaker component of medical device**

A component designed to open an electrical circuit when it becomes overloaded.

**XE2ZE**

**Computer hardware component of medical device**

The physical components from which a computer is constructed (electronic circuits and input/output devices).

**XE3Q8**

**Computer processor component of medical device**

Component that carries out the instructions of a computer program by performing the basic arithmetic, logic, controlling, and input/output operations specified by the instructions.

**XE1JS**

**Memory or storage component of medical device**

Any component that can hold data in machine-readable format.

<b>XE2YC</b>	<b>Network interface component of medical device</b> Point of interconnection between a computer and other computer that are linked each other.
<b>XE8UU</b>	<b>Computer software component of medical device</b> A collection of data or computer instructions that tell the computer how to work.
<b>XE59Z</b>	<b>Computer software driver component of medical device</b> A computer interface designed to control the interaction between a CPU and a peripheral device.
<b>XE2JQ</b>	<b>Software interface component of medical device</b> Languages, codes and messages that programs use to communicate with each other and to the hardware.
<b>XE8V6</b>	<b>User interface component of medical device</b> A computer program that controls the interaction between a user and a system.
<b>XE7P0</b>	<b>Cooling module component of medical device</b> A component designed to lower the temperature of a device or system.
<b>XE8UV</b>	<b>Device programmer component of medical device</b> A piece of hardware for transferring data onto programmable integrated circuits.
<b>XE033</b>	<b>Device reader component of medical device</b> A piece of hardware used to read the memory and the properties of a device.
<b>XE6UE</b>	<b>Discrete electrical component of medical device</b> An electrical component which is just one circuit, either passive or active, that is not an integrated circuit.
<b>XE845</b>	<b>Electrical capacitor component of medical device</b> An electrical component designed to store an electric charge.
<b>XE38E</b>	<b>Electrical fuse component of medical device</b> An electrical component designed to stop the flow of current when an overload condition exists.
<b>XE1UQ</b>	<b>Electrical inductor component of medical device</b> A component designed to introduce electromotive force to a circuit, usually a coil surrounding a wire.
<b>XE2AJ</b>	<b>Electrical resistor component of medical device</b> An electronic component that opposes the flow of current.
<b>XE4VJ</b>	<b>Electrical solenoid component of medical device</b> An electronic component consisting of a coil surrounding a movable iron core that is designed to act as a switch or relay.

XE018	<b>Electrical transducer component of medical device</b> An electrical component that converts one form of energy into another.
XE27R	<b>Electrical semiconductor component of medical device</b> A type of electronic component, including transistors and diodes, that make use of the variable conductivity of certain materials.
XE9ZW	<b>Integrated circuit chip component of medical device</b> A microelectronic circuit that incorporates many interconnected transistors and other components.
XE8GY	<b>Display component of medical device</b> A component designed to present information visually. <b>Exclusions:</b> Touchscreen component of medical device (XE9ZJ)
XE4YD	<b>Display indicator component of medical device</b> A component designed to show an operating condition of a system or to attract attention.
XE2JV	<b>Display screen component of medical device</b> A panel or area on an electronic device where images and data are displayed.
XE59E	<b>Electrical lead or wire component of medical device</b> A coated or uncoated wire used to connect two locations electronically. Not to be used for patient connection.
XE5U9	<b>Electrode component of medical device</b> A small piece of metal or other conductive substance that is used to take an electric current to or from a source of power, a piece of equipment. Not to be used for patient connection.
XE561	<b>Ground strap or wire component of medical device</b> A wire cable or strap designed to carry current safely away from an electronic device under fault condition
XE753	<b>Wiring harness component of medical device</b> A collection of grouped wires or cables designed to connect to a specific device.
XE6S4	<b>Electrical mixer component of medical device</b> An electronic component designed to blend signals.
XE0Y5	<b>Electrical port component of medical device</b> An electronic circuit that acts as a connection to another device or component.
XE2PX	<b>Emitter component of medical device</b> The electron source electrode in a transistor or any source in a system.

XE5GC	<b>Headphone or headset component of medical device</b> A component that covers the ear through which you can listen without other people hearing. Some headphones come with a microphone which is used to communicate with other people or the device.
XE9TB	<b>Heater component of medical device</b> A piece of equipment used to raise the temperature of air, gas or water or an object.
XE713	<b>Hub component of medical device</b> An electronic component designed as a central connection for other devices or components.
XE8JV	<b>Inverter component of medical device</b> An electrical component that converts direct current to alternating current.
XE4BN	<b>Magnet component of medical device</b> A component that attracts iron and produces a magnetic field.
XE7YS	<b>Oscillator component of medical device</b> An electronic component designed to produce a wave signal.
XE525	<b>Patient lead component of medical device</b> An insulated electrical cable designed to connect to an electrical device to a patient.
XE7F1	<b>Lead conductor component of medical device</b> A cable designed to conduct electricity from the device to the lead.
XE25C	<b>Patient electrode component of medical device</b> An electrical conductor that is designed to make contact with a patient including defibrillator paddles.
XE4XJ	<b>Power cord component of medical device</b> A flexible cable designed to connect an electrical device to a power outlet.
XE4Q4	<b>Power supply component of medical device</b> Component designed to supply electrical power to devices.
XE7EJ	<b>Pressure transducer probe component of medical device</b> A probe component designed to convert a change in pressure into a varying electrical signal.
XE062	<b>Printer component of medical device</b> An electronic component that is designed to transfer text or images to paper or other substrate.
XE2KA	<b>Receiver component of medical device</b> An electronic component designed to capture an incoming electromagnetic signal and convert it to an audible or visual signal.

<b>XE6SG</b>	<b>Receiver stimulator unit component of medical device</b> As part of a cochlear implant, an implanted component designed to receive signal from the external component and then decode the signal and transmit it to the brain.
<b>XE4TH</b>	<b>Scanner component of medical device</b> An electronic component that generates a digital representation of an image for data input to a computer; or a receiver designed to search for a signal within a specified frequency range.
<b>XE0ST</b>	<b>Speaker or sounder component of medical device</b> A component designed to convert electrical signals to sounds that can be heard.
<b>XE5R5</b>	<b>Switch or relay component of medical device</b> A mechanical or electronic component designed to break or change the connections in a circuit (e.g. button).
<b>XE1EF</b>	<b>Power switch component of medical device</b> A switch designed to regulate the power to a device.
<b>XE4QR</b>	<b>Relay component of medical device</b> A electronic component designed to break or change the connections in a circuit.
<b>XE884</b>	<b>Telemetry component of medical device</b> Component designed to transmit and receive data from a remote source using telecommunications methods.
<b>XE30P</b>	<b>Temperature compensator component of medical device</b> A component designed to compensate the temperature of one system in response to temperature changes in another system or the environment.
<b>XE56F</b>	<b>Thermostat component of medical device</b> A component designed to regulate temperature by controlling the starting and stopping of a heating/cooling system.
<b>XE256</b>	<b>Transformer component of medical device</b> A component that either steps up or steps down an alternating electrical current to an output that is suitable for another electrical device or component.
<b>XE579</b>	<b>Transmitter component of medical device</b> A component to propagate electromagnetic waves.
<b>XE5A0</b>	<b>User input device component of medical device</b> A component that uses a movable handle to create two-axis input to a computer.
<b>XE9TZ</b>	<b>Joystick component of medical device</b> A control component that uses a movable handle to create two-axis input to a computer.

<b>XE6CN</b>	<b>Keyboard or keypad component of medical device</b> A component consisting of mechanical keys that are pressed to create input to a computer.
<b>XE9FY</b>	<b>Microphone component of medical device</b> A component designed to convert sound to an electrical signal.
<b>XE9ZJ</b>	<b>Touchscreen component of medical device</b> A control component that operates the device following pressing the display on the screen.

## Measurement medical device component

Component capable of measuring something in order to obtain a result.

<b>XE37A</b>	<b>Analyzer component of medical device</b> Any component designed to perform an analysis.
<b>XE0A7</b>	<b>Oxygen analyzer component of medical device</b> A component designed to measure the concentration of oxygen in a gas mixture.
<b>XE6E8</b>	<b>Aperture component of medical device</b> An instrument designed to measure the size of an opening or one used to increase the diameter of an opening.
<b>XE34X</b>	<b>Calibrator component of medical device</b> A standard or reference material used to set the operating parameters of an instrument.
<b>XE06B</b>	<b>Clock component of medical device</b> A component designed to indicate the time of day.
<b>XE9NB</b>	<b>Counter component of medical device</b> A component designed to keep track of the number of times something happens.
<b>XE20X</b>	<b>Curvette component of medical device</b> A clear container designed to interface with an optical sensor in order to obtain an optical measurement of a contained substance.
<b>XE00B</b>	<b>Gauges or meters component of medical device</b> A component designed to give a visual indication of the condition of a system.
<b>XE1WJ</b>	<b>Flowmeter component of medical device</b> A component designed to measure the flow rate of a fluid.
<b>XE6V2</b>	<b>Manometer component of medical device</b> A component designed to measure pressure.

XE019	<b>Thermometer component of medical device</b> A component designed to measure temperature.
XE8RD	<b>Marker component of medical device</b> A visual indicator of position, place or route, including radiopaque markers.
XE7MS	<b>Pipette component of medical device</b> A measuring component, traditionally including a graduated tube, designed for the accurate transfer of liquid volumes.
XE5UB	<b>Pointer component of medical device</b> An indicator component designed to show a position on a scale.
XE2MH	<b>Scale component of medical device</b> A component designed for weighing or an indicator component with a graduated sequence of divisions.
XE8GP	<b>Sensor component of medical device</b> A component designed to respond to a stimulus by generating a signal that can be measured or interpreted.
XE5Q2	<b>Bubble sensor component of medical device</b> A component designed to signal the presence of bubbles in a system.
XE5ZD	<b>Oxygen sensor component of medical device</b> A sensor designed to respond to the presence or level of oxygen in a space or environment.
XE9G5	<b>Photodetector component of medical device</b> A component designed to detect light.
XE5WR	<b>Pressure sensor component of medical device</b> A sensor designed to respond to the level of pressure in a space or pressing on a surface.
XE7Q4	<b>Sensor probe component of medical device</b> A component designed to reach into a location for sensing. Should be used when the problem involves the probe, not the sensor.
XE3W9	<b>Temperature sensor component of medical device</b> A sensor designed to respond to the temperature of a space, surface, or environment.
XE3R3	<b>Timer component of medical device</b> A component designed to measure a time interval.

## Mechanical medical device component

Component of a device when it is working, often using power from an engine or from electricity.

**XE3UX**

### **Access port component of medical device**

A component designed for the introduction or removal of medical equipment or any substance.

**XE0WZ**

### **Actuator component of medical device**

A component which moves or controls a mechanism or system.

**XE0SV**

### **Adaptor component of medical device**

A component designed to make different pieces of apparatus compatible.

**XE6D6**

### **Air eliminator component of medical device**

A component designed to remove air from a space or fluid.

**XE4F2**

### **Anchor component of medical device**

A component designed to fix the device or a portion of the device in place.

**XE94Y**

### **Applicator component of medical device**

A component designed to transfer a substance to a surface.

**XE968**

### **Automatic injection system component of medical device**

A system designed to pump a gas or liquid into a space or environment without outside intervention.

**XE7E4**

### **Bag component of medical device**

A flexible container, often with a single opening.

**XE0HN**

### **Ball component of medical device**

Any component that is spherical in shape.

**XE5AV**

### **Balloon component of medical device**

A sac designed to be inflated and deflated.

**XE1G8**

### **Bearings component of medical device**

A point of contact between moving parts designed for support or to reduce friction.

**XE0Y2**

### **Potting component of medical device**

The resin, glue or other substance used to seal other components together.

**XE46S**

### **Probe component of medical device**

A component designed to reach into a location for manipulating or for measuring.

XE23M	<b>Processor component of medical device</b> A component designed for preparing or treating a material. Should not be used for computer processors.
	<b>Exclusions:</b> Computer processor component of medical device (XE3Q8)
XE9DJ	<b>Pulley component of medical device</b> A component which changes the direction of a force (e.g. belt or chain).
XE0K1	<b>Pump component of medical device</b> A component designed to facilitate the movement of a fluid.
XE8RF	<b>Pusher component of medical device</b> A component designed to advance something by pushing it.
XE76K	<b>Ratchet component of medical device</b> A part that allows or forces another part's movement in a single direction.
XE4JZ	<b>Rail component of medical device</b> A bar designed for support, attachment, guidance, or protection from falling.
XE0KN	<b>Side rail component of medical device</b> A supportive or protective rail attached to the side of something.
XE6YN	<b>Regulator component of medical device</b> A component designed to control a process or condition.
XE65T	<b>Reservoir component of medical device</b> A vessel designed to store a fluid.
XE1XK	<b>Bellows component of medical device</b> A component that expands and contracts to draw in air through a valve or orifice and expels it through a tube.
XE7DG	<b>Ring component of medical device</b> A circular band-shaped component.
XE017	<b>Rod or shaft component of medical device</b> A long cylindrical bar used to transmit motion or connect other components.
XE4BJ	<b>Seal component of medical device</b> A component designed to prevent passage of material through a joint or opening.
XE7N2	<b>Shock absorber component of medical device</b> A mechanical component designed to dampen or attenuate a force.
XE7ZG	<b>Sleeve component of medical device</b> A cylindrical fitting that slides over another part of a device or other object.

XE6VJ	<b>Slide component of medical device</b> A flat rectangular piece of glass on which specimens can be mounted for microscopic study.
XE740	<b>Socket component of medical device</b> A component designed as an opening into which something else fits.
XE4DU	<b>Spacer component of medical device</b> A component designed to position objects further apart.
XE7QZ	<b>Spring component of medical device</b> An elastic component designed to bend under a load and then return to its shape when unloaded.
XE4K0	<b>Stand component of medical device</b> A support component designed to hold an object.
XE9CF	<b>Belt component of medical device</b> A component consisting of a narrow band of material moving over shafts or pulleys.
XE82E	<b>Steering wire component of medical device</b> A wire designed to enable a device to be maneuvered.
XE7UE	<b>Stent component of medical device</b> Tubular support placed inside a blood vessel, canal, or duct to aid healing or relieve an obstruction.
XE8M4	<b>Stopcock component of medical device</b> A rotating component designed to act like a tap for regulating the flow of a fluid, and to completely stop the flow when closed fully.
XE00C	<b>Stopper component of medical device</b> Component designed to close an opening.
XE4E4	<b>Strain relief component of medical device</b> A structure designed to function with a connector to prevent damage to a hose or cable from excess flexing.
XE3GN	<b>Stylet component of medical device</b> A thin metal wire designed to be passed through a needle, catheter, or cannula to stiffen it or clear it of debris.
XE05P	<b>Syringe component of medical device</b> A component designed as a rigid cylinder with a plunger at one end and a delivery opening at the other.

<b>XE3ED</b>	<b>Table component of medical device</b> A component having a smooth flat surface that is usually supported by one or more vertical legs.
<b>XE06W</b>	<b>Tip component of medical device</b> Pointed or rounded end of an object.
<b>XE6GE</b>	<b>Tool component of medical device</b> A component that is delivered with a device to support its assembly or operation, and is not part of the device. Use only in the case there are no other terms to describe the component.
<b>XE7G4</b>	<b>Bottle component of medical device</b> A rigid or semi-rigid container used to store liquid.
<b>XE0UG</b>	<b>Translational motion component of medical device</b> A rotating part which is intended to transfer rotational movement or motion to another type of movement (e.g. excenters).
<b>XE2FM</b>	<b>Trap component of medical device</b> A component designed to capture or remove bubbles or fluid.
<b>XE4M3</b>	<b>Trocars component of medical device</b> A sharp, pointed rod designed to pierce the wall of a body cavity to withdraw fluid or allow placement of a catheter or other device.
<b>XE8TY</b>	<b>Tube component of medical device</b> A long hollow cylinder, either rigid or flexible, for holding or transporting liquids or gasses.
<b>XE2PZ</b>	<b>Capillary tube component of medical device</b> A narrow tube in which a liquid flows up against gravity.
<b>XE01P</b>	<b>Valve component of medical device</b> A mechanical component designed to control the flow of a fluid or gas.
<b>XE3YJ</b>	<b>Control valve component of medical device</b> A valve designed to regulate the flow of a fluid or gas.
<b>XE229</b>	<b>Luer valve component of medical device</b> A valve that incorporates a Luer fitting.
<b>XE2LS</b>	<b>One-way valve component of medical device</b> A valve designed to allow flow in only one direction.
<b>XE6MT</b>	<b>Vaporiser component of medical device</b> A component for gasifying liquids such as drugs.

<b>XE0FP</b>	<b>Vibrator component of medical device</b> A mechanical component designed to create a vibratory motion.
<b>XE83A</b>	<b>Washer component of medical device</b> A flattened disk used as a mechanical seal between objects.
<b>XE1PW</b>	<b>Weld component of medical device</b> Any joining connection that is the result of welding 2 or more parts.
<b>XE6HA</b>	<b>Wheel component of medical device</b> A mechanical component consisting of a spoked, circular rim or solid disk designed to rotate on an axle or shaft.
<b>XE0C3</b>	<b>Breathing circuit component of medical device</b> In an anesthesia machine, the pathway by which a gaseous anesthetic agent and oxygen are delivered to the patient and carbon dioxide is removed. The circuit can be open or closed.
<b>XE99Z</b>	<b>Window component of medical device</b> A transparent panel in a device designed for visual inspection or to let light pass.
<b>XE2Q3</b>	<b>Shutter component of medical device</b> Aperture that controls or blocks light or radiation passing through.
<b>XE5YT</b>	<b>Brush component of medical device</b> A component consisting of hairs or bristles set into a handle or holder.
<b>XE0AX</b>	<b>Brushing component of medical device</b> A cylindrical metal sleeve designed to reduce the friction of a rotating shaft.
<b>XE4NU</b>	<b>Cable, mechanical structural component of medical device</b> A long, thin, multistranded rope or metallic wire to hold the subject.
<b>XE2UB</b>	<b>Cannula component of medical device</b> A rigid or semi-rigid tube inserted into the body.
<b>XE9FK</b>	<b>Cannula hub component of medical device</b> A metal or plastic component that connects to the cannula.
<b>XE44H</b>	<b>Cap component of medical device</b> A component designed to close an opening of a container or device.
<b>XE00E</b>	<b>Carrier component of medical device</b> A component designed to facilitate the support, movement, or transport of another device or object.
<b>XE3K0</b>	<b>Caster component of medical device</b> A pivoting roller or wheel designed to attach to an object to make it movable.

XE088	<b>Catheter component of medical device</b> A flexible tube inserted into the body designed to permit injection or withdrawal of fluids or to keep passage open.
XE8NS	<b>Catheter hub component of medical device</b> A small metal or plastic component that connects to the catheter.
XE1TF	<b>Cell component of medical device</b> A component that is designed as a container to collect and/or transfer materials, reagents or specimens.
XE65A	<b>Chain component of medical device</b> Assembly of interconnected links, typically made of metal used for connecting other components.
XE6N0	<b>Chamber component of medical device</b> A component designed as a reservoir/storage.
XE4BK	<b>Chassis or frame component of medical device</b> A supporting frame designed to hold other components or devices such as the internal frame of an electronic device.
XE5CL	<b>Clutch component of medical device</b> A component that engages and disengages power transmission.
XE3C8	<b>Coating material component of medical device</b> A layer of material covering the surface of a device.
XE1S0	<b>Coil component of medical device</b> A structure consisting of something wrapped in a continuous series of loops.
XE8AQ	<b>Helifix coil component of medical device</b> A coil designed to allow a Helifix pacing electrode to be placed in the endocardium.
XE0YX	<b>Collimator component of medical device</b> A diaphragm or system of diaphragms made of an absorbing material, designed to define and restrict the dimensions and direction of a beam of radiation.
XE7YF	<b>Concentrator component of medical device</b> A component designed to increase the weight per unit volume of a substance.
XE5TK	<b>Cone component of medical device</b> A three-dimensional part that tapers smoothly from a flat circular shape at one end to a point at the other end.
XE7EE	<b>Connector or coupler component of medical device</b> A component designed to serve as a link between parts allowing easy disconnection and reconnection when necessary.

<b>XE4T6</b>	<b>Connector pin component of medical device</b> A projecting part of a device that allows it to be secured through an opening.
<b>XE83L</b>	<b>Controller component of medical device</b> A component designed to control or regulate the operation of another device.
<b>XE46J</b>	<b>Compressor component of medical device</b> A component that increases the pressure of air or gas.
<b>XE1S2</b>	<b>Cover component of medical device</b> An object designed to conceal, enclose, or protect something.
<b>XE8LZ</b>	<b>Cuff component of medical device</b> A bandlike structure that encircles a body part or another component or device.
<b>XE8YR</b>	<b>Cup component of medical device</b> Part or design of a device with a concave hemispherical shape.
<b>XE8T8</b>	<b>Cusp and leaflet component of medical device</b> A thin blade-like component, typically used as part of a one-way valve.
<b>XE3LB</b>	<b>Cutter or blade component of medical device</b> A component designed for slicing or cutting.
<b>XE9WL</b>	<b>Cylinder component of medical device</b> A three-dimensional part with flat circular ends and long straight sides.
<b>XE3CX</b>	<b>Device collapser component of medical device</b> A component designed to fold or collapse something.
<b>XE8J5</b>	<b>Device deployer component of medical device</b> A component designed to install something or distribute something in a systematic way.
<b>XE1KD</b>	<b>Diaphragm component of medical device</b> A component consisting of a flexible sheet or partition.
<b>XE85G</b>	<b>Dome component of medical device</b> Part or design of a device with a convex hemispherical shape.
<b>XE5K4</b>	<b>Ejector component of medical device</b> A mechanism that pushes a device or component out.
<b>XE1VC</b>	<b>Equipment pole component of medical device</b> A structural component designed to hang medical equipment.
<b>XE8ZU</b>	<b>Extender component of medical device</b> A component designed to lengthen a structure.

<b>XE026</b>	<b>Fabric component of medical device</b> Cloth produced from textile fibers.
<b>XE8VD</b>	<b>Fan or blower component of medical device</b> A component designed to create an air current through the rotation of a planar surface.
<b>XE5DL</b>	<b>Fastner component of medical device</b> A component designed to hold items in place.
<b>XE1A5</b>	<b>Adhesive fastner component of medical device</b> Any substance that affixes 2 or more surfaces together. This may be supplied separately, or attached to another item such as tape.
<b>XE4V8</b>	<b>Bolt fastner component of medical device</b> A cylindrical connector element which may have a thread/nut connection to form a fastener.
<b>XE4PG</b>	<b>Clamp fastner component of medical device</b> A component designed to mechanically hold items firmly together.
<b>XE3VN</b>	<b>Clip fastner component of medical device</b> A small component designed to hold and attach items together.
<b>XE9KR</b>	<b>Fixation wire fastner component of medical device</b> A metal strand designed for structural or other purpose.
<b>XE6R2</b>	<b>Latch fastner component of medical device</b> A fastening component for a mobile part usually consisting of a bar that is retained in a slot.
<b>XE7GP</b>	<b>Nail fastner component of medical device</b> A pin-shaped fastener with a sharp point at one end and usually flat on the other end.
<b>XE0F0</b>	<b>Nut fastner component of medical device</b> A threaded fastener designed to engage a bolt.
<b>XE6A2</b>	<b>Pin fastner component of medical device</b> A small, slender separate component which is designed to secure another object.
<b>XE059</b>	<b>Prong fastner component of medical device</b> A projecting pointed part of a device, usually one designed to attach a device to something else.
<b>XE33C</b>	<b>Retainer fastner component of medical device</b> A physical component designed to hold items in place.

<b>XE9MM</b>	<b>Rivet fastner component of medical device</b> A fastening component resembling a heavy pin, having a head on one end and designed to have the other end flattened after passing through the parts to be connected.
<b>XE3NX</b>	<b>Screw fastner component of medical device</b> A fastening component with a tapered threaded shaft and a head designed to engage with a driving tool.
<b>XE2HY</b>	<b>Staple fastner component of medical device</b> A fastening component consisting of a bent wire designed to pierce and hold two or more surfaces together.
<b>XE0NL</b>	<b>Suture thread fastner component of medical device</b> A monofilament or multifilament material used surgically to close a wound, join tissues, or fasten components of a device (e.g. fabric to wire stent frame).
<b>XE8MX</b>	<b>Tape for fixation component of medical device</b> A long, thin, flat, flexible material often used for binding or fastening.
<b>XE15J</b>	<b>Fiber component of medical device</b> Any component made from a long, slender material.
<b>XE65M</b>	<b>Filter component of medical device</b> A component designed to remove something from whatever passes through it.
<b>XE10F</b>	<b>Flange component of medical device</b> A protruding edge designed to strengthen or stabilize a device or facilitate its attachment to a surface.
<b>XE4PC</b>	<b>Foil component of medical device</b> A thin, flexible sheet of metal.
<b>XE3HQ</b>	<b>Gas exchanger component of medical device</b> Component that is used to transfer gasses between two or more locations.
<b>XE3QZ</b>	<b>Gasket component of medical device</b> A preformed material designed to form a seal between connecting surfaces.
<b>XE5M6</b>	<b>Gears component of medical device</b> A toothed wheel designed to mesh with another toothed object and transmit motion.
<b>XE0RK</b>	<b>Generator component of medical device</b> A component designed to produce electricity, vapor or gas.
<b>XE1ND</b>	<b>Guide component of medical device</b> A component designed to help direct the passage of another object.

XE64H	<b>Guidewire component of medical device</b> A flexible wire designed to help position medical devices within the body.
XE11W	<b>Handpiece component of medical device</b> A part of a device designed to be used while held in the hand.
XE37B	<b>Header component of medical device</b> The connection point between the leads and the generator.
XE2AL	<b>Sewing ring component of medical device</b> A ring of supportive material designed to provide a stable surface for attachment to surrounding tissues.
XE12Q	<b>Heat exchanger component of medical device</b> A component designed to transfer heat between fluids and/or gases across a barrier or to the environment.
XE5ZS	<b>Hinge component of medical device</b> A component designed to join two objects and allow them to swing relative to one another.
XE4FZ	<b>Holder component of medical device</b> A component designed to hold another object.
XE3A4	<b>Hose component of medical device</b> A flexible tube designed to carry a fluid or gas.
XE5S9	<b>Housing component of medical device</b> A rigid casing that encloses and protects a piece of equipment.
XE0YE	<b>Humidifier component of medical device</b> A component used to increase moisture in a gas.
XE1TK	<b>Hydraulic system component of medical device</b> A system designed to use fluid pressure to bring about movement.
XE4NN	<b>Impeller component of medical device</b> The rotating component of a centrifugal pump, compressor, or other machine designed to move a fluid by rotation.
XE3WA	<b>Inserter component of medical device</b> A component whose function is to facilitate the insertion of a particular device.
XE1Y2	<b>Insulation component of medical device</b> A material designed to reduce the transmission of heat, sound, or electricity.
XE7JF	<b>Isolator component of medical device</b> Any material or structure designed to limit the interaction between two components.

<b>XE7N3</b>	<b>Jaw component of medical device</b> A component designed to use opposing parts to close on and hold an object.
<b>XE7GQ</b>	<b>Joint component of medical device</b> A component designed as the junction between objects; it may be flexible or rigid.
<b>XE3AW</b>	<b>Knob component of medical device</b> A rounded lump or ball used for adjusting or controlling.
<b>XE6R7</b>	<b>Label component of medical device</b> Any written, printed, or graphic matter upon a device to identify its nature, ownership, or other characteristics of the device.
<b>XE1VQ</b>	<b>Leaflet component of medical device</b> A device consisting of two thin blades hinged in the center; typically designed to control flow of fluids.
<b>XE5XR</b>	<b>Lever component of medical device</b> A rigid bar that rotates around a fixed point.
<b>XE08E</b>	<b>Foot pedal component of medical device</b> A lever designed to be operated with the foot.
<b>XE80W</b>	<b>Liner component of medical device</b> A component placed inside the walls of a cavity or container for protection or insulation.
<b>XE17E</b>	<b>Magazine or cassette component of medical device</b> A compartment in a device designed to house a consumable material for feeding into a mechanism.
<b>XE87E</b>	<b>Manifold component of medical device</b> A compartment in a device designed to house a consumable material for feeding into a mechanism.
<b>XE26U</b>	<b>Mask component of medical device</b> A flexible, form-shaped component designed to be placed over the nose and/or mouth.
<b>XE74K</b>	<b>Mechanical mixer component of medical device</b> A mechanical component designed to blend materials.
<b>XE9VQ</b>	<b>Membrane component of medical device</b> A component that is made from or resembles a thin flexible sheet of material acting as a boundary or separating two chambers.
<b>XE8R6</b>	<b>Mesh component of medical device</b> Component made of overlapping strands forming a fine net-like structure.

XE0R5	<b>Motor component of medical device</b> A machine that converts any form of energy to produce or impart motion (kinetic energy).
XE8X1	<b>Mount component of medical device</b> A structural component designed to facilitate the attachment of one object to another.
XE4BH	<b>Needle component of medical device</b> A component with a long, slender, pointed shape.
XE78G	<b>Nozzle component of medical device</b> A component designed to regulate and direct the flow of a fluid or gas.
XE7C4	<b>Packaging component of medical device</b> The outer wrapping around a device which serves to contain, identify, and protect it prior to use.
XE5AR	<b>Pad component of medical device</b> Typically a soft, cushion-like material used to prevent injury or damage to a person or device. Can also be made of an absorbent material to absorb liquid.
XE080	<b>Panel component of medical device</b> A rigid sheet that forms a surface of a device or component.
XE965	<b>Plate component of medical device</b> A thin, flat sheet or strip used to join, strengthen or to form parts of another structure.
XE09R	<b>Plug component of medical device</b> A component designed to seat into an opening in a device or other object.
XE9R2	<b>Plunger component of medical device</b> A component of a machine, tool or device that pushes or thrusts another object, liquid or gas.
XE25A	<b>Post component of medical device</b> An upright piece that is fixed firmly that supports, place or aligns other parts.

## Optical medical device component

Component which involves or relates to vision, light, or images.

XE120	<b>Camera component of medical device</b> An apparatus for taking photographs, generally consisting of a lightproof enclosure having an aperture with a shuttered lens through which the image of an object is focused and recorded on a photosensitive film or plate.
-------	---

<b>XE5CR</b>	<b>Film component of medical device</b> A photographic material designed to capture an image upon exposure to electromagnetic radiation.
<b>XE7NH</b>	<b>Imager component of medical device</b> A component designed to create or record a visual representation.
<b>XE6GJ</b>	<b>Laser component of medical device</b> A component designed to emit a monochromatic beam of coherent light.
<b>XE6QH</b>	<b>Light emitting diode component of medical device</b> A type of diode designed to emit light when a current passes through it.
<b>XE616</b>	<b>Lenses component of medical device</b> An electric or optical component designed to focus (concentrate) or disperse electromagnetic radiation.
<b>XE5LN</b>	<b>Light source component of medical device</b> A component that produces visible light.
<b>XE5G9</b>	<b>Bulb component of medical device</b> A component designed to produce light or heat.
<b>XE9EM</b>	<b>Mirror component of medical device</b> A component consisting of a polished surface designed to reflect light.
<b>XE7A6</b>	<b>Optical fiber component of medical device</b> A component made with thin glass fibers as a conduit for transmission of light.

## Safety medical device component

Safety related component

<b>XE28G</b>	<b>Alarm component of medical device</b> A component designed to signal the occurrence of a particular event.
<b>XE5DW</b>	<b>Alarm component of medical device, audible</b> A component designed to signal the occurrence of a particular event by making a sound.
<b>XE3WT</b>	<b>Alarm component of medical device, visual</b> A component designed to signal the occurrence of a particular event in a way that can be seen.
<b>XE2N6</b>	<b>Emergency button or switch component of medical device</b> A button and circuits designed to force the shutdown of a machine or device.

<b>XE37H</b>	<b>Fail-safe system component of medical device</b> A component designed to prevent malfunction, unsafe, or unauthorized operation of a device or system.
<b>XE51V</b>	<b>Locking mechanism component of medical device</b> A fastening component designed to hold, close, or secure.
<b>XE8RN</b>	<b>Protector or shield component of medical device</b> A component designed to prevent harm or protect against damage to other components.
<b>XE0ZU</b>	<b>Safety interlock component of medical device</b> A mechanical or electronic component designed to prevent undesired actions due to the changing state of a device, typically to prevent harm to an operator or damage to the device itself.
<b>XE4HV</b>	<b>Needle stick prevention mechanism</b> A mechanism integrated into a device to prevent needle stick injuries.
<b>XE58K</b>	<b>Safety valve component of medical device</b> A valve designed to automatically open in order to maintain the pressure in a system below a specified pressure.

## Other component of medical device

Terms not yet classified. If these terms get moved to other categories, this category can be deleted.  
(Previously the device category.)

<b>XE27U</b>	<b>Part, component or sub-assembly term not applicable</b> The device does not have distinct parts, components, or sub-assemblies, or it would not be appropriate to link the reported incident to a single part, component, or sub-assembly. Use this term if the problem involves or affects the overall device rather than a specific component.
<b>XE8NG</b>	<b>Appropriate term or code not available for medical device component</b> The parts, components, or sub-assemblies are not adequately described by any other term. Note: this code must not be used unless there is no other feasible code. The preferred term should be documented when submitting an adverse event report. This information will be used to determine if a new term should be added to the code table.

## Consciousness

### Glasgow Coma Scale Eye opening score

<b>XC3W</b>	<b>One or both eyes are open spontaneously</b>
-------------	--

- XC5L**      One or both eyes open to verbal stimulation
- XC3H**      One or both eyes open to painful or noxious stimulation
- XC87**      No eye opening even with painful or noxious stimulation

Glasgow Coma Scale Motor score

- XC4L**      Obeys commands
- XC6J**      Localizes response to painful or noxious stimulation
- XC8Q**      Withdrawal response to painful or noxious stimulation
- XC8W**      Abnormal flexion response to painful or noxious stimulation
- XC8H**      Extension response to painful or noxious stimulation
- XC34**      No motion even with painful or noxious stimulation

Glasgow Coma Scale Verbal score

- XC2X**      Oriented, normal speech
- XC4Y**      Confused, disoriented speech
- XC4A**      Language utterances
- XC7U**      Non-language utterances (incomprehensible sounds) to painful or noxious stimulation
- XC8U**      No verbal output even with painful or noxious stimulation

Pupil reaction score

- XC5Y**      Neither pupil reacts
- XC16**      One pupil reacts
- XC5K**      Both pupils react
- XC85**      Data not available

## Substances

**Coded Elsewhere:** Allergens

### Medicaments

Agents primarily affecting the gastrointestinal system

**XM1349      Antacids**

**Coded Elsewhere:** Magnesium oxide (XM7G33)

**XM7GM7      Magnesium compounds**

**Coded Elsewhere:** Magnesium peroxide (XM3CD3)

**XM39M3**      Magnesium hydroxide

**XM35X7**      Aluminium, aluminium magnesium silicate

**XM3JP8      Aluminium compounds**

**XM9N47**      Algeldrate

**XM2VU8**      Aluminium, aluminium phosphate

**XM4NY5**      Aloglutamol

**XM7DC3**      Aluminium, aluminium glycinate

**XM9PG0**      Dihydroxyaluminum sodium carbonate

**XM38T8**      Aluminum hydroxide (gel)

**XM0SA0      Calcium compounds**

**XM9003**      Calcium carbonate

**XM8EF6**      Calcium silicate

**XM0D52      Combinations and complexes of aluminium, calcium and magnesium compounds**

**XM5R16**      Magaldrate

**XM8J56**      Almagate

**XM3EB6**      Hydrotalcite

**XM9Y49**      Almasilate

Gastric acid secretion suppressants

Histamine H2-receptor antagonists

**XM9YL4      Cimetidine**

<b>XM6441</b>	<b>Famotidine</b>
<b>XM9ZP3</b>	<b>Nizatidine</b>
<b>XM6WY8</b>	<b>Ranitidine</b>
<b>XM0SH0</b>	<b>Roxatidine</b>
<b>XM08A8</b>	<b>Niperotidine</b>
<b>XM1ZT1</b>	<b>Ranitidine bismuth citrate</b>
<b>XM0Q37</b>	<b>Lafutidine</b>
<b>XM2WX5</b>	<b>Proton pump inhibitors</b>
<b>XM8X45</b>	<b>Omeprazole</b>
<b>XM86M3</b>	<b>Pantoprazole</b>
<b>XM39X4</b>	<b>Lansoprazole</b>
<b>XM3M01</b>	<b>Rabeprazole</b>
<b>XM8YE1</b>	<b>Esomeprazole</b>
<b>XM5RA0</b>	<b>Dexlansoprazole</b>
<b>XM1J18</b>	<b>Dexrabeprazole</b>
<b>XM3MK2</b>	<b>Tegoprazan</b>
<b>XM4ML1</b>	<b>Prostaglandins</b>

<b>XM81W1</b>	<b>Sotradecol</b>

Drugs primarily affecting the autonomic nervous system

Adrenergic agonists

**Coded Elsewhere:** Predominantly alpha-adrenoreceptor and dopamine receptor agonists (XM1K71)  
Predominantly beta-adrenoreceptor agonists (XM96M5-XM0FE9)

<b>XM36U7</b>	<b>Alpha- and beta-adrenoreceptor agonists</b>
<b>XM9187</b>	<b>Etilefrine</b>
<b>XM6RQ3</b>	<b>Mephentermine</b>
<b>XM3273</b>	<b>Epinephrine</b>
<b>XM10F0</b>	<b>Amezinium metilsulfate</b>

XM5H72	Ephedrine
XM7B75	Droxidopa
XM9K94	Ethylnorepinephrine
XM1H52	Cinnamedrine
<b>XM3LR7</b>	<b>Predominantly alpha-adrenoreceptor agonists</b>
XM39Y4	Thenyldiamine
XM2V55	Phenyltoloxamine
XM7D21	Paredrine
XM81D8	Norepinephrine
XM7RF2	Moxastine
XM8TK4	Methaphenilene
XM4TB9	Levocabastine (hydrochloride)
XM2305	Homochlorcyclizine
XM59T1	Embramine
XM8ZH9	Dimenhydrinate
XM29D4	Difenidol
XM62B0	Dibenzheptropine
XM8Y26	Cyclopentamine
XM0Y33	Clemizole
XM4PH8	Chlorothen
XM66X7	Chlor-Trimeton
XM0AN5	Cetoxime
XM88Z7	Bisulepin (hydrochloride)
XM35M7	Benzquinamide
XM25T0	Apraclonidine (hydrochloride)
XM0W81	Antistine
XM6XN3	Phenylpropanolamine
XM6ZQ3	Phenylephrine
XM0CL2	Pseudoephedrine

Adrenergic antagonists

Alpha-adrenoreceptor antagonists

XM45W7	Prazosin
XM3L37	Indoramin
XM58X5	Doxazosin
XM30L7	Urapidil
XM2L44	Alpha adrenergic blocking drug
XM6MJ9	Bunazosin
XM4UW6	Dibenamine
XM70W7	Dibenzylidine
XM3Y81	Hydergine
XM81R1	Priscol, Priscoline
XM3F82	Tamsulosin
XM9LH2	Terazosin
XM1C94	Alfuzosin
XM7D19	Trimazosin
XM1FQ5	Silodosin

Beta-adrenoreceptor antagonists

XM7R98	Beta-adrenoreceptor antagonists, non selective
XM2YK6	Alprenolol
XM0M15	Oxprenolol
XM2SH3	Pindolol
XM3HA9	Propranolol
XM1KQ9	Timolol
XM5BT4	Sotalol
XM69F3	Nadolol
XM89L8	Mepindolol
XM1AJ9	Carteolol

XM6489	Tertatolol
XM79L8	Bopindolol
XM9RX1	Bupranolol
XM17Y6	Penbutolol
XM2M62	Cloranolol
<b>XM9MF0</b>	<b>Beta-adrenoreceptor antagonists, selective</b>
XM9VG1	Practolol
XM8L21	Metoprolol
XM0M62	Atenolol
XM0V36	Acebutolol
XM7U87	Betaxolol
XM0HY3	Bevantolol
XM8QC9	Bisoprolol
XM54E1	Celiprolol
XM4AB1	Esmolol
XM1T80	Epanolol
XM7115	S-atenolol
XM0995	Nebivolol
XM3156	Talinolol
XM44F9	Landiolol
<b>XM5S93</b>	<b>Beta adrenergic blocking agent, heart</b>
<b>XM8026</b>	<b>Bunitrolol</b>
<b>XM3N87</b>	<b>Carazolol</b>
<b>XM7V19</b>	<b>Indenolol</b>
<b>XM91L7</b>	<b>Pronetalol</b>
<b>XM77W2</b>	<b>Tolamolol</b>
<b>XM77E7</b>	<b>Alpha and beta blocking agents, antagonists</b>
XM8ER3	Labetalol
XM80G6	Carvedilol
XM0TY3	Medroxalol

Parasympatholytics [anticholinergics and antimuscarinics] and spasmolytics

<b>XM9FY5</b>	<b>Agents predominantly used for gastrointestinal disorders</b>
<b>XM8921</b>	<b>Synthetic anticholinergics, esters with tertiary amino group</b>
<b>XM5D56</b>	Oxyphencyclimine

XM3B88	Ipidacrine
XM8C30	Neostigmine
XM4NE1	Pyridostigmine
XM7494	Arecoline
XM0000	Benzpyrinium bromide
XM0MZ4	Bethanechol chloride
XM4LE7	Cholinergic (drug)
XM4ZZ7	Cholinergic muscle tone enhancer
XM6VJ2	Cholinergic trimethyl ammonium propanediol
XM8JX6	Parasympathomimetic drug
XM0RX5	Pilocarpine
XM5EY0	Pilocarpus extract (jaborandi)
XM9223	Choline esters
XM4AT9	Carbachol
XM9XA2	Bethanechol
XM63Q0	Choline alfoscerate
XM31K4	Cevimeline
XM6PN9	Varenicline
XM7HS1	Cytisinicline
XM4C58	Amifampridine

#### Ganglionic blocking drugs

XM90S5	Hexamethonium bromide
XM13Z0	Mecamylamine
XM8JB8	Pemipidine
XM68K9	Pentamethonium bromide
XM2A33	Pentolinium tartrate
XM3YS6	Quaternary ammonium ganglion blocking
XM6JW6	Tetraethylammonium chloride

<b>XM9MS2</b>	<b>Tetrylammonium chloride</b>
<b>XM3YZ9</b>	<b>Trimetaphan camsilate</b>
<b>XM4BZ9</b>	<b>Trimethaphan</b>
<b>XM9BT3</b>	<b>Trimethidinium</b>

## Drugs used in addictive disorders

**Coded Elsewhere:** Naltrexone (XM2M16)  
 Methadone (XM7XP1)  
 Buprenorphine (XM9Z94)  
 Diamorphine (XM05B3)  
 Nalmefene (XM4PD9)  
 Varenicline (XM6PN9)  
 Cytisinicline (XM7HS1)

<b>XM51D2</b>	<b>Disulfiram</b>
<b>XM2FC3</b>	<b>Calcium carbimide</b>
<b>XM6BN2</b>	<b>Nicotine</b>
<b>XM9T01</b>	<b>Acamprosate</b>

## Antivertigo and motion sickness preparations

**Coded Elsewhere:** Antinauseants, antiemetics and emetics (XM4H25-XM9FU8)  
 Antihistamines (XM4J58)

<b>XM14C0</b>	<b>Betahistine</b>
<b>XM7CE7</b>	<b>Cinnarizine</b>
<b>XM52G4</b>	<b>Flunarizine</b>
<b>XM2U21</b>	<b>Acetylleucine</b>

## Agents primarily acting on smooth and skeletal muscles and the respiratory system

**Coded Elsewhere:** Labour repressants

### Oxytocic drugs

**Coded Elsewhere:** Prostaglandins (XM4ML1)  
 Ergot alkaloids (XM0XY6)

<b>XM0Q45</b>	<b>Ergot derivative</b>
<b>XM77J5</b>	<b>Ergot prepared</b>

<b>XM5NB5</b>	<b>Ergotocine</b>
<b>XM4534</b>	<b>Hormone oxytocic</b>

## Diagnosis code descriptors

### Discharge diagnosis types

- |             |  |
|-------------|--|
| <b>XY0Y</b> | <b>Main condition</b>  |
|             | Reason for encounter or admission after study at the end of the episode. |
| <b>XY7B</b> | <b>Main resource condition</b>   |
| <b>XY6E</b> | <b>Initial reason for encounter or admission</b>                         |

### Diagnosis timing

- |             |  |
|-------------|--|
| <b>XY6M</b> | <b>Present on admission</b>                            |
| <b>XY69</b> | <b>Developed after admission</b>                       |
| <b>XY85</b> | <b>Uncertain timing of onset relative to admission</b> |

### Diagnosis timing in relation to surgical procedure

- |             |                       |
|-------------|-----------------------|
| <b>XY9U</b> | <b>Preoperative</b>   |
| <b>XY9N</b> | <b>Intraoperative</b> |
| <b>XY7V</b> | <b>Postoperative</b>  |

### Diagnosis method of confirmation

- |             |  |
|-------------|--|
| <b>XY3B</b> | <b>Diagnosis confirmed by laboratory examination</b> |
| <b>XY0E</b> | <b>Diagnosis confirmed by serology</b>               |
| <b>XY9Q</b> | <b>Diagnosis confirmed by histology</b>              |
| <b>XY8K</b> | <b>Diagnosis confirmed by genetics</b>               |
| <b>XY9R</b> | <b>Diagnosis confirmed by imaging</b>                |
| <b>XY19</b> | <b>Diagnosis confirmed by microscopy</b>             |
| <b>XY0K</b> | <b>Diagnosis confirmed by culture</b>                |

### Diagnosis certainty

- |             |                               |
|-------------|-------------------------------|
| <b>XY7Z</b> | <b>Provisional diagnosis</b>  |
| <b>XY75</b> | <b>Differential diagnosis</b> |

Obstetrical diagnosis timing

- XY3K      Delivered with or without mention of antepartum condition**
- XY8Q      Delivered, with mention of postpartum condition**
- XY8U      Antepartum condition or complication**
- XY9P      Postpartum condition or complication**
- XY9S      Unspecified as to episode of care, or not applicable**

Encounter descriptors

- XY18      Initial encounter**
- XY8S      Subsequent encounter**

Capacity or context

- XX2QG9      Condition of the fetus and newborn reported in the context of the mother**  
This code is intended to flag that an additional code from the perinatal section is used to identify the outcome of delivery on the mother's record.

Biological sex

- XX2V25      Female**
- XX2UQ8      Male**
- XX45B7      Intersex**
- XX2PX3      Biological sex not specified**

Health Devices, Equipment and Supplies

Devices for administration, collecting and picking

Hematology and hemotransfusion devices

Cardiocirculatory devices

- XD7FF9      Central venous catheters**
- XD4ZY0      Stethoscopes**
- XD8DB0      Stethoscopes, Binaural**

**XD04L8            Stethoscopes, MRI**

Disinfectants, antiseptics and proteolytics for medical devices (D. Lgs. 46/97)

Dialysis devices

<b>XD8V84</b>	<b>Dialysis filters</b>
<b>XD8DD4</b>	<b>Haemodialysis, hemofiltration, haemodiafiltration filters</b>
<b>XD2KJ5</b>	Dialyzers - UHF < 18 ml/h/mmHg
